Chelsea Construction Pants

- Style 76488

Lightweight and highly durable, yet comfortable for all day use. Jeans feature Cordura fabric 1% polyamide-reinforced knee, bottom hem, and hanging pockets for long life. Designed with a gusseted crotch for greater durability and movement, plus a raised back for a comfortable fit in any position. Have 2 front pockets, 2 back pockets, 2 hanging pockets in Cordura fabric with double bottom for long life, polyester loops for screwdrivers and pliers, thigh pocket with flap, and a handy ruler pocket. Versatile jeans come with extendable leg length for varying body shapes, adjustable kneepad position for a more comfortable fit, and reflective material for added visibility. 79% cotton, 21% polyester, with reinforced 100% Cordura fabric.

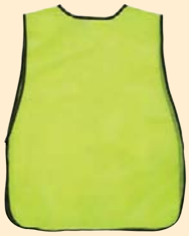
Back Stripe Pattern Options

U-Back - Has two vertical stripes and at least one horizontal stripe of reflective tape on the back of the vest

X-Back - Reflective tapes cross the back of the vest in an X pattern. Indicates a worker is facing away and can't see signals or oncoming traffic

Chevron - Inverted V-shape pattern provides enhanced worker visibility especially in low-light conditions

Vertical - Has two parallel reflective vertical stripes down the back and front of vest



None - Has no reflective stripes

Safety Vest ANSI Classification

ANSI types are based on the work environment and the activities being performed.

Type O - Off-Road

Type R - Roadway and traffic control

Type P - Public Safety

Performance classes specify the amount and design of visible and reflective material in the garment. For further information, see Quick Tip #153: High-Visibility Clothing Standards at grainger.com/quicktips.

PERFORMANCE CLASS 1 (TYPE O)

Offers the minimum amount of high-visibility material to enhance the visibility and conspicuity of workers in off-road environments.

PERFORMANCE CLASS 2 (TYPE R OR P)

Provides additional amounts of high-visibility and reflective materials that allow for better definition of the human form. Considered the minimum level of protection for workers exposed to roadway rights-of-way and TTC (temporary traffic control) zones.

PERFORMANCE CLASS 3 (TYPE R OR P)

Provides greater level of high-visibility and reflective material to make the wearer more visible in both complex backgrounds and through a full range of movement. A garment or vest without sleeves worn alone is not considered Class 3 protection.

Flame-Resistant Rainwear

- Meets ASTM D6413

Safetyflex—Specialty PVC on polyester material is durable, mildew resistant, and provides a comfortable fit. Fabric is chemical resistant to many acids, alcohols, alkalies, oils, and salts, while the Therm-O-Rad sealed seams provide you 100% liquidproof protection. The jacket features full cut shoulders with 90° sleeve to body angle for supreme freedom of movement, an attached hood, and a storm fly front to seal out rain, wind, and contaminants. The tapered sleeves can fit in protective gloves and can accommodate glove rings for additional safety. Overalls have a plain front and feature a stitch bonded, non-woven lining that resists tears, punctures, and dissipates moisture. Suspenders have a snap lock buckle for easy adjustments. Snap closures are heavy-duty for long life.

Magnaprene—Nylon fabric is coated with neoprene for abrasion and mildew resistance, and to protect against acids, chemicals, oils, and solvents. The stitched and taped seams offer 100% waterproof protection. Jacket features batwing sleeve construction for maximum freedom of movement and take-up snaps on the sleeves for an adjustable fit. Comfortable corduroy tip collar and a storm fly front that helps seal out rain, wind, and contaminants. Pants have take-up snaps on the ankle cuffs for an adjustable fit and heavy duty snaps for long life.

TINGLEY

High-Visibility Arc-Flash and Flame-Resistant Rainwear

- 2" silver reflective tape
- Jackets and Coats are Type R Class 3
- Bib Overalls are Class E

Eclipse Quad-Hazard rainwear features Thermo-Grid technology to block out heat energy, while the flame resistant PVC coating on Nomex provides 100% liquid proof protection. Ideal for use in all electric and gas utilities, power generation, pipeline and construction work, as well as in petrochemical applications. Resistant to many acids, oils, alcohols, salts, and alkalies.

Jackets and Coats—High-visibility, liquid-proof coats provide excellent arc flash protection and have an overhead shoulder design to let you do overhead work without limiting your range of motion. The zipper/storm fly front has a snap closure and hidden non-conductive, non-corrosive hardware to seal out heat, wind, rain, and contaminants, while hook and loop take-up straps on wrists help assure an adjustable fit. D-ring access lets you attach a fall protection harness. Also feature a flame-resistant corduroy collar with rollaway hood and a full-vented cape back for improved air circulation.

Jackets J2556 and J2557 also provide flash fire protection, and have an adjustable elastic drawcord.

Bib Overalls—Snap fly front overalls feature Quad-Hazard high-visibility, liquid proof, arc flash, and flash fire protection. Suspenders have heavy-duty non-conductive quick-release buckles and crossovers, while the hook-and-loop take-up straps on ankle cuffs provide an adjustable fit and help seal out contaminants.

Impertech Sanitation Rainwear

- 0.16mm
- Meet ASTM F1671 Bloodborne Pathogen standard
- Navy color

Constructed of circular knit polyester backing with a stretch polyurethane coating. Microwelded seams help ensure that garments are waterproof. Stretches with wearer for extra comfort.

Jacket—Front zip has a snap storm flap and over-flap front closure with plastic snaps. Attached hood has elastic for protection. Raglan sleeves enable increased arm movement.

Bib Overalls—Have a high waist and adjustable elastic suspenders. Snap adjustment waist and elastic at ankles for protection.

Bristol Bay Rainwear

- 0.75mm

PVC with cotton twill backing provides protection against chemicals, animal fats, and motor oils. Material is water- and windproof and resistant to the effects of seawater and sunlight. Durable double trimmed seams and generous sizing for working comfort. Machine washable.

Jacket has attached drawstring hood with large visor, neoprene storm cuffs, chrome-plated brass snaps, and double snap system on placket for extra wind and rain protection.

Pants feature an additional 0.35mm layer of PVC-coated oxford nylon for extra wear resistance. Also with adjustable waist panel and heavy-duty elastic suspenders.

Particulate & Liquid Protective Boot & Shoe Covers

These boot and shoe covers are worn over personal footwear to protect surfaces from contaminants and protect footwear from damage.

Non-Hazardous or Hazardous Dry Particulates—For use when working with non-hazardous or hazardous dry particulates larger in size than aerosols and include dust and dirt.

Non-Hazardous Liquid Splash/Spray—Use when working with non-hazardous liquid splash and spray. Splash is non-pressurized or lightly pressurized when it contacts a garment while spray is pressurized.

Bloodborne Pathogen Resistance for Non-Hazardous Dry Particulates and Non-Hazardous Liquid Splash—Help protect from bloodborne pathogens (such as hepatitis), non-hazardous dry particulates (larger in size than aerosols and include dust and dirt), and non-hazardous liquid splash (non-pressurized or lightly pressurized when it contacts a garment while spray is pressurized).

Chemical-Resistant Bib-Style Aprons

PolyCo Ansell Condor

Economy Chemical-Resistant—VR polyolefin aprons resist industrial concentrations of hydrofluoric, hydrochloric, sulfuric, and nitric acids and are FDA Approved for indirect food contact. Vinyl aprons resist oils, fats, and chemicals. Urethane aprons offer light-weight comfort and long wear. PVC and PVC blends aprons provide superior flexibility and resist grease, fats, oils, punctures, and abra-sion. Nitrile aprons are resistant to oil, fuel, and hydrocarbons.

Premium Chemical-Resistant—SBR rubber aprons are abrasion resistant and protect against mild solvents, chemicals, and acids. Neoprene and Hycar aprons protect against a wide range chemicals, acids, oils, grease, and animal fats while maintaining flexibility over a wide temperature range.

Chemical-Resistant Aprons and Gowns

COAT AND SMOCK APRONS

Vinyl Coat Aprons—Condor aprons feature heat-sealed seams, bound collar, elastic wrists, and nylon ties with breakaway snaps at back of neck and waist.

Ansell aprons are static and corrosion resistant, with no exposed elastic or metal parts. 6-mil models feature plain edge, closed back, and elastic cuff. 8-mil models feature heat-sealed seams.

Neoprene Smock Aprons—Sewn-edge aprons have cotton ties for adjustable back closure, silver-plated grommets, and elastic wrists.

DISPOSABLE BARRIER GOWNS

VR Polyolefin—Provide full frontal body protection from chemical splashes. Full-length sleeves with either an integral thumb loop or elastic cuff. Heat-sealed seams.

Unisex Lab Coats and Frocks

- Non-sterile
- Serged seams

Soft, breathable, and lightweight disposable garments offer comfort and enhanced range of motion. Spunbond-meltblown-spunbond (SMS) fabric. Economical protection from dust, dirt, nonhazardous dry particles and light liquid splash. Lab coats have front pockets; frocks do not have pockets.

Disposable Lab Coats

Economical solution for disposable clothing and for use in less demanding environments. Breathable fabric offers protection against dry particles and nonhazardous water-based aerosols. Coats with knit or elastic cuffs help keep cuffs from snagging objects and can provide more protection from airborne particles. Serged seams. All coats have a collar (except Basic SMS coats) for a more comfortable fit.

Basic SMS—The Spun-Bonded Melt-Blown Synthetic (SMS) fabric is a polypropylene material constructed of 3 durable layers that resists abrasion and wear.

Polypropylene—Durable polypropylen material resists wear and abrasion. H2308 has a hook-and-loop closure for easy donning/doffing.

Tyvek 400—Fabric features no films or laminates to abrade or wear away. Protection is built into the fabric itself, and it provides better protection than microporous film fabrics even after wear and abrasion.

Ansell

Microchem by AlphaTec Protective Coveralls

Each style has elastic ankles and cuffs.

68-1500

Breathable design help reduce the risk of heat stress and is proven to filter 100% of particles less than 3 microns. Ideal for applications involving stripping, clear up or handling of asbestos, general maintenance, construction and contract cleaning. Serged seams combine strength with a particle barrier.

68-1500 PLUS FR

Flame retardant and anti-static SMMS nonwoven fabric provides a good barrier to particulates and low hazard liquid sprays or splashes. Comfortable design allows full freedom of movement when worn over heat and flame protective clothing. Strong serged seams provide a particle barrier.

68-1800

Protects from low hazard liquid spray, splashes, and particles protection. Bound seams provide superior strength and a liquid and particle barrier. Low linting to help reduce the risk of fiber contamination in some critical areas.

68-2000

Helps provide both protection and comfort with exceptional liquid and particulate protection. Bound seams offer excellent strength and a liquid and particle barrier. Meet ASTM F1761 and EN 14126:2003 resistance to penetration of blood, body fluids and blood-borne pathogens.

68-2000 COMFORT

Specifically designed for those working in warmer climates or working environments to help reduce the possibility of heat stress. Bound seams offer superior strength, and a liquid, and particle barrier.

Disposable Protective Clothing

TYVEK 400

Fabric is comfortable and lightweight while providing puncture- and tear-resistant protection in wet or dry applications without restricting movement when stretching and bending. Offers inherent barrier to particles down to 1 micron even after abrasion. Coveralls meet OSHA requirements for asbestos and lead abatement.

TYVEK 400D

Fabric offers the high protection of Tyvek on the front of the garment, while the back is made from highly breathable DuPont ProShield fabric to increase breathability and help reduce heat stress. Thumb loops on sleeve ends and elastic waists help keep garments in place when donning gloves and performing strenuous activities. Excellent for use in demanding applications that have limited frontal exposure to hazardous particles and liquid splash. Both fabrics are low-linting with antistatic properties. White front and blue back.

Coveralls—Zipper-front coveralls with comfort fit design for greater range of movement.

Collared Shirts—Long-sleeve shirt with 4 plastic snaps and serged seams.

Pants—Feature elastic waistband and serged seams.

Collared Lab Coats—Feature 5-snap front with a storm flap, serged seams, and set-in sleeves that allow greater freedom of movement.

Pullover Hood—Elastic opening hood features serged seams and is shoulder-length to offer greater coverage.

Bib-Style Apron—Provides full front coverage and features bound neck with long ties and bound seams.

Sleeves—Feature serged seams.

Shoe/Boot Covers—Feature serged seams. Skid-resistant 6LY43 and 4LUR4 prevent slipping.

Tyvek 800 J Chemical-Resistant Protective Clothing

- CE Category III Type 3-B, 4-B, 5-B, and 6-B; require additional taping for liquid-tightness

Garments combine freedom of movement, durability, and protection. They resist pressurized jets of low-concentration, water-based inorganic chemicals. Proprietary fabric is designed to offer chemical, liquid, and oil protection in very humid applications. Elastic around the face and a self-adhesive chin flap help make a tight seal around a full-face respirator.

▶CHOOSE: Size	Color	Mfr. Model	Item No.	Pkg. Qty.

Chemical-Resistant Protective Coveralls

Provide puncture- and tear-resistant protection in wet or dry applications without restricting movement.

Tychem 2000—Provide protection from light chemical splash and biohazards. Made from polyethylene-coated DuPont Tyvek.

Tychem 4000—Provide protection against a wide range of chemicals. Made from DuPont Tyvek fabric with Saranex 23-P lamination construction.

Tychem 2000 SFR—Protects against a range of chemicals and also provides secondary flame resistance when worn over FR garments like those made with DuPont Nomex.

DUPONT®

Tychem 10000 Encapsulated Suits

- Taped Seam style
- Meet ASTM F1670, ASTM F1671

Level A Suits with Expanded Back—Feature vapor-tight seams for a higher level of skin protection and an expanded back that can accommodate a self-contained breathing apparatus (SCBA). These one-piece garments are worn with a breathing apparatus and come with integrated faceshields, hoods, and include socks and gloves or glove liners making them fully encapsulated for protection from dust, gases, and splashes.

Level A Suits with Expanded Back & Secondary Flame-Resistance—These suits have the same features as Level A Suits with Expanded Back and add flame-resistant clothing that is worn over a base layer of personal flame-resistant clothing (such as shirts and pants) when there is an intermittent or low risk of encountering fire. These garments are not a primary source of flame protection.

General Purpose Boots

General purpose rubber boots keep feet dry and protected from liquid splash, including water, oil, and chemicals. They are worn over socks when feet are in constant contact with water and chemicals where regular footwear would be damaged. They are generally taller than other footwear, allowing workers to tuck in pant legs and create a higher barrier between the liquid and legs.

Food Processing Boots

Food processing boots are worn over the sock to protect workers from hazards encountered in food production and processing settings, such as animal fat, food by-products, and cleaning chemicals. They are for use in the latter part of the food production process and are not for use around live animals.

Full Rubber-Dipped Neoprene

Neoprene is flexible and form-fitting for a snug, secure fit. The rubber coating on the entire outside surface up the boot is waterproof to keep feet dry.

Lightweight PVC

Made of lightweight air-injected material that is self-insulating to keep the wearer cool in hot environments and warm in cold environments.

Ankle Boots

Cover the foot to the ankle to protect the bottom, sides, and top of the foot.

Mid-Calf Boots

Cover the foot, ankle, and lower leg to the calf. Workers can tuck pants into the overboots to keep pants dry.

Knee-High Boots

Cover the foot, ankle, and lower leg to the just below the knee to protect workers where splash and water depth are above the ankle and calf. Workers can tuck pants into the overboots to keep pants dry.

Farming, Agriculture & Fishery Knee Boots

Farm, agriculture, and fishery boots are worn when workers are in continuous contact with animal fluids, barnyard waste, and waste from fish and fish processing. Farming and agriculture boots are worn where feet come into contact with farm animals and animal waste produced by livestock, chickens, pigs, and other animals. Fishery boots protect against fluids in marine-related activities near oceans and lakes, including fishing and shrimping.

Hazardous Materials Boots

Hazardous materials (hazmat) rubber boots are worn over-the-sock to protect feet from nerve agents and extremely harsh and caustic chemicals, such as those encountered when responding to hazmat emergencies or when working in chemical processing. They are tested to meet NFPA 1991 (Edition 2016) standards for vapor-protective ensembles for hazardous materials emergencies. Hazmat boots are generally worn with other protective equipment. PVC is highly chemical-resistant and dielectric. Steel toes protect the front of the foot from minor injuries caused by walking into obstacles.

Waders

Waterproof waders are worn over the sock and extend to the hips or chest to cover more of the body than knee boots, allowing wearers to stay dry when working in deep water. They are worn by water and wastewater workers, plumbers, and others who work in deep water. Rubber and PVC are chemical-resistant. PVC weighs less than rubber, reducing fatigue when waders are worn for long periods of time.

General Purpose Overboots & Overshoes

General purpose overboots and overshoes are waterproof to keep feet dry and provide some chemical resistance. They can be put on and taken off without removing existing footwear, making them convenient for intermittent use or use by individuals who require orthotics, who want to use their own footwear, or who have other special footwear considerations.

Overshoes

Slip over existing footwear to cover the foot to the ankle to protect the bottom, sides, and top of the foot.

Mid-Calf Overboots

Cover the foot, ankle, and lower leg to the calf. Workers can tuck pants into the overboots to keep pants dry.

Knee-High Overboots

Cover the foot, ankle, and lower leg to the just below the knee to protect workers where splash and water depth are above the ankle and calf. Workers can tuck pants into the overboots to keep pants dry.

PAWS Traction for Stripping Floors — SEYMOUR MIDWEST

Floor Stripping & Coating Overshoes

Floor stripping and coating overshoes are worn over existing footwear to protect floors and provide traction to reduce slips and falls. They are worn on slippery floors or when workers are removing an existing or adding a new floor finish. The surface covers the bottom of the foot and is nonmarring. **Traction overshoes** have a sole that is coated with a nonmarring abrasive grit to increase traction and protect floor surfaces. **Rigid-spiked overshoes** minimize contact with freshly applied coatings, allowing it to flow back into place after workers walk on it.

Men's 6" Safety Work Boots

- All available in sizes between 7-14

Rubber outsole is abrasion-, slip- and oil-resistant.

Note: All styles are available in medium width; for wide widths and additional sizes, go to grainger.com/footwear

Style 1064—Designed with lightweight, flexible cement construction, these boots feature a microfiber leather upper, a mesh lining with antimicrobial treatment, a removable open cell polyurethane insole, an EVA midsole, a rubber outsole, and a fiberglass shank.

Style 26063—Features shaped alloy safety toes for lightweight protection and fit. Cement construction provides flexibility and reduced break-in time. Molded polyurethane midsole for lightweight, durable cushioning. Contoured open-cell polyurethane footbed has temperature-regulating technology sock cover to keep your feet drier.

Style 47592—Premium full-grain leather upper for comfort and abrasion resistance. Breathable water-impermeable lining helps to keep feet dry in most types of wet conditions. Mesh lining has antimicrobial treatment for odor control.

Style 52562—Antifatigue technology includes a contoured footbed, an antimicrobial mesh liner, and roomy toe provide all-day comfort. Steel shank delivers structural support, and a puncture-resistant footplate provides flexible underfoot protection.

Style 85594—Leather work boot is designed with antifatigue technology for long hours in tough conditions. Features a contoured single-density open-cell polyurethane footbed with antimicrobial cover for breathability and odor control.

Men's 6" Safety Work Boots

- All available in sizes between 7-14

Nylon shank offers excellent structural support.

Note: All styles are available in medium and wide widths; for additional sizes and widths go to grainger.com/footwear

Style 04713—Steel-toe work boots feature resilient cushioning with lightweight, fatigue-fighting support. Additional features include a full-grain leather upper, a moisture-managing mesh lining, a removable, open cell, full cushion polyurethane footbed, a polyurethane midsole, and a rubber lug outsole.

Style 04714—Mesh-lined leather boots have a removable full-cushion footbed, and polyurethane midsole. The rubber lug outsole improves traction on wet and slippery surfaces.

Style 10112—Waterproof work boots are designerd with innovative materials to create more comfort and flexibility without sacfificing safety. The heritage-look waterproof leather upper keeps feet dry, with lightweight construction, a protective composite toe, and a resilient, removable cushioned footbed.

Style 10304—Security-friendly boots feature a waterproof full-grain leather upper, EVA midsole with high-visibility reflective wrap, and rubber outsole.

Men's 6" Safety Work Boots

45J301

Rope Grabs, Lifelines, and Carabiners

- Meet ANSI standards

Rope Grabs—For vertical applications. 30HG85 hinged design allows quick placement anywhere along vertical lifeline connector. 45J304 and 45J303 can easily be threaded onto lifeline ropes with unbraided trailing ends.

Lifelines—Increase vertical mobility. Include double-locking snap hook and taped end.

Carabiners—Self-locking link between lifelines, lanyards, and an anchorage point. Constructed of zinc-plated alloy steel.

Description	Brand	Item No.

Anchorage Connectors

- Meet OSHA and ANSI standards

Pass-Thru Anchors—Smaller D-ring passes through larger D-ring to attach to structural member; can be passed through multiple times to adjust overhead height.

Roof Anchors—Permanent and reusable anchors are designed for fall protection during maintenance, repair, and construction on pitched and flat roofs.

Mounted D-Ring and D-Bolt Anchors—Provide economical fall protection anchorage for installation on structural steel members, in a variety of work environments. D-rings are zinc-plated, except 45J296 is stainless steel.

Concrete Anchors—Temporary, reusable anchors can be relocated repeatedly. Engineered for use in cured, existing concrete.

Beam Anchor and Toggle Anchor—Easy-to-install anchors can be relocated and reused.

Clamp-on Beam Anchor anchor is well-suited for fixed positions. Heavy-duty aluminum alloy construction.

Toggle Anchor can be mounted horizontally or vertically; toggle action secures it in place on the beam. Heavy-duty alloy steel construction.

FALLTECH Fall Protection. Precision Engineered.

Anchorage Connectors

- Tensile strength: 5000 lb., except 3600 lb. for 36MF79 and 36MF81

Pass-Thru Anchor—Great for I-beams and other rated structural members. A 3" wear pad provides cut and abrasion resistance.

Sling Anchors—Use with I-beams and other rated structural members. Forged alloy steel hardware.

36MW12 is an economical and lightweight anchor sling with heavy-duty polyester webbing. 19F358 and 36MW08 are excellent in harsh environments, with high-strength cable that provides superior cut/abrasion resistance.

Wire Hook Anchor—Squeeze-open anchor is easily installed. For use only in overhead applications.

Suspended Cable Anchor—Designed to provide a single-person fall arrest or restraint anchor point in surfaces such as steel decking, concrete, and grating. Anchoring plate is 6" x 6" x ¼".

Concrete Anchors—Web Anchor is made for pour-in-place concrete applications. Constructed to resist the abrasion common with rebar form work.

Rotating Bracket models are multiuse anchors featuring a reusable zinc-plated steel anchor plate with an integral 360° self-orienting D-ring.

Adjustable Rotating SRD Anchor—Fall arrest/restraint anchor with 360° rotation mounts to wood or metal roofs or steel decking to extend the capability of personal cable self-retracting devices (SRDs, sold separately). Connection D-ring allows attachment of horizontal or vertical lifeline systems.

Beam Anchors—For use on overhead I-beams.

36MF78 has nylon slider pads and ratcheting design with thumb latches. 19F359 has dual aluminum locknut jaws, center D-ring, and aluminum hex bar. Tool-less installation. 36MW10 features heavy-duty steel frame and wheels for temporary or permanent installation on closed-end horizontal beams.

Parapet Wall and Window/Door Jamb Anchors— Connectors install without fasteners to provide temporary anchorage.

Parapet Wall Anchor is for use on 9" and higher parapet walls, ½" to 15" thick. Window/Door Jamb Anchor adjusts to 21" to 51" openings to provide fall arrest/restraint anchorage.

Full-Body Harnesses

Condor

- Meet ANSI standards
- Capacity: 425 lb.

Designed for construction and industrial environments, featuring load-impact indicators and lanyard keepers. Constructed of high-strength polyester webbing and alloy steel hardware. Fully adjustable fit with subpelvic strap.

Cross-Over harnesses' triangle shape and tangle-free design helps make donning fast and easy. They have front D-rings for climbing and side D-rings for work positioning applications.

Standard and General Industry—Practical harnesses are designed and equipped to provide adjustability, fit, and value for a wide range of fall protection applications.

General Industry models are designed for the professional user, and offer durability and long life. Adjustments are fast and easy with the friction roller torso adjusters. Belted models feature padded waist support and include tool belt and shoulder pads.

Heavy-Duty models are particularly durable to meet the requirements of demanding professional users.

Premium Comfort Construction-Grade—Construction-grade harnesses have combined D-ring locations to suit multiple fall protection applications. Premium comfort features include a padded torso yoke for shoulders and back and a breathable air mesh shoulder yoke with integral nonslip dorsal D-ring adjustment.

Positioning and retrieval models are configured for job-specific fall protection without sacrificing full adjustability and durable service life. Friction roller torso adjusters and the padded yoke allow fast, easy adjustment and help keep harnesses tangle-free.

Accessories—D-Ring Extenders provide longer reach to ease connecting energy-absorbing lanyards and self-retracting lifelines. 30HG84 choke-loop design reduces weight on the dorsal D-ring.

45J297 attaches to most full-body harnesses and helps reduce stress on the body while suspended, waiting for rescue after a fall. Fully adjustable.

Protecta® Pro™ Full-Body Harnesses

PROTECTA

- Meet ANSI standards
- Tensile strength: 3600 lb.
- Capacity: 420 lb.

Comfortable X-design. The fixed D-ring helps reduce the need for readjustment throughout the workday. Lanyard keeper holds excess line to prevent tripping and entanglements. J6572 to J6574 are vest-style harnesses; great for general-purpose applications. J6553 and J6555 have an easy-link web adapter that allows easy attachment of personal self-retracting lifelines and keeps the D-ring available for lanyards, overhead self-retracting lanyards (SRLs), or rescue devices.

Arc-Rated Harness G2387

DBI SALA

ExoFit NEX™ Full-Body Harnesses

- Meet ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Designed and constructed for no-tangle donning and a comfortable secure fit. Soft and lightweight, yet durable, with built-in nonslip shoulder, hip, and leg padding. Breathable, moisture-wicking lining keeps wearer dry. 1-handed Revolver™ vertical torso buckles provide easy adjustment of shoulder straps. Duo-Lok™ quick-connect buckles adjust with memory fit feature and allow adjustments to lock in place. Molded protective shell components prevent abrasion and wear and tear in targeted areas. Repel technology webbing reduces attraction of mold and dirt. Integrated suspension trauma straps provide quick pressure relief after a fall. Molded break-away lanyard keeper easily accepts larger snap hooks.

Vest Style—Harness includes Tech-Lite™ aluminum back D-ring.

Construction—Include Tech-Lite™ aluminum back and side D-rings, tongue buckle legs, and integrated hip padding with belt and lumbar wear protection.

Wind Energy Climbing—Feature a radio and Lad-Saf® sleeve holster on the front and removable tool loops on the belt, enabling the wearer to carry equipment while climbing a tower. Include aluminum front, back, and side D-rings and integrated hip padding with belt and lumbar wear protection.

- Meet CSA and CE requirements

Arc-Rated 40 cal/cm² HRC 4—Nomex®/Kevlar® construction with flame-resistant and nonconductive properties. Include PVC-coated aluminum back D-ring and comfort padding.

- Meet ASTM F887-05 arc flash standard and CSA requirements

ExoFit STRATA™ Full-Body Harnesses

- Meet OSHA and ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Packed with safety technology, these full-body harnesses are not just among the safest on the market, but they're also designed to be among the most-comfortable and lightweight. The breathable PolarMesh™ back pad helps keep you cool, and the proprietary LIFTech™ Load Distribution System redistributes weight to help reduce forces on your shoulders by up to 85% compared to leading competitor harnesses. Additional features include Tech-Lite™ Aluminum Side and Dorsal D-Rings for security without extra weight, an EZ-Link™ Quick SRL Adapter for easy self-retracting line connecting and disconnecting. Tri-Lock Revolver™ Connectors store excess webbing to help provide an extra layer of security around your legs. With an impact indicator and integrated suspension trauma straps.

ExoFit™ Full-Body Harnesses

- Meet ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Lightweight, durable polyester web harness is X-shaped to wrap around the wearer's body. Designed for max. comfort, freedom of movement, and ease of use. Vest-style harness is easy to put on and has shape retention memory. 5-pt. adjustment provides a better fit. Breathable lining makes harness comfortable for all-day use. Quick-connect buckles are color coded and provide 1-handed operation.

ExoFit Vest Style—Built-in nonslip shoulder, hip, and leg padding stays in place. Soft edging provides enhanced comfort and mobility. Fixed back D-ring.

ExoFit Wind-Energy—Feature built-in back and leg padding, plus protective hip padding. Built-in lanyards hold tools and equipment so hands remain free. D-rings are PVC coated.

ExoFit Confined-Space—Shoulder D-rings allow use in confined-space entry/rescue applications.

ExoFit Construction—Has the same features as ExoFit, with hip pad and belt for use with tool pouches. Side D-rings for work positioning allow hands-free operation.

ExoFit Tower-Climbing—Front D-ring connects to permanent ladder safety systems. Removable seat sling provides suspension and added comfort.

ExoFit XP—Removable shoulder, back, and leg cushioned padding allows harness to be washed. 3-D mesh lining eliminates odor and mildew. Adjustable spring-loaded, stand-up back D-ring enables connections to be made without straining. Integral lanyard keeper holds excess line to prevent tripping and entanglements.

ExoFit XP Construction—Harnesses have the same features as ExoFit XP, plus a hip pad and belt with loops for use with tool pouches. Side D-rings for work positioning allow hands-free operation.

Trauma Strap—Allows suspended worker to stand up in harness to relieve pressure. Continuous loop design allows 1- or 2-ft. suspension. Attaches to most harnesses.

XP Harness F8469

XP Construction Harness G4579

Delta™ Full-Body Harnesses

- Meet ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Durable polyester webbed construction repels water and resists abrasion. Delta No-Tangle™ design holds the shape of the harness, making it easier to put on. Revolver™ torso adjusters provide fast, secure fit. Padded spring-loaded stand-up back D-ring provides extra comfort throughout the neck, shoulders, and back and allows for quick and easy connections.

Standard and Positioning Vest Style—Good for general purpose applications. Models with side D-rings are also for work positioning. 2UZJ2 and 2UZJ1 have belt loops for separate belt attachment.

Cross-Over—The triangular-shaped, tangle-free design simplifies speedy donning. Front D-rings are for climbing, and side D-rings are for positioning applications.

Construction—Shoulder and hip padding with belt allows use with tool pouches. Side D-rings for positioning.

High-Visibility Work Vest—Reflective orange vest has a built-in harness. Meets ANSI/ISEA Class 2.

Titan™ II Nonstretch Full-Body Harnesses

- ANSI Z359.11 compliant
- Tensile strength: 5000 lb.
- Capacity: 400 lb.

Durable non-stretch harnesses provide affordable lightweight fall protection for workers in the general construction, manufacturing, and oil and gas (refinery) industries, and similar fields. The harnesses feature easy vertical adjustability that stays in place, and a slip resistant back D-ring pad. Forward-positioned side D-rings help keep your tool bags in the right place for easy access, while Hi-Viz orange color webbing provides improved visibility for increased worksite safety. J5478 features lighter, strategically-placed padding for optimal airflow while working at heights and a removable tool belt that stays in position when disconnected, even when tools are attached.

DuraFlex® Full-Body Harnesses

- Meet ANSI and CSA standards
- Tensile strength: 6000 lb.
- Capacity: 400 lb.
- Universal size (L/XL)

Synthetic elastomer webbed harness stretches to provide maximum comfort and mobility and conforms to shape of user. Pull-free lanyard ring allows lanyard to be attached when not in use. Stand-up D-ring allows simple attachment.

DuraFlex®— Solid color leg webbing straps. 3ZL79 and 3ZL73 have loops for optional tool belt attachment.

DuraFlex Ultra®— Same features as the DuraFlex harness with comfort-touch back D-ring pad with breathable fabric webbing.

DuraFlex Python®— Lightweight harnesses feature cushioned tubular webbing for shoulders. Stretchable DuraFlex webbing in the lower torso offers greater worker mobility.

DuraFlex Python Ultra®— Same features as the DuraFlex Python with comfort-touch D-ring pad with breathable fabric webbing and contoured edges for added comfort. 4GE88 includes body belt.

AirCore™ Full-Body Harnesses

Standard Harness H3503

- Meet ANSI and CSA standards
- Tensile strength: 5000 lb.
- Weight capacity: 400 lb.

Lightweight construction helps reduce fatigue for increased productivity. Comfortable, stylish design encourages compliance.

Contoured padding is strategically placed at lumbar, neck, and inner thighs. Proprietary, breathable open-core pad construction reduces heat and moisture to help keep the wearer cool and comfortable. Lumbar pad is replaceable on select models.

DuraFlex® stretchable webbing improves mobility. Low-profile cam buckles allow fast, easy, simultaneous shoulder web adjustment.

The front D-ring extends performance and comfort for climbing, confined space, and rescue operations.

Models with aluminum hardware are 20% lighter than steel models and corrosion-resistant for longer service life and reduced replacement costs.

Certain models feature a removable belt with leather guide that is functional and comfortable.

Leather bos'n chair with select models provides an adjustable, rigid work seat; also available separately.

Tower Climbing Harnesses—Engineered for comfort and easy adjustability on cell phone, TV, radio, and utility towers.

Wind Energy Harnesses—Customized, lightweight design helps keep workers safe and comfortable for reduced fatigue and all-day endurance while building and servicing wind turbines. The replaceable lumbar pad features nonmarring materials to protect the harness and the wall of the turbine from damage.

Oil and Gas Harness—Designed as an all-day harness for everyday tasks on drilling or service rigs and in the oil fields and various harsh environments. 18" extended back D-ring is an easy-to-reach attachment point for multiple uses, leaving the stand-up back D-ring as another connection point. Enhanced lumbar padding and expanded front waist padding provide increased comfort and support. Choose a seat sling or bos'n chair for added support and reduced wearer fatigue.

Honeywell MILLER

Miller Revolution™ Full-Body Harnesses

- Meet ANSI, and CSA standards
- Tensile strength: 6000 lb.
- Capacity: 400 lb.

Durable harnesses have flexible, 2-sided polyester webbing with contrasting color. Shape retention memory and independent upper- and lower-torso adjustments make them comfortable enough to wear all day. Web finials' clip-on design organizes webbing after proper adjustment. Highly visible encapsulated pack protects label. Stand-up D-ring allows easy attachment. Back shield conforms to most body shapes, keeps back D-ring in proper position, and minimizes impact from snap hooks and self-retracting lifelines. Cam buckle permits 1-handed adjustment or release simultaneous with shoulder strap (except 2KUC2 has friction buckle shoulder straps). PivotLink™ Connection rotary design allows harnesses to move with the body. Provides attachment point for belts, tools, and accessories. Fall indicators take the guesswork out of when to take harnesses out of service. Flexible belt pads on 5PA95 to 5PA98 minimize absorption and maintain optimal air circulation during positioning.

Revolution™ Construction—Designed to meet the durability requirements for construction applications while providing all-day comfort. Feature back and shoulder padding and modular accessory attachment system.

Revolution™ Arc-Rated—Insulated against electrical shock, with fire-retardant Kevlar® webbing and leather under all hardware. 1XEN8 and 3PRU1 have front rescue loops. 3PRU1 has pad and removable belt. For more Arc-Rated products, see page 1725.

Revolution™ Vinyl-Coated—Ideal for dirty environments such as petrochemical and water treatment plants. Resists physical deterioration resulting from exposure to a variety of liquids and maintains overall performance level.

Relief Step™ Safety Device—Allows suspended worker to stand up in harness to enhance blood circulation and prevent suspension trauma after a fall. Small, lightweight unit attaches to any full-body harness.

Body Belt

Condor

Belt can be used for personal restraint applications that do not require fall arrest, or pair with a nonbelted full-body harness for work positioning applications. Polyester web with 4" reinforced waist pad, removable heavy-duty tongue-buckle belt, and 2 side D-rings.

▶CHOOSE: Fits Waist Size	Item No.
S, M, L, XL	**H7937**

Body Belts

Honeywell MILLER

Polyester web belts have a tongue buckle and provide users with positioning alternatives when fall arrest is not required.

Personal Fall Limiters and Cab-Mount Bracket

- Meet ANSI and CSA standards

PERSONAL FALL LIMITERS (PFLs)

Self-retracting lanyards with polyester webbing and quick-activating brake systems eliminate the need for extended fall distance clearance. 6-ft. working length is suitable for most applications; 9-ft. length is great for scaffolding and order picker applications; 11-ft. length offers maximum mobility.

Harness connectors have 3600-lb. gate strength unless noted as 5K (5000 lb.). Connectors are made of steel unless noted as aluminum.

MiniLite®—Lightweight stainless steel interior components with high-impact thermoplastic housing.

Scorpion™—Can be attached directly to the harness D-ring for use as a personal fall limiter or as a traditional lifeline.

Turbo T-BAK™ Retractable Tie-Back—All-in-1 design with anchorage connector reduces the amount of equipment required on a jobsite.

TurboLite™—Impact-resistant nylon housing is compact and lightweight. Unit attaches directly to harness back D-ring for increased mobility.

Twin Turbo™ Systems—Allow 2 TurboLite or Turbo T-BAK tie-back retractable PFLs to be connected to a single harness for 100% tie-off fall protection. Systems with D-ring connector easily attach to noncoated metallic back D-rings. Systems with lightweight G2 connector attach to harness webbing below the D-ring, leaving it open for other equipment. G2 Connector Kit and components are available separately. 49U980 includes 1 each of 49U981, 49U982, and 49U983.

Compact SRLs— Lightweight, rugged devices are offered in 6-, 9-, and 10-ft. lengths with a choice of leg-end connectors in steel or aluminum. 6-ft. models feature external energy absorbers in one- and two-leg versions. 9- and 10-ft. models feature internal inertial brake system.

Contractor SRLs— Feature swivel-action load-indicating carabiner for back D-ring connection and an integral carriage/attachment handle. Heavyweight 425-lb. models meet OSHA 1926.502.

Contractor SRL LE (Leading Edge)— Designed to reduce the risk of cable failure when contacting an edge during a fall event.

Self-Retracting Lifelines

Honeywell
Miller

- Meet ANSI and CSA standards

Quick-activating braking system stops free falls, providing a safe and quick rescue. Steel connectors with 3600-lb. gate strength. No annual factory recertification required.

Black Rhino™—Small, lightweight housing holds corrosion-resistant stainless steel and aluminum components. Withstands harsh environments.

MightyLite™—Durable, corrosion-resistant stainless steel and aluminum housing. Install overhead; great for hard-to-mount locations.

MightyLite™ LE—Arrestors feature integrated shock-absorbing packs designed for leading edge (LE) applications. Rated for up to a 310-lb. user in LE applications and up to a 400-lb. user when mounted overhead. Models with Kevlar® packs are for use in LE welding applications.

Falcon™—Ultra-durable units have impact-resistant nylon housing with stainless steel and aluminum components.

DuraSeal™—All units come with a cable sling with carabiner (not shown). The cable sling can be used as the primary anchorage connector for carabiner mounted units. It can also be used as a secondary anchorage that can be attached to the handle of the unit.

Falcon™ Edge—Up to 30% lighter than similar models to help ease installation and reduce worker fatigue. 420H88 to 420H90 have an integrated shock absorber with a flame retardant cover that resists weld splatter in welding applications.

Self-Retracting Lifelines

NANO-LOK™

- Meet ANSI standards, except Tie-Back

Standard—Light, compact units feature an impact-resistant housing with swiveling anchorage loop and automatic quick-activating arrestor.

45WA80 is designed for welding, grinding, and other high-heat applications. It has flame-resistant Kevlar®/Nomex® fiber webbing and is arc rated APTV 8 cal./cm².

Tie-Back—Units incorporate a 36" tie-back leg, to eliminate the need for a separate anchor connector, tie-off adapter, or scaffold choker. UV-resistant nylon housing.

LE (Leading Edge)—Designed for safety and comfort in foot-level tie-off and sharp-edge applications. Weight-dispersing energy absorber and 360°-rotating connector attach directly to harness, leaving the D-ring open. 2-leg SRLs provide 100% tie-off.

Connectors—Use to secure a Nano-Lok SRL directly to a full-body harness webbing, leaving the back D-ring available.

TALON™

- Meet ANSI and CSA standards (except No. DBI3102100 does not meet ANSI)

Standard—Compact design with quick-connect handle for direct attachment to anchorage or harness.

Tie-Back—Eliminate the need for a separate anchorage connector. Built-in lanyard keepers and hook-and-loop attachment fit most harnesses.

Cab Mount Bracket—Connects directly to the cab for convenient anchorage point.

ULTRA-LOK®

- Meet ANSI standards

Corrosion-resistant stainless steel components with durable polyurethane housing. Antiratcheting, twin disc brake system limits arresting forces.

ULTRA-LOK® RSQ

- Meet ANSI standards

Provide fall arrest with assisted rescue capabilities and automatic self rescue. Constructed of reinforced plastic and include built-in carrying handle.

SEALED-BLOK™

- Meet ANSI and CSA standards

Fully sealed design protects working components, enhances safety, and extends working life.

Polyester Web Shock-Absorbing Lanyards

- Meet ANSI standards, except Heavy User Internal Shock Absorber models

For use as the connecting deceleration element of a personal fall-arrest system.

Standard Internal Shock Absorber—Feature a continuous-length, internal energy-absorbing material jacketed with a durable tubular web. Include impact indicator.

Heavy User Internal Shock Absorber—Additional internal energy-absorbing material limits fall arrest forces experienced by users between 310 and 400 lb. (including tools and equipment).

Tie-Back—Pack-style shock absorber has tie-back D-ring.

Elastic—Expand and contract with wearer's movements to reduce potential entanglements and tripping hazards.

Choker Loop—Provide lightweight, secure attachment to the harness D-ring.

Shock-Absorbing Lanyards

- Meet ANSI standards
- Weight capacity: 310 lb.

Shock-absorbing woven inner core smoothly expands to reduce fall forces. Snap hooks have ¾" gate opening; rebar hooks have 2½" gate opening.

SofStop®—Include back-up safety strap. Vinyl coating on select items prevents absorption of liquids.

Manyard HP™—Tubular outer jacket serves as a back-up lanyard.

Manyard® II—Stretch from 4 to 6 ft. to reduce tripping, snagging, or dragging. Integral red core for easy visual inspection.

BackBiter® Tie-Back—Eliminate the need for a separate anchorage connector. Anchorage snap hook gate load capacity is 5000 lb. from any angle.

StretchStop®—Include SofStop® shock-absorber pack with back-up safety strap. Stretch from 4 to 6 ft. to minimize tripping, snagging, and dragging.

Shock-Absorbing Lanyards

- Meet ANSI standards

EZ-Stop™—Lightweight and compact modular design reduces the overall cost of ownership by allowing individual components to be purchased and replaced separately as needed.

EZ-Stop™ Tie-Back 46W446 and 46W447—Single-leg tie-back web has a snap hook at one end and tie-back hook at the other.

EZ-Stop™ Retrax™—Adjustable spring technology retracts lanyard automatically to fit the working area.

EZ-Stop™ III—Tubular webbing integrates the shock-absorbing core. Stretches instead of tearing when subjected to fall-arrest forces.

ShockWave2™—Expand and contract to user's movements to minimize tripping and entanglements.

ShockWave2™ Tie-Back 425Y89—Include the same features as the ShockWave2 with the added versatility of a tie-back to eliminate the need for a separate anchorage connector.

Portable Guardrail System

Helps eliminate fall hazards by preventing personnel from falling to lower levels. Free-standing system doesn't require surface attachment so you can create custom configurations for floor or wall openings, hatchways, manholes, shafts, or truck docks. The simple set-screw design allows easy installation. The durable finish helps resist corrosion for long life.

Guardrail Roof Kit—Includes the items you need to create a free-standing safety barrier.

Guardrail Gate—Compact gate is adjustable from 23" to 38"L.

Guardrails—Require Guardrail Base Assembly 5KCX6, sold separately.

Guardrail Base Assembly—Rubber pad on bottom helps provide skid resistance and protects surfaces from damage.

Description	Mfr. Model	Item No.

DuraHoist™ Confined-Space Equipment

- Meets OSHA, ANSI, and CSA standards

Portable Fall-Arrest Anchor Post—Provides 3 independent swiveling connection points for anchoring fall-arrest devices. Telescoping design collapses to 33" for transport and storage. Powder-coated finish.

1-Pc. Adjustable Mast—Quick-release pin allows easy collapsibility. 12" to 29" offset.

2-Pc. Adjustable Upper Mast—Provides extra operating reach when needed and allows components to be used in various configurations.

Adjustable Offset Upper Mast and Lower Mast Extension—Provide flexibility to extend height from 41" to 146" when used with 1XEP7. 2KTD1 adjusts from 12" to 29".

3-Pc. Portable Base 5RPT8—Features adjustable screws and a built-in level indicator to help assure level setup on uneven surfaces. Use with 5RPT7.

3-Pc. Portable Base 1XEP7—Adjustable screws and built-in level indicator for easy setup on uneven surfaces. Max 29" offset. Use with 1XEP6 and 2KTD1.

Floor-Mount Sleeve—Use with 1XEP6 or 2KTD1 for horizontal concrete or steel structures.

Bracket Assembly—Mounts winch to Adjustable Masts 1XEP6 or 2KTD1.

Vehicle Hitch-Mount Sleeve—Easily installs on 2" hitch to provide a portable anchor connection for Adjustable Masts 1XEP6 or 2KTD1.

Confined-Space Rescue Equipment

FALLTECH Fall Protection. Precision Engineered. | Condor

- Meets ANSI Z359.4 standard (except 35KU76)

Complete Confined-Space Rescue Systems—Prepacked systems with tripod are easy to transport and quickly deployed. Each device includes a storage bag. 310 lb. workload cap.

Tripod—Features 2 head-mount pulleys, nonskid foot pads, and 2-stage collapsible leg adjustment for secure, quick setup. With storage bag. 310 lb. workload cap.

Hoist—Personnel-rated. 310 lb. workload cap.

Rescue Self-Retracting Device (SRD)—3-way recovery device offers dual-mode SRL-R operation as a recovery winch and self-retracting lifeline. It includes a swivel carabiner and storage bag. 310 lb. workload cap.

Retrieval Yoke—Attaches securely to shoulder D-rings on confined-space retrieval harnesses. Spanner bar keeps yoke legs separated for unencumbered egress. Adjustable to wearer shoulder width.

- Meets ANSI Z359.1-2007

Manhole Equipment

Manhole Cover Hooks—Made of 5/8" forged hexagonal steel for the strength to lever up heavy covers. Choose straight or right-angle handle.

- 300-lb. capacity

Manhole Lid Lifter—All-steel construction. Includes rubber grip for handle and foot. Recessable hook.

Magnetic Manhole Lid Lifters with Dolly—2-position lifting points help one person break loose the most stubborn covers—up to 36" dia.—safely and with minimal back strain. Lifters collapse for easy transport and storage.

Manhole Guardrail—Collapsible. Steel frame construction. Includes heavy-duty safety chains.

Guardrail Winch—Mounts easily; 300-lb. cap. Side pieces are aluminum, and winch bar is steel tubing with a 3" drum. Includes 2 independent ratchet systems and automatic brake.

Umbrella and Umbrella Stand—Heavy-duty, waterproof vinyl umbrella is safety yellow color for visibility. Easy stowage in the included bag. Sturdy 2-pc. metal pole can be pushed into the ground, strapped to a manhole guard rail, or used with 11C537 metal stand; tilts for convenient placement.

Tent Heater—Steel housing with enclosed heating elements and a sealed motor. Raises the temperature 50°F. UL Listed; CSA Certified.

Confined-Space Fans, Blowers, and Accessories

PLASTIC AXIAL FANS

Nonhazardous location, standard 115VAC and 12VDC models are portable outlet fans constructed of orange polyethylene and are available with removable canister ducting. Hazardous location, explosionproof models are constructed of black conductive polyethylene to prevent static buildup and are available with conductive ducting. UL Listed, CSA Certified.

STEEL AXIAL FANS

Standard 115VAC fan 4YG70 runs at 72dBA at 1m for extra-quiet operation. 4YG66 and 4YG68 are 1-pc. axial fans with attached polyethylene duct canister. 12VDC fan 4YG69 includes power cord with battery clips. UL Listed, CSA Certified.

STEEL AXIAL IN-LINE FANS

Fans can be installed in series for running long lengths of ducting. Include 8" or 10" duct adapters on each end of the fan. UL Listed, CSA Certified.

CENTRIFUGAL BLOWERS

All except 5FYA1 are mounted on a lightweight tubular steel, dual-handle frame. Polyethylene housing with 8" inlet and outlet flange. UL Listed, CSA Certified.

115V—Models have gray housing, aluminum nonsparking blower wheel, and include GFCI power cord, except Explosionproof Blower 5FXZ8 has a black conductive housing and a grounding lug to remove static electricity.

Gasoline with Briggs & Stratton Engine—Includes a 5-ft. remote steel exhaust hose to keep CO away from blower's intake. Meets Cal/OSHA emission standard.

Pneumatic—Uses a compressed air source with a flow capacity of 10 to 100 cfm and a pressure range of 10 to 100 psi. Includes coalescing filter, regulator, and moisture separator/lubricator. Static grounding lug installed for intrinsic safety.

DUCTING

Retractable, wire-reinforced design with cuffs on both sides. Conductive ducts include 18" ground wire on each end.

SADDLE VENT VENTILATION ACCESSORY KITS

Include Saddle Vent with universal mount and 90° elbow, one 6-ft and 15-ft. length of 8"-dia. ducting, and duct storage canister.

SADDLE VENTS

Vents fit manhole openings 20" and larger. 3WE69 removes static buildup in hazardous ventilation environments.

CONFINED-SPACE ACCESSORIES

Individual components to help you design a system to address your specific needs.

Confined-Space Fans, Blowers, and Accessories

Designed for positive and negative ventilation.

Plastic Axial Fans—Lightweight and quiet. Constructed of durable polyethylene with a built-in handle. Fans that include a canister assembly attach to the intake or exhaust side of a blower. Fans with explosionproof motors meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. Fans with DC motor include power cord with battery clips.

Steel Axial Fans—Steel construction with handle for easy transport. 4UDK1, 3PAK4, and 3PAK5 meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. 32MZ58 meets Class I, Div. I and II, Groups B, C, & D and Class II, Div. I and II, Groups F & G.

Steel Axial Fan Air Bags—All-in-one portable axial fan system built into a heavy-duty polyester bag. Zippered ends allow blower to be used without removing unit from the bag.

Plastic Centrifugal Blowers—Polyethylene construction with a built-in handle and 8" flange on intake and exhaust ports. 5GVU5 and 5GVU6 are UL Recognized, CSA Certified.

Ducting—Retractable with wire-reinforced design. Cuffs on both sides ease attachment. Conductive ducting prevents static buildup in hazardous locations.

Manhole Ventilation Systems—Low-profile manhole air vent, 90° elbow, and built-in mounting all in 1 unit. Include collapsible duct for easy entry, stored in a small storage bag. Ducting is vinyl and polyester with PVC coating. Systems are compact, lightweight, and not statically conductive. Made from linear low-density polyethylene.

Confined-Space Accessories—Individual components to help design a system to address specific needs.

iNet Gas Detection Service

iNet helps you manage your portable gas detection program while having access to the tools and reports that show how your equipment is being used and what it's detecting.

You'll get:

- Expert help when you need it
- A safer workplace
- Cost savings

To find out more about how the iNet Gas Detection Service works and how to get started, go to **grainger.com/iNetService**

Ventis Pro5 with Integral Sampling Pump
53DH07

INDUSTRIAL SCIENTIFIC

Ventis Pro Series Multi-Gas Detectors

- 95dB audible, visual, and vibrating alarms
- "Man down" alarm and dedicated panic button
- IP68 rated protection against dust and water damage
- iNet and DSX Docking Station compatible

Highly adaptable devices not only monitor multiple gases at once, but also feature streamlined messaging capabilities to help users respond effectively to hazards. The rugged polycarbonate housing with protective rubber overmold has reinforced high-contact areas to help prevent wear from friction, plus a raised plastic rail to help protect sensors when the instrument is face-down.

Flexible interface with customizable text can keep onscreen messaging as simple as "EVACUATE" or "VENTILATE," to help reduce nuisance alarms and false evacuations. The backlit liquid crystal display can also show full-screen alarms that let users identify the source and type of hazard in emergencies.

LENS Wireless technology lets team members receive readings and alarms from peers' monitors for quick man-down, panic, or gas hazard response.

iAssign tagging lets you track user exposure and site measurement data, even when different Ventis Pro Series gas monitors are used from day to day.

The monitors can be used for personal protection, or order with pump for confined-space applications. Sensor options include flexible slot positions to adapt to a range of applications.

Note: Ventis Pro series use the same DSX Docking Stations and accessories as the Ventis MX4 Multi-Gas Detectors; find them on page 1801.

52HN76

Radius BZ1 Area Monitors with LENS Wireless

INDUSTRIAL SCIENTIFIC

- 108dB audible and gas/non-gas visual alarms
- Multiple sensor options, including PID, to detect up to 7 gases
- iNet and DSX Docking Station compatible

Worksite gas hazard monitors are engineered for long-lasting, easy-to-operate detection and protection. The modular design allows for smaller instrument inventories and enhanced uptime in the field. Text-based configuration and navigation simplifies setup and use.

Radius BZ1 Area Monitors—Preconfigured LENS Wireless networking connects devices at turn-on, for instant gas readings that can help your team react quickly to emergencies.

- Include SafeCore Module with DualSense Technology

SafeCore Modules and Radius BZ1 Base—Proprietary, interchangeable SafeCore Modules house critical tech including sensors, software, wireless, and pumps (on select models). Smart sensors are positioned face-down in the modules to help reduce false alarms from weather conditions.

Modules fit into the durable, weather-resistant Radius Base, which has built-in audio and visual alarms designed to capture attention even in high-noise environments. Swap out modules to switch sensor setups or change from a nonpumped module to a pumped one for confined-space sampling. The large display shows customizable alarm messages such as "EVACUATE" or "VENTILATE."

DualSense Technology employs 2 sensors to detect the same gas, to help increase worker safety.

DSX Docking Stations—Designed to dock a SafeCore Module for data downloads, bump tests, calibration, and settings changes.

V-Cal Calibration Station
6UAV4

INDUSTRIAL SCIENTIFIC

Ventis MX4 Multi-Gas Detectors

- 95dB audible, bright LED and vibrating alarms
- DSX Docking Station and iNet compatible
- Backlit LCD

True portability with multi-gas detection in single-gas size. Configured for non-pump applications or with an integral pump for sample draw applications. Available with a tough, safety orange overmold for visibility of the instrument in dark environments. Detectors with diffusion include calibration cup. Detectors with pump include calibration tubing and sample tubing. All detectors include desktop charger and rechargeable batteries.

DSX Docking Stations—Maintenance stations provide easy gas detector bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected 44ZC35 offers automatic schedule tracking with email alerts and notifications about worker exposure and instrument use and service needs.

Standalone 44ZC37 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

V-Cal Calibration Stations—Allow for quick and easy calibration or function (bump) testing of the monitor. Stand-alone operation; PC not required.

INDUSTRIAL SCIENTIFIC

iBrid MX6 Multi-Gas Detectors and Confined-Space Kits

- 95dB audible alarm
- DSX Docking Station and iNet compatible

Readings are shown on a high-visibility full-graphic LCD. Feature 5-way navigation button and concussionproof overmold housing. Each includes calibration cup with tubing, belt clip, carrying case, and desktop charger.

Confined-Space Kit—Contains detector, sampling pump with 10 ft. of tubing, Li-ion 36-hr. battery, single unit charger, spare alkaline battery pack, calibration cup with tubing, calibration gas and regulator, and carrying case.

DSX Docking Stations—Gas detector maintenance stations provide easy bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected 44ZC38 can automatically track bump test and calibration schedules, and send email alerts and notifications about worker exposure and instrument use and service needs.

Standalone 44ZC42 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

Tango TX1 Single Gas Detectors

INDUSTRIAL SCIENTIFIC

- 100dB audible, visual, and vibrating alarms
- IP66/67 ingress protection
- DSX Docking Station and iNet compatible

Detectors can be ordered as a carbon monoxide, hydrogen sulfide, sulfur dioxide, or nitrogen dioxide instrument. DualSense technology includes 2 of the same sensor for the detection of a single gas through a proprietary algorithm and displayed as a single reading to the user. Feature segment liquid crystal display and 2 button keypad. Top of case is designed with polycarbonate with a rubber overmold and the bottom is conductive polycarbonate. Replaceable lithium nonrechargeable battery provides 3-yr. run time.

DSX Docking Stations—Maintenance stations provide easy bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected 44ZC48 offers automatic schedule tracking with email alerts and notifications about worker exposure and instrument use and service needs.

Standalone 44ZC43 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

GasBadge Pro Single Gas Detectors

INDUSTRIAL SCIENTIFIC

- 95dB audible, visual, and vibrating alarms
- IP66/67 rating for water and dust ingress
- DSX Docking Station and iNet compatible

Feature continuous event logging record of past 15 alarm events. Reusable unit with interchangeable sensors. Minimum 1-yr. data logging capacity. Lithium battery lasts 2600 hr.

GasBadge Datalink—Connects via a graphic software package and USB PC connection. Allows download and viewing of alarm events.

DSX Docking Stations—Maintenance stations provide easy bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected 44ZC46 offers automatic schedule tracking with email alerts and notifications about worker exposure and instrument use and service needs.

Standalone 44ZC32 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

Altair 2X and Altair 2XP Single Gas Detectors

- 95dB audible, visual, and vibrating alarms
- IP67 rating for dust and water ingress

The superior performance and long service life of XCell sensor technology in a rugged rubberized armor housing offer enhanced wearer safety, compliance, and traceability, as well as drastically reduced total cost of ownership.

Altair 2X—Speedy sensor response and recovery reduce gas consumption for calibration and gas bump tests.

Altair 2XP—XCell Pulse technology and simple flow check deliver a daily stand-alone bump test without specific calibration gas or accessories.

Dräger

X-am 5600 Multi-Gas Detectors

6-gas capacity detectors are offered in dual and single sensor configurations, with specified gas sensors. Fast, durable infrared sensors last up to 8 yr., and need calibration only every 12 mo. Select units have an IR-Ex sensor that eliminates the need for catalytic Ex sensors.

Note: Replacement sensors and accessories are available on Grainger.com; search for "draeger replacement sensors" or "draeger gas detector accessories."

Detectors—Small, robust instruments with simple 2-button control detect and log oxygen and explosive, combustible, and toxic gases and vapors. Large LCD shows all readings and can display peaks, STELs, and TWAs.

An excellent personal monitor, it can be combined with an X-zone 5500 (sold separately, this page) to monitor entire areas.

- Visual alarm
- Suitable for use in Ex zone 0 explosive atmospheres
- X-zone 5000 series compatible

Accessories—Time-saving Bump Test Station, with pressure gauge and regulator, is for use with X-am 5600 and X-am 5000 detectors. Remote Sampling Pump reaches up to 66 ft. Includes locking dust/water stop filter, shoulder strap, and batteries.

X-zone 5500 Wireless Gas Monitor

21EP34

- Visual and audible (adjustable volume) alarms
- Suitable for use in Ex zone 0 explosive atmospheres

Stand-alone, easily transported monitor helps provide a safe environment in hazardous areas. Control and sensing are provided by an X-am 5600 or X-am 5000 detector, with appropriate sensors (sold separately, this page). Multiple units can be employed to define a wireless extended monitoring fence line. Includes diffusion cap, pump, and battery.

Pac 7000 Single Gas Detectors

36D918

Miniature XXS sensors offer fast reaction times and 5- to 6-yr. expected service life. Impact-resistant housing helps protect against corrosive chemicals and radio interference. Battery life is 2880 hr. for O_2, 5760 hr. for H_2S and CO. Detector life is unlimited. Offered in select configurations.

Note: Replacement sensors and accessories are available on Grainger.com; search for "draeger replacement sensors" or "draeger gas detector accessories."

Detectors—Small, robust personal monitors have user-friendly features including a large LCD with backlight and 1-handed operation, even when wearing gloves. Adjustable intervals for tests and calibration, reminders, and "out of order" message if overdue or failed. 120-hr. data logger has date and time stamp.

- Visual, audible, and vibrating alarms
- Adjustable TWA and STEL alarms
- IP68 dust and water ingress protection

Accessories—Bump Test Station quickly checks instruments and sensors, and provides automatic calibration in case of unsuccessful tests.

X-am 5000 and 2500 Multi-Gas Detectors

36F324

Extended-life monitors can be used with multiple sensors to monitor explosion hazards.

Note: Replacement sensors and accessories are available on Grainger.com; search for "draeger replacement sensors" or "draeger gas detector accessories."

Detectors—Lightweight and easy-to-operate instruments show all readings at once on their large LCDs. They store peak values, which are easily reset.

- Visual alarm
- Suitable for use in explosion zone 0 areas
- IP67 water- and dust-resistant
- X-dock compatible (sold separately, available on Grainger.com)

Accessories—Time-saving Bump Test Station, with pressure gauge and regulator, is for use with X-am 5600 and X-am 5000 detectors. Remote Sampling Pump reaches up to 66 ft. Includes locking dust/water stop filter, shoulder strap, and batteries.

ANSI/ISEA Z308.1-2015 Standard for First Aid Kits

The new standard introduces two classes of first aid kits, Class A and Class B. The kits are further designated by type (I, II, III). Each type is intended to address the needs of the work environments where they are used.

Class A—Designed for the most common workplace injuries.

Class B—Designed to be equipped with supplies to deal with injuries encountered in more complex or high-risk environments.

Type I: Intended for use in stationary, indoor applications where kit contents have minimal potential for damage. These kits are not intended to be portable and should have a means for mounting in a fixed position.

Type II: Intended for portable use in indoor applications where the potential for damage to kit supplies due to environmental factors and rough handling is minimal.

Type III: Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage of kit supplies due to environment is not probable. These kits should have the means to be mounted in a fixed position and have a water-resistant seal.

Bulk and Unitized First Aid Kits

Kits contain first aid treatment for common injuries.

Bulk Kits—Nonunitized and contain larger quantities of supplies. Metal Cabinets 39N795, 39N789, and 39N821 include shelves.

Unitized Kits—Kits include packs that hold individually sealed dose units and are color-coded by application; blue for antiseptics, yellow for bandages, red for burn treatment, orange for personal protective equipment, and green for miscellaneous.

Construction Bulk and Unitized First Aid Kits

Kits are designed for contractors' most common injuries on the job.

Bulk—Nonunitized kit contains larger quantities of supplies.

Unitized—Kits include cartons that hold individually sealed dose units and are color-coded by application; blue for antiseptics, yellow for bandages, red for burn treatment, orange for personal protective equipment, and green for miscellaneous.

People Served Per Kit	No. of Components	H	W	D	Item No.

STEINER

Fire/First Aid Blanket

- Meets Federal Standard Title 16 CFR Part 1610 for flame-retardant use

Durable blanket can be used to smother flames, drape over injured victims, and cover stretchers and other rescue carriers. Fully serged hems. The blanket stores neatly in the highly visible fluorescent red, vinyl-coated nylon tote pouch. Tote is flame-retardant, weather-resistant, plus resists grease and most acids and chemicals.

ZOLL®

Automatic AEDs

Full-rescue AEDs provide Real CPR Help for rate and depth of chest compressions during CPR. Voice prompts and graphics guide rescuer through Chain of Survival, starting with checking responsiveness and ending with CPR compressions.

AED units with PlusTrac provide a third-party web-based service that ensures AED is properly maintained and has all necessary components. Acts as a resource for employees and ensures compliance with Good Samaritan laws. PlusTrac system includes medical direction with prescription, emergency response plan, dedicated account manager, AED registration/EMS notification, database setup, interactive AED management, e-minders and alert notifications, and interactive reporting console.

PlusTrac1 is a 1-yr. management program, and PlusTrac5 is a 5-yr. management program.

AED Plus Fully Automatic—Fully automatic devices provide audible prompt: "DON'T TOUCH PATIENT," and then begin analysis. Automatically delivers shock if needed. If "NO SHOCK REQUIRED," prompts rescuer to begin CPR.

AED Plus Semiautomatic—Semiautomatic AEDs require medical direction (included with every AED Plus unit). Unit includes 10 batteries and 1 set of CPR-D-padz. Pedi-padz II 1YNR9 (pediatric pads) are sold separately.

AED Pro Semiautomatic—Advanced functionality helps improve a patient's chance of survival. LCD displays ECG while using a 3-lead monitoring cable (4EGN9, sold separately). Manual override for extra flexibility. Real CPR Help feature helps user achieve optimum rate and depth of compression levels. See Thru CPR feature enables professionals to view a patient's underlying ECG rhythm. Batteries sold separately.

FirstVoice® PHYSIO CONTROL SUPPLIER DIVERSITY®

AED Packages

Keep automated external defibrillators (AEDs) available for victims of sudden cardiac arrest.

HeartSine samaritan PAD 350P/450P AEDs—Up to 56% smaller than other AEDs. User-friendly, visual and voice prompts guide rescuer through entire resuscitation process, including CPR. With just an On/Off button or SHOCK button, PAD (public access defibrillator) uses electrode technology. A low energy escalating waveform automatically adjusts for differences in patient impedance. IP56 rated to guard against dust and water. 6GJN2 offers semiautomatic shock delivery and includes cabinet. 6GJN3 transmits automatic shock after analyzing heart rhythm.

LIFEPAK 1000 AED—Designed for professional responders. Large, intuitive screen displays clear, easy-to-read graphics and ECG readings. cprMAX technology minimizes CPR interruptions by allowing compressions to continue during AED charging.

Lucas 3 Chest Compression System—Intended for use as an adjunct to manual CPR when effective manual CPR is not possible. Ideal during patient transport, or extended CPR when fatigue may affect the delivery of successful/consistent compressions, or when EMS personnel are unavailable to perform CPR. Unit delivers consistent, high-quality chest compressions.

Chest Coolers

These coolers are insulated to help keep food and drinks cool and protected. Marine Chest Coolers are built to withstand the rigors of freshwater and marine boating environments. They feature plastic construction to prevent corrosion.

COOLERS

Classic—Easy to carry. 4AAP6 has a push-button lock that allows one-handed opening and molded handles in the body. 4AAP7 includes a drain and a lid with cup holders, hatch, and swing-up handles.

Quick & Cool—Threaded drain plug for hose hookup. Dual-snap lock and childproof safety lid latches.

Polar—Ultratherm insulation in body and lid keeps ice frozen. Features reinforced swing-up handles, dual snap-fit latches, and threaded drain plug.

Marine Ultra—Ultratherm insulation in body and lid keeps ice frozen for days. Tie-down loop secures cooler to boat deck. Additional features include swing-up handles, a stain- and odor-resistant liner, and stainless steel corrosion-resistant screws.

15F160 also has a snap-fit latch to secure the lid closed and includes a fish measuring ruler on the lid.

316 Series—Have-A-Seat lid supports up to 250 lb and swing up side handles offer easy lifting. Stain-resistant liner and rust-resistant hardware.

Elite—Rugged coolers have 2" thick polyurethane insulation. Features freezer-grade gaskets, molded-in and press and pull latches, molded-in tie-downs, nonskid and nonmarking raised feet, and corrosion-resistant stainless steel hardware. Have a built-in bottle opener and cup holders. 29PL77, 29PL78 and 29PL80 also offer an integrated fish scale on the ld. Certified bear-resistant by the IGBC.

WHEELED COOLERS

Sunset Glide—Equipped with MaxCold Technology. Offers soft-ride wheels and a horizontal telescoping handle. Glide slide-and-lock horizontal handle technology provides better leverage and reduces the lifting load. Threaded drain plug allows for easy draining of melted ice and option for hose hook-up.

Trailmate—Offer all-terrain, smooth-ride wheels (with non-marking tread), telescoping handle, THERMECOOL insulation, bottle openers, and UV inhibitors.

Elite Wheeled—Heavy duty wheeled version of the Elite series coolers also offer a sloped drain and a tethered, threaded plug (garden hose attachable).

Hydration Packs

CAMELBAK

Each includes a low-profile Mil Spec Antidote reservoir with Quick Link exit port and QL HydroLock bite valve adapter.

HydroBak—Ergonomic, versatile, and economical hydration-only pack for everyday tasks. Features double-ripstop construction, a rear reservoir access flap, and a front zip pocket. Holds enough water for 1-2 hours of activity.

- Front and back panel are 300 Denier polyester fabric

ThermoBak 3L—Quick-release shoulder straps unclip for easy removal and storage inside back panel stash pocket. Double-ripstop construction, external fill to CRUX reservoir, and two-zipper fill cover. Hydration only.

- 500 Denier Cordura fabric

Stealth—Quick-release shoulder harnesses and a hook-and-loop panel for name tags and unit badge. Double-ripstop construction and CRUX reservoir with external fill. Hydration only.

- 500 Denier Cordura fabric

Hi-Viz—High visibility color for worker safety. Tearaway harness helps prevent accidents and convenient stow pocket holds keys and other essentials. External access CRUX Reservoir delivers 25% more water per sip. Hydration only.

BFM—Features low-profile Mountain MOLLE panel on front for secure attachment of accessory pouches. Double-ripstop construction. 4 zippers on main compartment allow for multiple access points to gear plus 7 exterior pockets. Offers multiple drink tube exit ports for routing tube over the shoulder or underan arm. The new Futura harness, which adjusts for individual torso length and plate carrier configurations, stays comfortable on even the longest of operations.

- 500 Denier Cordura fabric

ERGODYNE CHILL-ITS LOW-PROFILE

- 420 Denier nylon (1RY36 and 1RY39)
- 600 Denier water-resistant rip stop polyester (32NC04)

Hydration packs help keep workers hydrated. The insulated pack and tube keep water cool. Each pack includes a zip-up cover, plus the cover on the 100% antimicrobial bite valve keeps out debris and contaminants. Breakaway shoulder straps for extra security. 1RY36 and 32NC04 have 2-tone reflective chevrons for visibility at night.

Cooling Vests

HyperKewl Evaporative Vests—Up to 10 hr. evaporative cooling is activated with 1 to 2 min. in water; squeeze out excess. Front zip closure.

Vests for Inserts—100% cotton zip-front vest has 4 pockets for inserts (sold separately) and hook-and-loop shoulder and side straps to ensure a snug fit.

Feathered Ice Insert 5WYD5 has a pliable powder that conforms to your body when frozen. Phase Change Insert 5WYD6 freezes in refrigerator or ice water. Delivers a constant 58°F temp. up to 3 hr.

Evaporative Cotton Vests—Lightweight vest protects against excessive heat for up to 72 hr. Polymer fabric is activated by soaking in water for 5 to 9 min. Cotton shell has hook-and-loop closures.

Chill-Its Evaporative Nylon Vests—Nylon vests feature evaporative polymer-embedded fabric that activates when soaked in cold water for 2 to 5 min. Quilted nylon V-neck shell with zipper closure and water-repellent liner.

Dry vests can be filled with water for up to 3 days of cooling ability. V-neck with zip closure and mesh side panels to provide additional ventilation and stretch.

Phase Change Vests—Thermal-lined cotton vests zip closed to hold cooling inserts close to the wearer. Reusable inserts (included) are activated by ice water or in refrigerator and stay cold up to 3 hr. Zip-closed cooler bag included.

Vortex Vests—Allow adjustable or continuous cooling through perforated inner lining. Vortex tube forces heat exchange to separate compressed air into cold air streams.

Emergency Combination Drench Shower and Eye/Face Wash Stations

- Meet ANSI Z358.1-2014

Feature SpinTec showerheads that provide a more even spray pattern, stay-open ball valves, and identification and inspection tags.

Halo Models—Space-saving design provides maximum wash-down coverage and spray pattern. Designed with an ergonomic stainless steel push handle that can be reached from any direction. Integral strainer reduces debris and reduces clogging.

Classic Models—Include PVC push handles.

Barrier-Free Stations—Shower pull-handle and eyewash bowl extend to accommodate people with physical disabilities.

Halo Heat Trace Stations—Heat Trace cable protects units from freezing temperatures to -50°F. Include shower temperature control thermostat, freeze protection valve, and power indicator light.

Accessory—3-ply vinyl privacy curtain is mildew-resistant and measures 70"L x 145"W.

Emergency Combination Drench Shower and Eye/Face Wash Stations

- Meet ANSI Z358.1-2014

Units provide both drench shower and eye/face wash or eyewash. Innovative AXION MSR eye/face wash head uses an inverted directional laminar flow to wash contaminants away from the nasal cavity. Hydrodynamic showerhead design helps maintain equal distribution of water through the entire footprint of flow. Chrome-plated brass stay-open ball valve features stainless steel ball and stem. Self-adhesive high-visibility safety green and bright yellow stripes and a universal sign are included.

Heat Trace Station—Can operate down to -30°F. Features ¾" insulation, ABS jacket, thermostatically controlled 120VAC electric heat cable, and automatic thermal actuator to help prevent freezing. CSA Certified to ANSI Z358.1, Type 4 Electrical.

Emergency Combination Drench Shower and Eye/Face Wash Stations

Guardian

- Meet ANSI Z358.1-2014

Stations have combined drench shower and eye/face wash or eyewash and include a 10"-dia. showerhead with stay-open ball valve and stainless steel pull rod. Eye and eye/face washes have 11½"-dia. eyewash bowl and feature twin spray outlet heads, stay-open ball valve, and cast-aluminum flag-type handle. Spray heads have internal filter and dust cover. Include ANSI-Compliant identification sign and inspection tag.

Heat Trace Station—Prevent freezing down to -40°F. Thermostat activates when internal piping temperature falls below 75°F.

Barrier-Free Stations—Shower pull rod and eyewash bowl extend to facilitate use by people with physical disabilities. Meet ANSI 117.1.

Fire Extinguisher Information

UL FIRE CLASSIFICATIONS

Class A: Common combustibles (wood, paper, cloth, etc.)

Class B: Flammable liquids and gases (gasoline, propane, and solvents)

Class C: Live electrical equipment (computers, fax machines, etc.)

Class D: Combustible metal (magnesium, sodium, potassium, etc.)

Class K: Cooking media (cooking oils and fats)

UL EXTINGUISHER RATINGS

The number indicates the extinguisher's relative power against that class of fire. An extinguisher rated 2A is twice as powerful against common combustible fires as one rated 1A.

Classes C and D do not have a numerical rating.

Rechargeable Fire Extinguishers

BADGER

ADVANTAGE

Cylinders have aluminum valves, handles, and levers. 2-piece nameplates provide easy-to-read operating instructions. Aluminum models are ideal for marine environments.

STANDARD

Dry chemical fire extinguishers are effective on common fires in most commercial and industrial applications. Feature aluminum valves, handles, and levers, durable O-rings, and heavy-duty stem valves.

EXTRA

All Extra series extinguishers feature chrome-plated brass valves, and stainless steel handles, levers, and pull pins. Include heavy-duty hose and couplings and durable O-rings.

BRIGADE CARTRIDGE-OPERATED

Multipurpose extinguishers for Class A, B, and C fires. 360° swivel discharge nozzle can be easily used by both right- and left-handed users. UL Recognized.

Rechargeable Fire Extinguishers

- Meet DOT Requirements

Feature all-metal valves with steel or aluminum cylinders.

High Flow Dry Chemical— Designed to attack flowing liquid and pressurized gas fires. Capable of fast knockdown.

Carbon Dioxide— Residue-free agent for use on Class B and C hazards.

Halotron—Clean agent gas for Class B and C hazards. Halon replacement.

Wet Chemical—Required in commercial kitchens for cooking oil fires.

479W99

479W96

Aluminum Disposable Dry Chemical Fire Extinguishers

- Aluminum cylinder with aluminum valve
- 479W99 and 479X03 include retention strap bracket
- UL Listed

Mariner extinguishers are for regular marine use. Easy-to-read pressure gauge and easy-pull pin. 479W99 is for most common fires. Use 479X03 for liquid and energized electrical fires.

3YWG4

13J015

35WT24

Water and Water Mist Fire Extinguishers

Reliable extinguishers all feature a rechargeable stainless steel cylinder. 3YWG4 uses a water stream as the extinguishing agent. 13J015 and 35WT24 use deionized water (sold separately) as the extinguishing agent; a misting nozzle improves cooling and soaking characteristics.

53PW74

35WT27

36MA51

35WT30

Wheeled Fire Extinguishers

Extinguishers are designed for easy single-person operation and are small enough to easily pass through standard doorways. Steel cylinders. UL Listed.

Stored Pressure—Economical units roll easily on semipneumatic rubber wheels. Effective on many types of high-risk fires that may occur within commercial and industrial applications.
- 25-ft. hose

Regulated-Cylinder Operated—Excellent for high-risk fire hazards that require consistent flow rates and ranges throughout the entire fire fighting operation. 36MA51 has 16" semipneumatic rubber wheels; 36MA52 has 36" rubber-coated steel wheels.
- 50-ft. hose

Pressure Transfer—Extinguishers have separate extinguishing agent and expellant gas cylinders, allows a spent cylinder to be quickly and easily replaced.
- 50-ft. hose

Fire Extinguishing Spray and Fire Retardant

Fire Extinguishing Spray—Instantly cools down surfaces that are too hot to work on or around. Sprays into hard-to-reach areas from any position. Meets UL 2N75, NFPA 18, and EPA Standards.

Fire Retardant—Spray on to fabrics, combustible materials, and other Class A surfaces to help inhibit the spread of flames and smoke. Will not stain.

Fire Extinguisher Brackets

AMEREX · BUCKEYE · Kidde · BADGER

Easy-to-mount brackets secure fire extinguishers in a prominent location so they are accessible in an emergency. All bracket straps are metal, except 3JLR6 has a rubber strap

Emergency Escape Ladders

Kidde

Lightweight steel ladders provide a fire escape route through an open window for floors above ground level. They store compactly and deploy quickly, attach to most window sills. Anti-slip rungs provide a safe descent, tested up to 1000 lb. Discard after single use.

Smoke and Combination Smoke/CO Alarms

Alarm Types: Ionization respond best to fast-raging fires. Photoelectric respond best to slow-smoldering fires. All interconnect units must interface directly with their own brand of interconnectable smoke and carbon monoxide alarms.

SMOKE ALARMS

- Meet UL Standards

Test/Reset button verifies alarm circuitry, alarm activation, and battery function. 85dB horn. Easy installation. Operating temp. range: 40° to 100°F.

Battery-Powered—Provide continuous alarm operations during a power outage. Feature LED power-on indicator, tamperproof locking pin, and low-battery warning.

Interconnectable—Feature power-on and alarm indicators. Latching alarm identifies initiating alarm. Locking mechanisms lock the battery drawer and secure alarm to base, except 1XTG8 includes optional locking mechanism that deters removal of unit.

Interconnectable, for the Hearing Impaired—Strobe light flashes distinct patterns for smoke and, if connected to a CO alarm, carbon monoxide. 85dB horn. Features alarm latch for initiating unit and low-battery visual indicator.

- Meets UL 1971 visual signaling requirements

Hardwired Bridge Unit for Wireless Detectors—Add wireless capability to an interconnected system by replacing one wired unit. Helps avoid pulling wires through walls for retrofit and remodel projects.

Wireless—Interconnectable alarms simplify adding detectors to every room in a retrofit/remodel project. 85dB horn. Require Bridge Unit, sold separately.

COMBINATION SMOKE/CO ALARMS

- UL Recognized

Test/Reset button function tests alarm circuitry, alarm activation, and peak level memory. Feature visual indicators for alarm and power-on. 85dB horn. Easy installation. Operating temp.: 40° to 100°F.

Battery-Powered—Provide alarm function during a power outage. Voice warning announces "Fire," "Carbon Monoxide," or "Low Battery."

Interconnectable—Allow multiple alarm signals to be triggered from one source of hazard.

1XTH3 and 5MPL0 feature voice that announces "Fire," "Carbon Monoxide," or "Low Battery" warnings when detected. 2FTP5 voice warning includes location of danger, and has latching features to indicate initiating alarm and low battery.

INTERCONNECTABLE HEAT ALARMS

- 20JK13 meets UL 217 Standard
- 2FTN6 meets UL 539 Standard

Designed to give early warning of heat from fire. Alarm sounds before it reaches the fixed temperature rating of 135°F. 85dB horn. Originating alarm and power-on LED indicators. 20JK13 and 2FTN6 can be interconnected with smoke alarms. 20JK13 operating temp. range: -20° to 100°F.

2FTN6 operating temp. range: 10° to 135°F.

INTERCONNECTABLE STROBE LIGHTS

- Meet UL 1971 Standard

Use with a smoke, heat, or CO alarm to provide a visual warning to the hearing impaired and in quiet/silent areas. Produce separate flash patterns to differentiate smoke/heat and carbon monoxide warnings. LED power-on indicator. Mount to any standard electrical box up to 4" octagonal. Operating temp.: 40° to 100°F.

INTERCONNECTABLE ALARM MODULES

- UL Recognized

Activate auxiliary warning devices such as external bells, sirens, or exhaust fans. Feature one set of form C contacts.

Carbon Monoxide Alarms

- UL 2034 Listed

85dB horn sounds when sensor detects high levels of CO. Select models feature visual alert when alarm needs replacement. Operating temp.: 40° to 100°F.

Battery-Powered CO Alarms—User-friendly detectors have easy-access battery compartments. 3YNJ3 has a battery lockout system.

Plug-In CO Alarms—6AJW6 has tamper-resist feature that sounds a constant alarm if unit is unplugged or comes loose from wall outlet. 2FTN5 and 20JK12 include a 6-ft. extension cord for table or shelf mounting.

Plug-In Combination CO and Explosive Gas Alarm—Unit also detects methane or propane gas. Includes extension cord for table or shelf mounting.

Interconnectable CO Alarms—When interconnected with smoke alarms, 1XTH1 and 1XTH2 feature two different sounding patterns to differentiate smoke and carbon monoxide warnings. 2FTN2 features latching alarm indication and a locking mechanism to prevent theft of battery or unit.

SYSTEM SENSOR

Carbon Monoxide Alarm

4-wire detector is designed for system operation. Operates on most industry security and fire alarm control panels. Features RealTest technology, which allows detector to be tested with CO gas. Mounts to single-gang electrical box. 85dB horn. Operating temp.: 32° to 104°F. 12/24VDC. UL Listed.

Includes	Mfr. Model	Item No.
Optional Drywall Anchors	5CGZ7	**5CGZ7**

SAFEAWAKE

Smoke Alarm Aid

SafeAwake Smoke Alarm Aid works in tandem with, and is activated by traditional, audible smoke alarms to improve fire safety for elderly and hard-of-hearing populations. When an alarm sounds, the SafeAwake is triggered to flash a bright light and set off its own loud, low-frequency audible alarm that can be heard by the hearing impaired. It also sets off a motorized bed shaker to wake up slumbering residents. Easy setup makes it an excellent choice for homes, hotels, hospitals, senior residences, and independent and assisted living facilities. With automatic shutoff and restart, turn-on indicator light, test button, and battery backup (batteries included). UL Listed.

STI FIRESTOP 3M

Fire Barrier Products

Pillows and Self-Locking Pillows—STI brand pillows are lightweight and intumescent on all sides. Reinstallable for fast, convenient retrofitting of cables. UL Classified and FM Approved.

3M brand self-locking pillows have strips that adhere to each other to make overhead installation easier.

Composite Sheets—Fire-stop large openings through fire-rated walls and floors with multiple penetrations. Anchor sheets to the wall or floor with common tools. Cut to fit irregular shapes. Can fire-stop openings up to 36 sq. ft. STI brand sheets are lightweight for easy handling and fabrication.

Mortar—Use for filling large openings in concrete floors and walls. Nonshrinking; can be poured, pumped, or troweled. Will not crack due to temperature fluctuations. STI brand yields approx. 1250 to 1425 cu. in. 3M brand yields approx. 697 cu. in. UL Classified except 4MM45.

Wrap Strips, Duct and Plenum Wrap—Use wrap strips to fire-stop metallic and nonmetallic pipes, insulated pipes, and cable bundles. Duct wrap protects both grease and ventilation ducts. UL Classified except 1XTJ1 and 3BE40. Plenum wrap protects plastic pipe.

Plugs—Intumescent fire-stop plugs temporarily or permanently seal metallic conduits or conduit sleeves from the inside, through gypsum or concrete/masonry walls. Install with no special tools required. UL Classified.

Pipe Collars—Intumescent devices expand during a fire to help close off plastic pipe that penetrates fire-rated walls and floors. Seal off burning ABS and PVC pipes, both solid and foam core, as well as CPVC, PVDF, and FRPP pipes. 3-hr. fire rating. 3BE43 and 3BE44 are UL Classified.

Accessories—Mineral Wool Board 3BE69 provides high-temperature thermal control and fire resistance. Foil Tape 4MM48 and Metal Restraining Collar 4MM49 are for use with STI brand wrap strips. Use 4MM48 for tuck-in installation; for external mounting, use 4MM49.

Packing Material 1XRT3 is for use around metallic, nonmetallic, and insulated pipe; UL Classified.

STI FIRESTOP 3M

Fire Barrier Products

PENETRATION SEALANTS

Material expands when exposed to heat or fire. Can be applied to vertical or overhead surfaces. Easy installation, cleanup, and disposal. Nonhalogen formula requires no mixing. Paintable, sag-resistant sealants remain flexible.

4-hr. Latex—STI brand models are FBC compatible and acoustically tested to reduce noise transmission. Versatile LCI commercial-grade formula has fast-acting intumescence that expands up to 10 times for a wide range of applications. SSS industrial-grade multiviscosity formula has 2-stage intumescence for extremely fast expansion.

3M brand bonds to concrete, metal, wood, plastic, and cable jacketing. Formula dries tack-free in 10 to 15 min.; paintable after 72 hr. All models are CPVC compatible.

2-hr. Latex—Dries tack-free in 8 to 12 min.; paintable after 72 hr. CPVC compatible.

4-hr. Watertight Silicone—3M intumescent sealant adheres to concrete, gypsum, metal, plastic, and wood.

PENETRATION AND JOINT SEALANTS

Latex sealants are resistant to water; they dry without shrinking and will not re-emulsify after drying. Endothermic fillers absorb heat and release water. Silicone sealants are for through penetrations and joints. Low modulus for ±50% movement capabilities. Ozone- and UV-resistant. CPVC compatible.

JOINT SEALANTS AND SPRAYS

For sealing fire-rated joints. Water-based sealants are highly elastomeric and easily installed. Sprays can be applied with conventional airless spray equipment and have acoustic properties to reduce noise transmission.

PUTTY, PUTTY PADS, AND PUTTY STICKS

Flexible putty has intumescent and endothermic properties and molds easily into penetrations. Pads provide easy application to electrical boxes or other penetrations. Putty sticks stay pliable to allow easy access for cable mining at a later time.

SMOKE AND ACOUSTICAL CAULK AND SPRAY

Use halogen- and solvent-free material for sealing through penetrations in smoke-rated walls. Flexible.

RESIDENTIAL FIRE BLOCK

Halogen-free sealant resists high temperatures, has minimal shrinkage, and will not sag or run in vertical or overhead applications. Tack-free in 15 min.

FIRE BLOCK FOAM

Foam-in-place fire block and draft stop for nonrated residential and commercial construction. Helps seal, fill, insulate, and bond. Also helps reduce air infiltration. Bonds to concrete, brick, metal, wood, plastic, and cable jacketing.

FIRE BARRIER FOAM AND DISPENSING GUNS

1-step foam is a convenient alternative to 2-part epoxy, mineral wool, or bricks. Expands at a consistent pace in horizontal and vertical applications. Dispensing guns offered separately. Automatic cordless gun includes lithium-ion battery, charger, and soft-sided bag. Dispenses up to 60 cartridges per charge.

FIRESTOP 3M

Fire Barrier Products

Cable Pass-Through Devices—Intumescent material expands rapidly when exposed to fire or high heat to quickly seal pathways. STI EZ Path devices eliminate the need to remove and reinstall or adjust fire-stop materials. 6LE11 and 3BE71 include the EZ Path device and 1 set of wall plates and labels. 32TL92 Smoke and Acoustical Pathway is designed for easy installation in nonrated floors and walls. This pathway has been tested and approved for cable capacities ranging from 0 to 100% visual fill. In these installations, the device does not require mechanical attachment to either the wall or the wall framing and may be installed after the wallboard has been installed. Split body design can be easily disassembled and installed around previously installed cables in existing construction. Multiple ganged devices using duplex, or quad wall plates provide additional capacity or segregation of cables by use, type, installer, or vendor as desired. 49VU22 includes the EZ Path device, 1 set of wall plates, labels and gaskets. 52ZW83 and 52ZW87 Marine Cable Transits are zero-maintenance, designed to take control of your fire-rated divisions in nonwatertight applications without the need to mechanically seal openings. Install individually or gang together to accommodate future expansions or increased cable load capacity. The heavy-duty mounting plates can be welded or even bolted to the fire-rated division for fast and convenient installs at sea or in dry dock. 3M 1XRR4 pass-through device is hinged for easy retrofit installation around cables. 53XH82, 53XH83, and 49VU22 are UL and C-UL Classified.

Cable Pass-Through Brackets—1FET7 is a range-taking mounting bracket kit providing 1 to 5 positions (slots) for mounting "ganged" pathways (devices) in wall assemblies. Multiple pathways are installed as a single group using adjustable vertical end brackets.

Cable Grommets—Eliminate the need for putty or sealant. 2-pc. polymer grommets snap together for easy installation. UL and C-UL Classified.

Sleeve Kits—Ready-to-install kits include sleeves, brackets, screws, and putty. 5GUZ6 and 5GUZ7 are UL Classified.

Safety Cabinet Information

Safety cabinets keep dangerous liquids organized, labeled, and separate from work areas. All include warning/content labels.

Consider the following when selecting a cabinet:

- Federal, state, and local compliance requirements
- Hazardous chemical flash point

OSHA COMPLIANCE:

The combined total of Category I, 2, 3 and 4 liquids should not exceed 60 gal.

FLASH POINT GUIDE FOR OSHA:

Category 1 and 2 Flammables - Below 73.4°F

Category 3 Flammables - At or Above 73.4°F/At or Below 140°F

Category 4 Flammables - Above 140°F/At or Below 199.4°F

NFPA 30 COMPLIANCE:

The combined total of all Class I, II, and III liquids should not exceed 120 gal.

FLASH POINT GUIDE FOR NFPA 30:

Class I Flammables - Below 100°F

Class II Combustibles - 100° to 139°F

Class III Combustibles - 140°F and above

DOOR CLOSURE TYPES:

Manual requires a worker to close the door.

Self-closing shuts automatically when the door is released to meet NFPA 1 fire code standards.

DOOR STYLES:

Single hinged has one door.

Double hinged has two narrow doors to allow doors to be fully opened in a smaller space.

Single bi-fold folds in the middle when open to take up less floor space.

Four hinged has four doors to allow doors to be fully opened individually.

MATERIALS:

Steel is powder-coated to resist corrosion.

Polyethylene is suitable for highly aggressive liquids and has no metal parts to corrode.

Wood laminate resists corrosion from harsh acids. It keeps cabinet contents cooler longer than steel cabinets, which transfers heat to the cabinet interior.

CABINET TYPES:

Standard-height are 35" or taller and do not have a toe kick.

Slimline are 24" wide or less to fit into smaller spaces.

Undercounter have a recessed toe kick to allow workers to stand comfortably in front of the cabinet.

Countertop are small enough to fit on most workbenches (less than 35" high) to keep items at eye level and easily accessible.

Stackable have a footprint that fits onto an existing base so cabinet capacity can be safely expanded without using more floor or countertop space.

Wall-mount have mounting holes in the back of the cabinet to allow them to be hung on a wall without drilling holes that can damage the integrity of the cabinet.

Drum safety storage do not have shelves in the lower portion of the cabinet to accommodate large containers such as 30- and 55-gallon drums.

Combination standard and drum storage safety have two distinct storage areas that store small- to moderate-sized containers and 55-gallon drums.

IBC (Intermediate Bulk Containers) tote safety lockers have a large sump capacity to contain spills and help meet compliance requirements. Heavy duty construction supports the weight of the container and its contents.

Aerosol safety storage have shelves with cutouts to accommodate standard-sized aerosol cans.

Acids & Corrosives Safety Cabinets

- Blue color
- For small container storage, except 13M568 holds 1 drum
- Steel cabinets include leveling feet
- For indoor use
- Justrite steel cabinets are FM approved and meet International Fire Code and NFPA 1 standards
- Jamco steel cabinets are FM approved and meet UFC 79 standards

These cabinets store acids and corrosives and protect them from hazards and help contain spills that can contaminate the worksite. They also prevent the contents from igniting in the event of a fire and have chemical-resistant coatings to protect surfaces from spills and leaks. Modular Quik-Assembly, polyethylene cabinets offer lockable doors that open 180º and adjustable shelves.

Additional shelves create extra storage space or replace damaged shelves. Match the brand of shelf and cabinet together along with the storage capacity.

EAGLE® DENIOS THE HAZMAT PRO®

Hazmat Drum Safety Cabinets & Lockers

- Meet NFPA Code 30 Standards; Lockers are also NFPA 400 approved
- FM approved
- Eagle cabinets are for indoor use; Denios lockers are for outdoor use

Steel storage cabinets and lockers store hazardous materials and do not have shelves in the lower portion of the cabinet to accommodate large containers such as 30- and 55-gallon drums.

CABINETS

Cabinets have a keyed lock. 6YG25 and 55EC26 to 55EC29 include a plus grounding attachment, red trilingual warning, and a self latching door.

786V66 has a continuous piano hinge, dual vents, fully welded construction, grounding lug, SpillSlope shelves, and welded shelf hangers.

LOCKERS

Padlockable. Offer a 90 mph wind rating.

Lockers with a noncombustible fire rating have an anchoring point, exterior grounding lug, galvanized grating above a spill compliant sump, and passive ventilation.

Lockers with a 2 Hour fire rating comply with fire rating requirements for storage of flammables within 10 feet of your facility.

All lockers feature lockable hinged doors with an inside release that provides added safety. Sumps are sized to provide compliant spill volumes.

DENIOS THE HAZMAT PRO®

Hazmat IBC Tote Safety Lockers

- Deep blue color
- Manual door closure
- L-handle
- Meet NFPA Code 30 Standards
- FM approved
- For outdoor use

Vertical lockers meet NFPA 400 standards for storage of hazardous materials. Steel IBC lockers have a large sump capacity to contain spills and help meet compliance requirements. Heavy duty construction supports the weight of the container and its contents. Have 2 doors.

Flammables Safety Cabinets

- For small container storage
- For indoor use
- Meet OSHA and NFPA Code 30 Standards
- FM Approved

Steel safety cabinets for flammable and combustible liquids reduce the risk of the contents igniting in the event of a fire or as a result of environmental conditions. Cabinets are available in various colors to indicate cabinet contents to first responders. They also provide additional time for workers to evacuate or for sprinkler systems to extinguish a fire. All models include leveling feet, except those with legs. All cabinets offer recessed pull door handles, except 30 and 90 Min EN rated cabinets have bar handles. All Condor and Justrite combo model 4HTU4 have padlockable locks. Jamco, Eagle and Justrite have keyed locks.

Flammables Drum Safety Cabinets

- 2 double hinged doors
- Recessed pull handles
- Meet NFPA Code 30 standards
- FM approved
- For indoor use

These storage cabinets do not have shelves in the lower portion of the cabinet to accommodate large containers such as 30- and 55-gallon drums. 1YNH9 and 4HTZ3 are combination cabinets with two distinct storage areas for small- to moderate-sized containers and 55-gallon drums. Drum cradles, rollers and ramps are steel.

Cylinder Storage Information

Ventilated sides on cylinder cabinets prevent build-up of vapors and gasses that can cause an explosion. Assembled cabinets have welded seams for durability.

ORIENTATION:

Horizontal stores LP gas cylinders that are stored on their side.

Vertical holds LP or compressed gas cylinders that are stored on end.

Horizontal and vertical holds compressed gas cylinders vertically and LP gas cylinders horizontally or vertically.

Condor · JUSTRITE® · Jamco Products

Liquid Propane Gas Cylinder Safety Cabinets

- All Condor and Justrite cabinets meet NFPA Code 30 and 58 Standards; Also meet OSHA standard 1910.110
- Jamco models meet OSHA 1910.101 and 1910.253
- All Condor and Justrite cabinets are padlockable for extra security

Safety cabinets hold propane and other liquid propane gas (LPG) cylinders.

Horizontal Steel Holds 8 Cylinders 5CHL1

Horizontal Steel Holds 12 Cylinders 8E498

Compressed Gas Cylinder Safety Cabinets

- All Condor and Justrite cabinets meet NFPA Code 30 and 58 Standards; Also meet OSHA standard 1910.110
- Jamco models meet OSHA 1910.101 and 1910.253
- All Condor and Justrite cabinets are padlockable for added security

Vertical cabinets hold compressed gas cylinders that must be stored upright.

Steel Holds 9 Cylinders 5CHL5

Steel Holds 10 Cylinders 9WHC1

Aluminum Holds 20 Cylinders 4HUA5 (Cylinders not included.)

JUSTRITE® EAGLE®

Type I Safety Cans

Safety cans with leaktight, self-closing spouts provide temporary storage of flammable liquids such as gasoline (red), kerosene (blue), diesel (yellow), and oil (green). Automatic vent feature protects against rupture or explosion, and flame arrestors protect contents from external ignition sources. Galvanized steel models feature an ergonomic, all-steel handle and chemical-resistant, high-gloss powder-coat finish. High-density polyethylene cans are impervious to many liquid chemicals, solvents, and corrosives.

Type I Safety Cans—Cans have a single opening for both filling and transfer of flammable liquids into containers with wider openings. Justrite and Eagle galvanized steel cans have a trigger-release cap. Justrite galvanized steel cans have a full-fisted grip handle that swings for easy handling, except 6UZN1 features a trigger handle. Justrite polyethylene cans have plated steel or stainless steel fittings and a flame arrestor and content ID zone for identification of fuels being stored.

Type I Safety Can Combo Kits—Include an Eagle Type I Safety Can with matching specifications and Funnel 6X853.

Funnels For Type I Safety Cans—Polyethylene funnels fit Type I cans. 3AG33 features a 2-position hinge that allows user to fill or pour without removing the funnel. 6X853 self-locks and is FM Approved.

Portable Fuel Caddies

These mobile fuel caddies help you transport fuel safely to jobsites.

9FA80 and 8TTW6—Molded-in baffle prevents spills during transport. Spring-loaded nozzle with 2-way rotary hand pump and 10-ft. hose. Calibrated in 2-gal. increments. Polyethylene construction is resistant to chemicals, rust, and dents. Aluminum nonsparking axle and pneumatic tires with nylon bearings and wheel hubs. UN Approved, DOT Approved.

JohnDow Industries—Heavy-duty bidirectional pump provides suction for 5.7 gal./min. @ 72 rpm dispensing (1 gal. per 12 turns). Semipneumatic wheels provide safe, easy movement. Also features 2" filler neck for bulk filling. UL Listed.

Fuel Cans

- Meet EPA standards
- DOT and CARB Compliant

Provide temporary storage of flammable liquids such as gasoline (red), diesel (yellow), and kerosene (blue). Child-resistant fuel cans are self-venting for safe and easy pouring with auto shutoff. Angled and tapered design prevents spills, leaks, and reduces gas emissions. 55GU74–55GU78 have an intuitive press button spout that gives you precision flow control for an accurate, no-mess pour. 33UZ30 includes 0.9 mm cold-rolled steel walls, an interior rust-proof Rezol lining, internal breather pipe for splash-proof pouring, a three handle configuration for easy carrying, a leakproof bayonet closure, plus a locking pin for the cap.

GarageBOSS Press 'N Pour Spout—For use with all GarageBOSS fuel containers.

6YG05

Galvanized steel safety cans with leaktight, self-closing spouts provide temporary storage of flammable liquids such as gasoline (red), kerosene (blue), diesel (yellow), and oil (green). Feature ergonomic, all-steel handle, flexible metal hose, automatic vent, and flame arrestor. Chemical-resistant, high-gloss powder-coat finish.

Type II Safety Cans—Cans have two openings for filling and pouring and a trigger release cap.
- FM Approved, UL and C-UL Listed, TUV Certified

Type II Safety Cans with AccuFlow—Vented AccuFlow manifold provides superior pour control and precise smooth flow. Features easy-trigger handle, 3½" stainless steel flame arrestor, and quick-open port with ergonomic lift handle. Warning label with extra-large ID zone identifies contents.
- FM Approved, UL and C-UL Listed, TUV Certified

Type II DOT Transport/Dispensing Cans—Specifically designed for applications requiring DOT/UN compliance. Roll bar construction protects the fill and pour mechanism from damage. Dual fusible-link bracket guards against spillage and vapor release during transport. 100% leak tested.
- Meet DOT requirements
- FM and UN Approved

Safety Can Spill Tray—Large diameter surface supports safety cans up to 5-gal. capacity.
- Meet OSHA and NFPA Code 30 Standards
- Carb Compliant

Hazardous Liquid Safety Cans

- Meet OSHA Standards
- FM Approved

24-ga. galvanized steel cans with red powder-coat finish are used for general purpose solvents. Polyethylene cans are used with corrosive liquids or alcohol. Plunger and bench cans feature dasher plate to keep contents from ignition sources.

Plunger Cans—Permit fast, easy moistening of cleaning cloths when applying solvents to parts. Surplus liquid drains back into reservoir. Eagle brand models include brass plunger assembly. Justrite models have Ryton and brass plunger assembly.

Bench Cans—Ideal for easy cleaning of small parts in solvents. Eagle brand models feature spring-loaded, perforated dasher plate. Justrite brand models feature steel dasher plate that serves as an effective flame arrestor. Hinged cover minimizes evaporation loss.

Solvent Can with Tray—Portable, leaktight can features spring-loaded, self-closing lid. Controls VOC emissions and cleaning agents. Accepts standard long cotton-tipped applicators and small cleaning utensils. Tray makes it easy to carry to point-of-use.
- Meets EPA 40 Requirements

EAGLE® JUSTRITE®

Oily Waste Cans

Available with foot- or hand-operated covers; countertop models are also available. Lid opens to a restricted angle and is self-closing to minimize the risk of spontaneous combustion.

Polyethylene—Impact-resistant noncorrosive polyethylene is impervious to many liquid chemicals, solvents, and corrosives.
- Meet OSHA Standards

Galvanized Steel—Durable, chemical-resistant construction provides extended service life. Red and yellow cans have a powder-coat finish; silver cans have a clear-coat finish. E6819 through E6822 feature a SoundGard lid with specially designed, sound muffling pad to reduce annoying lid closure noise. Ideal for quiet environments.
- UL Listed, except 4KPX1 and F0097
- FM Approved

Safety Containers for Laboratory Environments

JUSTRITE® EAGLE®

Laboratory Faucet Cans—Self-closing faucet provides safe dispensing. Fill spout has pressure-relief cap with flame arrestor. 5-gal. models include a built-in vacuum breaker. Brass faucet, except 3NKU4 faucet is stainless steel. Cans are shelf-mounted with a bottom-mount faucet, except 3NKU4, 3NKJ4, and 3NJX9 faucets are located on the top.
- FM Approved
- 3NKJ4 is UL Approved

Self-Close Acid/Corrosive Safety Cans—Store acids and caustics. Spring-close cap provides tight seal. Containers are marked in liters, quarts, and gallons for accurate filling and dispensing.

Bottle Safety Jacket—Protects 4L and 1-gal. glass bottles from breakage. Bottle fits into bottom half of cover, and lid twists securely for safe pouring.

Dispensing Squeeze Bottles—Feature stainless steel wire with shapable stem that dispenses a fine, targeted stream of flammable liquid directly onto or into small objects and allows access to hard-to-reach areas.

Dispensing Bottles—1-handed brass dispensing valves are leakproof and self-closing. Body is textured and shaped for a firm grip.
- FM Approved

Grounding Wire

Terminated bonding and grounding wire come with clamps or clips attached at the ends to secure the wire to grounding surfaces. They help prevent buildup of static electricity to prevent damage to equipment and reduce the risk of electric shock to workers. Coiled wire retracts when not in use.

Universal Sorbent Pads

Absorb and clean up both water- and oil-based liquids. These pads lie flat under equipment, on top of workbenches, or in aisles and walkways to clean up spills such as coolants, solvents, oils, paints, grease, and other water-based liquids. The coverstock layer on some pads increases durability and reduces linting. **Ceiling tile sorbent pads** cover ceiling tiles to absorb leaks, and their leakproof backing prevents drips from staining tiles. They fit the most common sizes of ceiling tiles.

Universal Sorbent Floor Mats

- Flame-resistant (except 5UZ62)

Sorbent mats absorb leaks, drips, oils, coolants, and solvents along walkways, under workstations, and in industrial settings. Mats with adhesive backing won't shift or slide and help minimize the risk of slips, trips, and falls.

Universal Loose & Granular Sorbents

437J91

30RC91

35UX86

15U827

30RD13

44Z111

These powdered or granulated materials absorb oils, acids, paints, inks, water, and other liquids when sprinkled over spills. They clean up spills on floors and uneven or cracked surfaces to minimize the risk of falls. Once liquids are absorbed, the material can be swept up. **Food Grade Loose Absorbent**—NSF J1 certified for use in food production facilities.

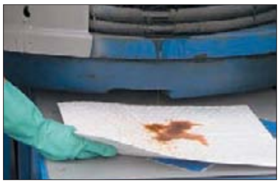
Oil-Only Sorbent Pads

30RA41

30RA30



30PV57

Absorb and clean up oil-based liquids while repelling water. Flat pads fit under equipment, on top of workbenches, in aisles and walkways to clean up incidental spills such as transformer oil, vehicle fluids, grease, petroleum, and other oil-based solvents. Water-repellency makes them suitable for outdoor use. White color draws attention to machine leaks and shows saturation level during spill response. The coverstock layer on some pads increases durability and reduces linting.

Oil-Only Sorbent Rolls

- Polypropylene material

Perforated or nonperforated sorbent rolls absorb oil-based liquid spills but repel water. Clean up incidental spills including transformer oil, vehicle fluids, grease, petroleum, and other oil-based solvents. White color contrasts with spill colors and saturation level to draw attention to leaks. Coverstock layer increases durability and reduces linting. Pig 4-in-1 30PZ80 and 30PZ79 are perforated with scored underside for shaping into a pad, roll, sock, or wiper. 30RA27 has a leak-resistant, polypropylene backing.

Harsh Chemical Sorbent Pads & Rolls

Absorb and clean up harsh chemical liquid spills like sulfuric acid, hydrochloric acid, or sodium hydroxide. These sorbents won't degrade or react when in contact with harsh chemicals. Pads fit under and around machinery, and they soak up spills on workbenches, walkways, or floors. Pads and rolls with coverstock have an additional layer that increases durability and reduces linting.

Harsh Chemical Sorbent Pillows

Soak up acids, bases, and unknown chemical spills. Pillows have a larger surface area and higher capacity than pads, rolls, and socks, so they absorb more liquid and help minimize slips and falls. 30RC89 neutralizes acids, bringing pH levels to 7 or neutral. Its color changes to indicate the presence of acid and when the pillow is safe to handle.

Fuel & Flammable Liquid Sorbent Pads & Rolls

Polypropylene pads absorb fuel or flammable liquid spills such as jet and diesel fuel or gasoline. Pads and rolls are static-dissipative to reduce the risk of fire or explosion and water-repellent for use outdoors. White color draws attention to leaks or drips and shows saturation level during spill response.

ULTRATECH INTERNATIONAL, INC. · EAGLE® · Condor · ENPAC

Plastic Spill Containment Pallets

- Supports EPA Compliance 40 CFR 264.175
- Supports SPCC Compliance
- Black grate color
- Nonmodular, except 3KN24 is Modular

Pallets hold drums and other containers and have a containment sump that captures liquid spills.

Low-Profile Plastic Spill Pallets— Are not as tall as standard pallets, making it easier to load and unload drums on and off of them. They also make it easier to dispense liquids from drums. These pallets meet necessary spill containment requirements.

Plastic Spill Pallets—Have a built-in containment sump that captures liquid spills from drums and containers. Pallets have grated flooring that can be removed and cleaned.

Flexible Sidewall Plastic Spill Pallets—Have a rugged, PVC fabric sump that reduces the unassembled size of the unit, and makes it easier to store, transport, and ship.

Nestable Plastic Floor Pallets—Can be stacked to save space. The removable grating aids cleanup and inspection. They can be moved with a forklift when stacked together.

Inline Plastic Spill Pallets—Save floor space and make drum handling easier. They are connected to a spill-deck sump to contain liquids.

Fluorinated Plastic Spill Pallets—Get treated with a process that makes them compatible with aggressive chemicals and certain chlorinated solvents.

Plastic Spill Pallet with Removable Sump— Combination of a forkliftable sump and forkliftable pallet: allows the loaded pallet to be lifted off the sump and transported while the sump remains in place.

Note: Products do not include any pictured containers.

Outdoor Plastic Spill Containment Pallets

- Supports EPA Compliance 40 CFR 264.175
- Supports SPCC Compliance
- Black grate color
- Nonmodular, except 3FTY5 is Modular

Outdoor spill pallets have a shed or cover used to store drums, tanks, totes, and other containers securely. They also feature a containment sump that captures liquid spills.

Hardcover Plastic Spill Pallets with Rolltop & Double Doors—Have a roll-top door that is used to access drums and containers. Double doors allow easy loading and unloading of drums.

Hardcover Plastic Spill Pallets with Rolltop Door—Feature a roll-top door that is used to access drums and containers.

Hardcover Plastic Spill Pallets with Gull-Wing Doors—Are built with gull-wing doors that are hinged at the top and swing up to open.

Softcover Plastic Spill Pallet—Holds up to four 55-gal. drums. It has a durable soft-top cover that protects it from the elements.

Hardsided Plastic Spill Containment Hut with Double Doors—Stores up to four 55-gal. drums. It is constructed of high-density polyethylene and has four-way forklift pockets, vented doors, and removable grating and top hooks for moving.

Plastic Spill Deck with Overflow Bladder 3VAR2

- Support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance, except 45YZ80 to 45YZ83
- Black grate color

Plastic Spill Decks—Suitable for standalone use with small drums and containers. These decks can be connected with other pieces to share spill capacity between units to make a complete EPA-compliant unit for holding 55-gal. drums.

Inline Plastic Spill Decks—Save floor space and make drum and container handling easier. These decks are commonly used where storage against a wall is preferred.

Plastic Spill Decks with Overflow Bladder—Low-profile saves floor space and makes drum and container handling easier. They are connected to a spill-deck sump that has an overflow bladder that automatically unfurls to provide additional spill containment.

Plastic Ramps & Bladder for Spill Decks/Platforms

Ramps contain spills and allow for the loading and unloading of large tanks and storage drums. They connect to spill decks/platforms and make loading and unloading drums and containers easier while also helping to minimize injuries.

Flexible plastic replacement bladder is an attachment that increases sump capacity to ensure spill decks/platforms are EPA and SPCC compliant.

Plastic IBC Spill Containment Pallets

- Support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance
- Black grate color

IBC (Intermediate Bulk Container) spill containment pallets hold and store IBC containers and are much larger than regular spill pallets to accommodate the higher volume of liquid found in IBC containers. They have a sump to capture liquids in the event a container on the pallet leaks or spills.

Nestable Plastic IBC Spill Pallets—Can be stacked to save space. Pallets can be moved with a forklift once they are stacked.

Double Stack Plastic IBC Spill Pallets—Allow users to stack pallets to maximize storage.

Modular Plastic IBC Spill Pallets—Can be connected to share capacity. The shared capacity allows these pallets to have a lower profile and smaller footprint than standard IBC spill pallets.

Note: Products do not include any pictured containers.

Covered Plastic IBC Spill Containment Pallets

- Support EPA Compliance 40 CFR 264.175
- Support SPCC and NPDES Compliance
- For outdoor use
- Black grate color

Covered IBC (Intermediate Bulk Container) spill pallets are used outdoors to protect contents from the elements or in areas where unauthorized access is a concern. These covered pallets with a sump contain liquids in the event an IBC container on the pallet leaks or spills. These pallets are larger than regular spill pallets to accommodate the volume of IBC containers, and are typically moved with a forklift.

Hardcover Plastic IBC Spill Pallets with Rolltop and Double Doors—Hold and store drums, tanks, totes, and other containers. The roll-top and double doors allow easy loading and unloading of drums.

Modular Hardcover Plastic IBC Spill Pallets with Rolltop and Double Doors—Can also be connected together to share capacity. The shared capacity allows these pallets to have a lower profile and smaller footprint than standard IBC spill pallets.

Softcover Plastic IBC Spill Pallets—Are chemical-resistant. Their extra wide platform shelf accommodates IBC units up to 50 in square.

IBC Tote Dispensing Systems

- Support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance
- 491N37 and 491N38 support NPDES Compliance

Dispensing systems hold IBC (Intermediate Bulk Container) totes to facilitate dispensing of liquids. These systems include a spill pallet base that contains spills and a tote stand to place the IBC tote upon.

Note: Product does not include any pictured containers.

Plastic Modular Drum & Pail Dispensing Racks

- Support EPA Compliance 40 CFR 264.175
- Support NPDES and SPCC Compliance
- For indoor or outdoor use

Racks provide horizontal 55-gal. drum storage for easy dispensing and spill containment. The base is designed to contain spills that may occur during dispensing. Platform sections can be linked together to provide modular workstations. 53CN69, 53CN71, and 53CN73 include 1 pallet with a drain.

Note: Products do not include any pictured containers.

Plastic Drum Dispensing Spill Collectors

- Yellow color

Collectors hold drums and capture leaks and spills. Hard molded plastic helps protect drums from damage. **Mobile Drum Spill Collectors—**Kits include a 55-gal drum, drum funnel, and a drum dolly with wheels at the base for maneuverability. 31DL70 and 4HRD4 have a steel drum while 31DL71 and 4HRD5 have a polyethylene drum.

Note: Products do not include any pictured containers.

Plastic Drum & Pail Dispensing Trucks

- Yellow color

Dispensing trucks have wheels for transporting drums and containers. They are built with a spill containment sump/basin that captures leaks and spills. These trucks allow drums and pails to be set within the sump while dispensing.

All Terrain Drum Dispensing Truck—Includes solid rubber wheels and a more rugged dolly to handle outdoor terrain.

Note: Products do not include any pictured containers.

Spill Containment Berms

- Support EPA Compliance 40 CFR 264.175
- New Pig models also Support Compliance 40 CFR 112.7 and 40 CFR 122.26
- Support SPCC Compliance

These berms are deployed on flat surfaces to contain leaks, spills, or washdown liquids. They help protect people from hazardous slips and falls, and keep liquids away from designated areas, machinery, and drains.

Spill berms and sections create long-term spill containment in different sizes or shapes. Kits include the components needed to build a complete spill berm. For indoor or outdoor use.

Drive-over spill berms allow vehicles to quickly enter and exit areas without having to manually lower the walls of the spill berm.

Collapsible spill berms have foam sidewalls that fold down to allow easy drive-in and out access. The sidewalls lay flat until liquid is spilled in the berm and then rise to accommodate the level of the liquid.

Spill Dikes are used to form a temporary barrier to contain spills. They are modular in construction and have interlocking components.

Spill Dike for Rough Surfaces features a tacky bottom layer that seals tight to rough surfaces.

Doorway Barrier Dikes create a barrier to contain chemicals and liquids. They fit most doorways and are easy to install.

Tabletop Spill Dikes contain spills on workbenches or in labs. Have a low-profile for small spills on smooth surfaces. Polyurethane material resists water, oil, and many chemicals.

Drive-Over Spill Dikes create a flexible and leakproof barrier that contains leaks and diverts stormwater. Can be driven over and are built with a skin that withstands heavy traffic and resists UV rays. Urethane bonds to concrete and smooth surfaces without adhesive.

Spill Dike for Smooth Surfaces 3EWX2

Spill Dike for Rough Surfaces 30PW61

Doorway 30PW58

Plastic Spill Containment Sumps/Basins

Hold drums, tanks, or other liquid-filled containers. Sumps have a durable, polyethylene construction that will not rust or corrode. Capture unwanted leaks and spills.

Outdoor Spill Containment Sumps— Have a hard-top cover that protects contents from the elements.

Dolly—For transporting Eagle 3KN25 and 3KN26. Features welded construction with 4 swivel wheels.

Note: Products do not include any pictured containers.

Trays catch leaks and spills from drums and containers. **Spill Trays** can also be used underneath machinery to catch leaks. **Spill Trays With Black Grating** help keep cans, pails, and other containers out of smaller spills. **Pallet Rack Spill Trays** are placed under pallet racks to catch and contain spills or leaks. These trays help keep floors clean and minimize slips and falls. The **Line Pipe Spill Tray for Hose Connections** acts as a drip tray as well as a support for hose or pipe connections. Use the **Tray Connector** to join these trays together.

Note: Product does not include pictured container.

Collapsible Plastic Spill Containment Trays

- ENPAC and Eagle models support EPA Compliance 40 CFR 264.175
- Support SPCC Compliance
- Support NPDES Compliance, except 45UX06-45UX09

Used to catch leaks and spills under vehicles and equipment. They are compact and can be folded or rolled up for storage.

Foldable Sidewall Spill Trays have sidewalls that fold when driven over or stepped on and spring back into place. Ultratech models include a utility tie.

Compressable Foam Sidewall Spill Trays have foam sidewalls that provide support yet can be driven over or stepped on. Used as a storage pad for cans and other liquid containers.

Black Replacement Grates are used when existing spill-pallet grates are damaged or are no longer usable.

Note: Product does not include pictured batteries.

Round Pop-Up Pools are collapsible pools that "pop-up" and expand to a usable size. They are constructed of flexible plastic, and commonly used to contain leaks from vehicles, machinery, and pipes.

Square Pop-Up Pools with Bladder have a built-in bladder that unrolls as liquid fills the pool to increase liquid capacity.

Lab Packs, Overpack and Salvage Drums

Lab Pack
2RNY7

Salvage Drum
4RF59

Wheeled Overpack/
Salvage Drum
4TAJ4

Open head, unlined HDPE (high-density polyethylene) drums provide secure secondary containment of leaking liquids and hazardous materials. Suitable for indoor or outdoor use. Full drums can easily be moved with forklift.

LAB PACKS/OVERPACK DRUMS

Lab packs are lightweight and nestable. Lab packs, except 3TZW5, meet DOT 49 CFR 173.12. Overpacks meet DOT 49 CFR 173.25. 2RNY7 and 2RNY8 also meet FDA 21 CFR 177.150

14 and 20 Gal. Lab Packs—Store 5 gal. pails or smaller containers. Twenty gallon containers have handles.

30 Gal. Lab Packs—Stackable. 3TZW5 is suitable for use with hazardous materials in packing groups I, II, and III.

Overpack Drums—Feature screw-top lids and include handles for forklift use.

SALVAGE DRUMS

Drums are nestable for easy storage. Removable poly head and metal band. 4RF63 features handles. Drums meet 3 psi pressure test and DOT 49 CFR 173.3 standards.

LOCKING OVERPACK/SALVAGE DRUM

Features an easy twist-down closing with secure 4-pt. system that "locks" stacked salvage drums. Supports EPA, SPCC, and NPDES standards.

WHEELED OVERPACK/SALVAGE DRUMS

Have built-in handles and 6" polyolefin wheels to enhance mobility and versatility. Meet UN Group 1 standards and DOT 49 CFR 173.3(c). Meet EPA, SPCC, and NPDES regulations.

Leak Diverters

Capture overhead leaks caused by water and snow. They divert and redirect leaking fluid to prevent damage to floors, merchandise, or equipment plus help reduce slip hazards.

Ceiling Leak Diverters are tarps to protect people and equipment from leaks. D-rings are used for simple installation.

Drop Ceiling Tile Leak Diverter Kits replace damaged tiles and are used to maintain a professional appearance. They channel liquids away from ceilings with a hose and protect people and equipment.

Umbrella Style Ceiling Leak Diverter Kits contain the necessary components to capture overhead leaks and drain liquids away with a hose. They hang from a single point near leaks and open up like an umbrella.

Pipe Leak Diverters are tarps to capture leaks or condensation from pipes and protect people and equipment. Have brass grommets that are used to hang them on leaking pipes. Liquids are channeled away to a collection container or a portable storage tank. They can also be used for various maintenance applications.

Above the Ceiling Leak Diverter Kit sits directly above a drop ceiling tile to catch leaks and channel them away and **Below the Ceiling** clips in place to your drop ceiling to control leaks and drips.

Dewatering Bags

- Support EPA Compliance 40 CFR 122.26

Bags attach to the discharge hose on a dewatering pump to filter contaminants such as sediment and pollutants from water that is being drained from ditches, ponds, construction sites, and similar areas. Accommodate up to a 4 in discharge hose.

Drain Plugs & Kits

- Polyurethane plug material
- Metal handles

Plugs fit snugly into drain openings to prevent spilled liquids from entering the drain. They can be used for short term or left in place as an alternative to permanently sealing the drain. Tapered sides make it easier to seat the plug and ensure a secure fit. **Drain Plug Kits** include (1) each of the 2 in, 3 in and 4 in dia conical drain plugs and (1) plastic case.

Drain Cover Seals & Storage Cases

Attach to storm drains to prevent spilled liquids, oils, and hazardous materials from entering the drain. Flexible material allows the seal to conform to irregularities in the drain. Covers are used in areas at risk of spills or in washdown applications. All seals can be washed and reused. Self-sealing models are UV-resistant.

Magnetic Drain Cover Seals have a magnetic backing that seals the cover to a storm drain grate.

Self-Sealing Drain Cover Seals have a bottom layer that seals the area around the grate to prevent liquids from entering the drain.

Drive-Over Self-Sealing Drain Cover Seals are made of heavy duty materials that withstand damage caused by vehicle traffic.

Wall-Mount Storage Cases for indicated Ultratech seals hold and keep them at hand to prevent damage during storage and transport.

Filter Socks

Socks prevent contaminated water and debris from reaching storm drains. They are placed in front of or around the drain to filter contaminants from water before it reaches the grate. Water flows through the filter while trapping silt and other contaminants.

Set-In Place Filter 3NJF2

Magnetic Combination Filter 3EWP7

Street Drain Filters

Prevent silt and contaminated run-off from entering storm drains.

Adjustable-Frame Insert Street Drain Filters change size to fit the drain opening. The frame sits on the shelf under the grate and prevents the filter from falling into the drain when the grate is lifted.

Frameless Insert Street Drain Filters are held in place by the weight of the storm drain grate. A rod is threaded through the filter before lifting the grate to prevent the filter from falling into the drain when the grate is lifted.

Set-In-Place Curb Drain Filters are placed in front of streetside curb inlets.

Magnetic Street Drain Filters have integrated magnets that secure the filter to the top of the metal gate without requiring tools or removing the grate.

Magnetic Combination Drain Filters cover the curb inlet and a storm drain grate simultaneously.

QUICK DAM THE NEXT GENERATION IN FLOOD PROTECTION — SUPPLIER DIVERSITY

Water-Activated Flood Bags and Barriers

Bags and barriers absorb, contain and divert problem flood water. They contain an absorbent powder that swells and turns to gel when it gets wet, grow to full size and weight in minutes. Easier to deploy than sandbags and can be stacked as needed to create walls. Built-in wedge on barriers prevent rolling. Safe, nontoxic, nonhazardous and can be disposed of in the trash. For fresh water only.

Sandbags and Filling Tool

ULTRATECH INTERNATIONAL, INC. AQUASAFE FloodSax GOBAGGER

Sandbags hold back rising floodwaters, build military bunkers, barricade traffic areas, and weigh down objects and equipment so they stay in place. For fresh or salt water.

Standard sandbags must be filled with sand before use. Hemmed polypropylene construction for durability and easy filling. Attached tie cords help to secure bags when filled. Mildew-resistant. 500-hr. UV rating for white bags; 1200-hr. UV rating for orange bags.

Sandless sandbags are water-activated and contain absorbent material that soaks up water so they do not need to be filled before use.

Sandbag filling tool fills bags faster than conventional shovel method.

Indoor Carpet Entrance Mats

Mats provide a stretch of walkway for removing moisture, dirt, and grime from footwear, to reduce slip hazards and protect floors. **Rubber-backed mats** have double borders to keep moisture away from floors, and gripper backing to minimize movement. **Vinyl-backed mats** are slip-resistant.

Indoor Carpet Entrance Mats

Barrier Rib

Arrow Trax

Estes

Uptown

Guzzler

Portrait

Dante

Heritage Rib

Sabre Decalon

Combine mats to create a zoned entrance system that protects floors and reduces slip hazard by removing dirt, debris, and moisture from footwear. **Rubber-backed mats** have cleated backing to reduce mat movement, and molded beveled edging that creates a retention dam to trap moisture. **Vinyl-backed mats** reduce mat movement, and have beveled edges to help minimize tripping.

HEAVY-TRAFFIC

Barrier Rib—Durable, antimicrobial, 26-oz. crush-resistant mat has a molded dual-ridge/cross-rib pattern and carpeted beveled edges for maximum scraping and debris.

Arrow Trax—Chevron design provides nondirectional scraping and moisture retention. 38 oz. of yarn per sq. yd.

Estes—High/low, dense-tufted 33-oz. berber provides excellent water retention.

Uptown—High/low, looped-pile, upscale carpet retains moisture with 40 oz. of tufted, crush-resistant Decalon yarn per sq. yd.

MEDIUM- TO HEAVY-TRAFFIC

Guzzler—High/low, crushproof waffle design and rubber-edged perimeter provide superior water and soil control, with a low profile to fit under narrow clearances. 26 oz. of yarn per sq. yd.

Portrait—Tri-rib, high/low parquet design provides nondirectional scraping as traffic passes from all directions. Low profile is good for narrow-clearances. 26 oz. of yarn per sq. yd.

Dante—Densely tufted cut-pile Decalon construction features 24 oz. of tufted yarn per sq. yd.

Heritage Rib—Heavier-weight, double-rib high/low design provides extra moisture retention and scraping action. 24 oz. of yarn per sq. yd.

LIGHT- TO MEDIUM-TRAFFIC

Sabre Decalon—Mat offers good moisture and grime retention. 19 oz. of colorfast Decalon yarn affords functional service and easy cleanup.

Scrape & Dry Indoor Carpet Entrance Mats

NOTRAX MATS FOR PROFESSIONAL USE

Ideal for handling medium traffic at large entrances, this color-coordinated runner combines three functional mats into one design. The first zone features a looped, nonabsorbent yarn to scrape debris and moisture from foot traffic. The second zone combines looped scraper yarns with absorbent looped pile to begin the drying process. The third zone consists of looped pile to complete the drying function. Nonslip vinyl backing. Beveled edges minimize tripping.

Antifatigue & Drainage Mat Definitions

KEY PROPERTIES:

Oil & Grease-Resistant is made from non-laminated foam construction that makes it more resistant to oil and grease than other materials.

Welding Safe is made of laminated materials that resist damage caused by incidental contact with sparks.

Antimicrobial is made of materials that include antimicrobial treatments to inhibit the growth of mildew, mold, and bacteria that can cause odors and spread germs.

Autoclavable withstands exposure to hospital-grade cleaning chemicals and sterilization in an autoclave.

SURFACE DESIGN: Describes the appearance or texture of the top of the mat. Textured surfaces usually add some gripping power or slip resistance over smooth surfaces, which are used in dry areas. Decorative surfaces are generally used in customer-facing locations.

MAT COLOR: Usually chosen to match an interior design or workspace. Contrasting borders call attention to the transition to reduce tripping.

MAT MATERIAL:

Natural Rubber resists damage caused by incidental contact with grease and oil.

Nitrile Rubber resists extended exposure to grease, oil, and some chemicals.

Polyurethane is highly durable and chemical resistant and usually has a longer lifespan than vinyl.

Rubber Laminate has a flexible sponge base and a durable rubber top that resists damage caused by incidental contact with grease and oil.

Sponge Foam is made of flexible sponge-like material to relieve strain from standing or walking and has limited resistance to oil, grease, and chemicals.

Vinyl resists damage caused by incidental contact with some chemicals and acids.

Vinyl Laminate has a flexible sponge base and a durable vinyl top that resists damage caused by incidental contact with chemicals and some acids.

EDGE STYLE:

Beveled has a graduated edge to help prevent tripping and make it easier to roll equipment over.

Straight sits flush to walls and other edges to ease cleaning and sweeping.

MAT HARDNESS: Relates to how much the mat compresses when walked or stood on. Harder mats are easier to push carts across and are usually chosen for walkways. Softer mats are generally used where workers stand for long periods of time.

Standard Antifatigue Mats

NOTRAX MATS FOR PROFESSIONAL USE · Condor · SANDEL®

- Beveled edge

Mat material compresses to help absorb pressure to reduce fatigue and joint pain. Suitable for use in dry settings that aren't exposed to oil, grease, heat, and chemicals.

MATS FOR PROFESSIONAL USE

Wear-Resistant Antifatigue Mats

- Beveled edge
- Anti-Slip backing

These tough antifatigue mats are made of or are coated with materials that make them more durable than standard mats. They also resist damage caused by some light chemicals used in cleaning and general maintenance.

Oil & Grease-Resistant Antifatigue Mats

NOTRAX MATS FOR PROFESSIONAL USE

- Beveled edge
- Raised pattern surface
- Anti-Slip backing
- Black color

Nonlaminated foam construction makes these antifatigue mats more resistant to oil and grease than other materials. They are often used in food service.

Autoclavable Antifatigue Mat

NOTRAX MATS FOR PROFESSIONAL USE

- Beveled edge
- Bubble Raised pattern surface
- Anti-Slip backing
- Gray color

This mat withstands exposure to hospital-grade cleaning chemicals and sterilization in an autoclave. It is made of materials that incorporate antimicrobial substances to prevent bacterial growth and provide some resistance to fungi and viruses. Used in operating rooms, labs, and other locations that require sterile equipment.

Standard Drainage Mats

Mats reduce fatigue and joint pain. Holes in mats allow water and other liquid hazards to pass through the top of the mat, reducing the likelihood of injury from slipping. They are suitable for use in wet areas that aren't exposed to oil, grease, heat, and chemicals.

ErgoDeck Interlocking Mat System

- ⅞ in thick
- Drainage mat tiles have square shaped holes
- 793G95, 793G97, 793G98, and 793GA1 are ISO Class 9

Standardized connections allow all styles of ErgoDeck tiles (antifatigue and drainage) to be connected in the same configuration. The locking system ensures tiles remain secure on uneven surfaces and allows mats to be rolled for cleaning. All mats can be rolled without disconnecting and can be cut to size in 3" increments. Drainage mats have holes to move liquids and small debris off the surface of the mat. Single mats can be replaced as necessary when damaged. Beveled edging works with all ErgoDeck mats and can be added as needed.

F.I.T. Interlocking Mat System

- ⅝ in thick

The F.I.T (Functional Interlocking Tiles) antifatigue and drainage mat system has square tiles that lock together to customize coverage over large or irregularly shaped areas. The locking system prevents tiles from separating over uneven floors and when moved or rolled up for cleaning. Standardized connections allow different tile types (antifatigue and drainage) to be connected in the same configuration. Beveled edging can be added as needed. Full tiles can be cut and reconnected in 3" intervals. Single tiles are replaceable.

Mat End Tile 5W779

Mat Center Tile 5W778

Diamond Top Interlock Interlocking Mat System

- ½ in thick
- Diamond plate surface
- Black rubber material

Interlocking mat tiles create linear runs in front of machinery or on walkways. Sometimes called runners, end pieces have one interlocking edge that connects to a center piece. Center pieces have two interlocking connections that fasten to the end pieces to create the full length. End tiles have integrated beveled edges. Pieces cannot be cut to size.

Cushion Connect Interlocking Mat System

- 1 in thick
- Mat tile has circle shaped holes

Drainage mat has integrated connectors that snap together to create a custom configuration. Large drainage holes have raised edges to quickly drain liquids and provide a slip-resistant surface. Nubs on the back flex to alleviate strain when standing for long periods of time. Beveled edging can be added as needed.

ESD Mats

Nonconductive (switchboard) mats protect workers from electric shock. **Antistatic and conductive mats** dissipate static electricity from individuals when standing on them; conductive mats accomplish this quicker. These mats protect and shield sensitive equipment from damage. The attached grounding cord on 5MDN2 to 5MDN4 provides extra protection. **Drainage mats** are reversible for longer life.

Sani-Trax Mats

Entrance mats clean and sanitize footwear at entrances to sensitive areas such as food processing plants or laboratories. Thick rubber borders allow the mats to hold sanitizing or disinfecting solution and immerse the soles of shoes as foot traffic passes. Flexible fingers bend to immerse soles, while also providing automatic scrubbing action to dislodge contaminants from footwear. Mats resist most chemicals and variations in temperature. Suction cups on the underside of the mats keep them in place.

Disposable Tacky Mats and Mat Bases

Remove dust, dirt, and bacteria from shoes, casters, and wheels. Adhesive backing prevents shifting and allows mats to be removed without leaving residue. Each mat contains 30 polyethylene film sheets that are numbered to help identify remaining quantity. Pkg. of 4. Can be used with optional bases or directly on smooth, clean floors.

Stair Nosings, Rung Covers, and Decks

Maintenance-free, easy-to-install products are engineered for industrial environments, offering maximum antislip properties and long service life. They feature steel construction with silicon carbide aggregate. Safety yellow color for visibility.

Stair Nosings—Grit-coated nosings reprofile the leading edge of stairs, increase the shoe contact area, and guard against slip hazards from weather or fluid spills.

Ladder Rung Covers—Epoxy-finish, grit-coated covers help reduce slipping risk by increasing friction and providing a larger surface for foot contact.

Metal Decks—Grit-coated deck plates provide traction and slip protection on metal grates or smooth concrete floors.

Anti-Slip Tape and Treads Definitions

Heavy—Has a very coarse (8-49 Grit) mineral-coated abrasive backing that is designed to handle heavy foot and equipment traffic. This durable, high-friction tape is used in muddy, greasy, and oily conditions such as on construction and farm equipment.

Medium—Tape offers a coarse (50-60 Grit) mineral-coated abrasive backing for general purpose use in medium traffic areas. This tape is recommended for flat surfaces, steps, and ramps where the traffic is less rigorous.

Light—Includes a fine (61-80 Grit) mineral-coated abrasive backing for use in light traffic areas. This tape is recommended for flat surfaces and ramps, such as entrances and exits, where some degree of friction is needed.

Wet & Barefoot—Tape has a non-abrasive (No Grit) textured surface designed for barefoot traffic in wet environments. It provides extra protection from slips and falls in areas where footwear is not worn such as around swimming pools, in showers, locker rooms, and on boat surfaces.

Anti-Slip Tape

These continuous rolls of anti-slip tape prevent slips, trips, and falls, and allow for customization in cutting tape lengths to fit the surface area needed. The level of traffic determines the tape durability and grit level needed on the tape's abrasive backing. All tape is for use in both indoor and outdoor applications, except 12E867 is for indoor use only.

Anti-Slip Treads

Treads prevent slips, trips, and falls and allow for uniform placement on surfaces. The level of traffic determines the tape durability and grit level needed on the tread's abrasive backing. 4HY92 and 12E817 glow in the dark. All treads are for use in both indoor and outdoor applications, except 3EYK4 and 3EYK7 are for indoor use only.

Details on page A1.

Floor Marking Tape Type Definitions

Extra-Durable—Designed to withstand environments with heavy traffic and moving equipment. This durable, abrasion-resistant tape works well for long-term floor marking, and maintains its vivid color even after exposure to pallet-dragging and forklift movement.

General Purpose—Used to designate lanes in environments with light to medium traffic flow. It's also useful for marking areas on walls or to show protruding hazards.

Message—Includes printed messages on the tape to alert personnel of hazards, inform them of restricted areas, or remind them to wear protective gear. Messages are printed repeatedly along the length of the tape in high-contrasting bold lettering for easy visibility.

Glow-In-The-Dark—The material in this tape has photoluminescent properties that provide a bright, long-lasting afterglow in the event of a power outage and loss of light. This tape ensures that walkways, steps, door frames, and handrails are visible so personnel can safely exit a building.

Reflective—The material in this tape reflects light to provide visibility in low light areas. This tape is useful in designating walkways, highlighting surfaces in loading docks, and ensuring visibility of protruding objects.

Textured Grip—Features a raised pattern on its surface to provide extra traction to prevent slips and falls. It is useful in designating walkways, marking hazards, and indicating where items should be placed. This tape removes cleanly after it's applied and is useful in busy facilities with foot traffic.

Freezer—Used in walk-in freezers or cold storage facilities. It can be applied at freezing temperatures, eliminating the need to defrost the freezer prior to application. This tape is thicker than general purpose floor marking tape and removes cleanly after it's applied.

Extra-Protective Overlaminate—This clear tape is made of a durable overlaminate for applying on top of floor marking tape. It provides an extra layer of protection against wear and tear while ensuring that the messaging and bright coloring of marking tape stays visible.

Floor Marking Tape

These continuous rolls of floor marking tape are used in facilities such as warehouses and factories. The tape backing material is vinyl for all brands except Brady, which are Polyester. Tape adhesive material is rubber for 3M, Mighty Line and Brady products.

Floor Marking Shapes

Precut shapes of floor marking tape have a pull-away liner to assist with application and remove cleanly after use. Tape adhesive material is rubber for Mighty Line and Brady products. Colors are available to instill organization methods such as 5S for L-, T-, Cross-, Rectangular and Arc-shaped tape. 6XU48 glows in the dark.

L-shaped floor marking tape is used to designate corners for placing items. Smaller shapes can be used on workbenches or shelves, while larger shapes are used on warehouse and factory floors.

T-shaped tape is used to designate corners for item placement on floors, such as for pallet rows.

Cross-shaped tape is used to mark intersections or corners for item placement on facility floors, such as pallet rows.

Rectangle-shaped floor marking tape is precut and used to designate areas for placing items.

Arc-shaped tape is used to designate areas for placing items, or to mark hazards on facility floors.

Arrow-shaped tape is used to direct equipment or pedestrians and indicate the direction of traffic flow.

Footprint-shaped tape is used to guide pedestrian traffic toward designated areas or exits.

Circle-shaped tape is used to mark areas for equipment placement, or to designate a waiting location for personnel.

Square-shaped floor marking tape designates areas for item storage or for people to stand when waiting.

Octagon-shaped floor marking tape resembles a stop sign to alert pedestrian traffic to stop. A customized message can be written on the surface with a permanent marker.

Pedestrian-shaped floor marking tape indicates a place for people to stand while waiting, and to encourage social distancing.

Safety Sign Information

Signs prevent injuries by alerting staff to hazardous conditions and putting important information at the point of need. Compliance signs like OSHA and ANSI are available in a variety of materials.

Customize signs for your specific needs online at the Grainger Custom Product Center. Go to grainger.com/content/custom-product-center.

Photoluminescent—Pigments in the material absorb ambient light and glow in the dark.

Retroreflective Grade—Describes the levels of available reflectivity in Traffic Control Signs. Retroreflective material is made using tiny glass beads which reflect light directly back toward its source. Available in **Diamond Grade-(D), Engineering Grade-(EG), or High-Intensity Prismatic Grade-(HIP).**

COMPLIANCE

OSHA 1910.145 and ANSI Z535 require that safety signs be used to identify and define specific hazards that, without identification, could lead to property damage or accidental injury of workers and/or the public.

MATERIAL TYPES

Aluminum-(A)—Abrasion- and chemical-resistant. For indoor/outdoor use.

Fiberglass-(F)—Longest-lasting material. For outdoors or harsh environments.

Non-PVC Polymer-(NPVCP)—Flexible plastic does not contain PVC (polyvinyl chloride). For indoor use.

Polyethylene-(P)—Polyethylene terephthalate. This type of plastic has a clear protective coat; For temporary or light use.

Plastic-(PETG)—This plastic is more pliable than polyethylene and better suited to extreme temperatures. Clear protective coat; for indoor/outdoor use.

Magnetic Vinyl-(MV)—Flexible vinyl, magnet-backed signs adhere to metal surfaces and have a clear liquid laminate coating. For indoor/outdoor use.

Self-Adhesive Vinyl-(S)—Signs are high-gloss, durable, flexible vinyl for indoor/outdoor use.

Self-Adhesive Glow Vinyl-(GV)—High-gloss, durable, flexible vinyl for indoor/outdoor use. Photoluminescent material absorbs ambient light and glows in the dark.

Chemical, Gas and Hazardous Material Signs

Warn workers of nearby materials or conditions that could cause injuries. Not retroreflective.

For more information on safety sign compliance and material types, see page 1882.

Confined Space Signs

Deter unauthorized entry into confined spaces like access shafts, manholes, sewers, tunnels, tanks, and silos. Signs help prevent injuries from entrapment, engulfment, or hazardous atmospheric conditions. They are commonly posted where there's a danger of being trapped or engulfed by flame or water. Not retroreflective.

Condor

Industrial Vehicle Traffic Signs

Call attention to forklifts, trucks, and other moving vehicles and specify driving and loading procedures. These signs encourage drivers and pedestrians to take precautions against accidents. They may mount directly to a vehicle to call out hazards such as blind spots and wide turns or may be posted near high-traffic areas such as loading docks and shipping and receiving areas. Not retroreflective.

Condor

Lockout Safety Signs

Lockout safety signs, also known as LOTO signs, remind workers to follow lockout and tagout procedures when servicing equipment. These signs help prevent injuries by reducing the possibility of an unexpected startup when servicing a machine. They are commonly posted near machinery lockout points and they are also used to identify locked-out equipment and mark safety centers where equipment is stored. Not retroreflective.

Fire Safety and Emergency Signs

Help people locate the nearest fire and emergency equipment. Signs enable rapid responses to emergencies by identifying equipment such as gas and water shutoff valves, telephones, fire extinguishers, alarms, and hoses. Glow vinyl signs help guide the way during power outages or in low-light conditions. Not retroreflective. For more glow vinyl options, visit Grainger.com.

Facility Signs

Communicate basic information about exits, restrooms, trash, recycling and workplace policies. **Conservation Signs** remind workers and visitors to throw away trash and recycle materials. **Perimeter Safety Signs** warn people of potential hazards such as automatic doors and gates, elevator shafts, unstable structures, quarantine areas, and demolition zones. **Wayfinding and Directional Signs** let people know the correct way to go in facilities. **Workplace Signs** identify workplace policies regarding policies and rules around gun control, cell phone restrictions, housekeeping guidelines, food and drink restrictions, and restroom identification. For more facility sign options, visit Grainger.com.

CYALUME Technologies

Emergency Lightstick Stations

Help provide dependable light during power outages. LightStations are designed to hold 10" yellow SnapLight lightsticks that glow for 4 hr. and are visible up to 1 mi. in fog or smoke. Photoluminescent label on front cover helps to locate station. Emergency Evacuation System contains 6" yellow ChemLight lightsticks that glow for 2 hr. Wall mountable.

LightStation Model 20—Heavy-duty molded plastic case. 1 lightstick is activated when front cover is opened. Great for large common areas.

Evacuation System—High-intensity lightsticks provide enough light to prevent falls, slips, and trips near exits, hallways, fire extinguishers, and stairwells. Both lightsticks are activated when front cover is opened.

General Purpose Blank Metal Valve Tags

Blank valve tags are attached to valves to mark important pipe content information, valve identification, or operation information at the point of need. These are used also when pipes are too small for pipe markers. They are attached to the outside of a valve with a wire, beaded chain or zip ties. Stamp description directly onto tag. Steel hand stamp kits are available on page 1901.

Tamper-Evident Seals

BRADY · C.H. HANSON

Security seal presses crimp the wire on lead and wire seals. Crimping the wire provides a more secure seal than soft wire, allowing the seal to secure doors, containers, and other applications where tamper resistance is required. Once crimped, the seal can't be opened without detection.

Lead and wire seals provide tamper evidence if broken, making them ideal for light security and loss prevention in agricultural, law enforcement, storage, and utilities applications. They're placed on water meters, drums, and hoppers and are sealed by passing the wire through the metal disc, then crushing the disc with a press.

Lead and wire seal components replace used or broken elements from lead and wire seals.

Stencils

Easy-to-use stencils provide clear and legible warnings, precautions, and signs. Can be used with a variety of spray or brush-on paint.

BRASS ADJUSTABLE

Characters interlock by sliding adjacent grooves together. Easy to disassemble.

13-Pc. Number Kits—Include: one each of 0 to 9, beginner and period characters, and plain ender.

15-Pc. Number Kits—Include: one each of numbers 0 to 9, two large spacers, one dash, and one period.

33-Pc. Letter Kits—Include: one each of A to Z, ampersand (&) symbol, beginner, comma, dash, period, period ender, and spacer.

46-Pc. Number and Letter Kits—Include: one each of letters A to Z, numbers 0 to 9, comma, dash, and ampersand (&). Also include two each of large spacers, small spacers, and periods.

92-Pc. Number and Letter Kits—Include: four each of letter E; three each of A, I, N, O, S; 1 of Q; two each of remaining letters and ampersand (&) symbol; three each of numbers 1 and 0; two each of 2 to 9. Also one each of beginner, comma, dash, period ender, and plain ender; two periods; and three spacers.

PVC ADJUSTABLE

Characters interlock by sliding adjacent grooves together. Easy to disassemble.

138-Pc. Number and Letter Kits—Letters include six each of A, E, R, and S; three each of all other letters. Numbers include three each of 0 to 9. Also include three each of small spacers, larger spacers, periods, dash, dollar symbols ($), and ampersand symbols (&).

SAFETY LEGENDS

Flexible, PVC stencils are precut for application to numerous surfaces.

PARKING LOT LEGENDS AND SYMBOLS

Flexible stencils are made of high-impact, chemical-resistant plastic.

Adhesive Pipe Markers

BRADY

Markers are attached to pipes throughout a facility or worksite to communicate the contents of a pipe. They are color coded and have printed text that defines the contents flowing through the pipe. The adhesives help ensure proper safety procedures are followed and help workers solve potential problems more efficiently. Products are vinyl and for indoor and outdoor use. Marker ends should be banded with directional flow arrow tape, available separately, to indicate pipe content flow direction. Meet ANSI A13.1 Standards when used with directional flow arrow tape, sold separately on page 1896. Pkg. of 5.

Adhesive Ammonia Refrigeration Pipe & Component Markers

Markers identify pipes containing ammonia. These markers define the specific type of ammonia, the physical state or phase of ammonia, the pressure level, and the direction that the ammonia is flowing. They are attached to pipes to ensure visibility.

Snap-On, Strap-On and Wrap-Around Pipe Markers

- Each includes 1 pipe marker

Markers offer 360° visibility with repeating legends. They may be applied to dirty, oily, greasy, or rough surfaces in outdoor and indoor environments. Markers are also designed to be lightweight and durable and can be removed and reapplied in other areas. Meet ANSI A13.1 standards. Nonadhesive, coiled **Snap-on markers** "snap" around the pipe for quick installation. **Strap-on markers** are nonadhesive flat sheets that attach with nylon straps. **Wrap-Around markers** have an adhesive edge to secure the marker to the pipe.

Adhesive Pipe Marking Arrows & Banding Tape

Arrows and tape wrap around pipes to increase visibility and mark the directional flow of the contents within the pipe. They are used in conjunction with pipe markers. Brady and Harris Industries products are vinyl and for indoor and outdoor use. Incom tape is polyethylene and for indoor use only.

NFPA Placard Signs and Kits

- Signs and kits meet the NFPA 704 Standard; die-cut numbers and letters meet ASTM D 2979

Placard signs and kits keep your facility in compliance and employees informed of potential hazards. All signs have 4 mounting holes. Signs and die-cut numbers are not retroreflective.

3AC37—Placard graphically explains the National Fire Protection Association (NFPA) hazard identification coding system. Use indoors or outdoors.

6KXW7—Printed aluminum flip panels display the four hazard categories and allow any possible combination to display the proper NFPA hazard information. Ideal for areas where hazardous materials or chemicals change. A plastic face plate fits over the placard to keep in place.

5AZ67, 2BC56, and 3AC80—Placards show the red, blue, yellow, and white NFPA diamond and do not have text. Use die-cut numbers (sold separately in this ad) and letters to mark the corners of placards.

NFPA Placard Sign Kits are designed to help users create customized placards quickly.

Interlocking vinyl **Numbers** are self-spacing and self-aligning. Find more Quick-Align numbers and letters on page 1900.

Steel Hand Stamps

Use to permanently mark tools, components, nonmetals, and various metals. Character and size are indicated on the thumb side. Impressions are Gothic letters. For manual (tempered stamping head) or mechanical use.

Letter sets contain 27 stamps: A to Z and an ampersand (&) symbol. Number sets include 9 stamps: 0 to 8 with 6 also serving as a 9.

Combo sets contain a complete set of both letters and numbers and are packed in a plastic case.

General-Purpose—For medium- and light-duty marking. Can be applied on soft and hard metals without heat treatment.

Heavy-Duty—Designed for deeper marking in industrial applications. Can be applied on soft and hard metals without heat treatment.

Premier Heavy-Duty—Feature larger shanks that require less force and create better impressions in industrial applications. Can be applied on soft and hard metals without heat treatment.

Low Stress Full Character— Designed for bold characters and light marking on soft metals and nonmetals.

Rhino Series—Largest shanks create excellent marks and require least force. Can be applied on soft and hard metals without heat treatment.

Low Stress Dot Design—Dot character design is suitable for bold characters and light marking on soft metals and nonmetals.

Cr-V Steel Plate—Deliver professional results and durability. Can imprint metals up to Rockwell C58 to C62 hardness.

Steel Stamp Holder Kits

1F118

Make legible impression of a series of characters with one hammer blow. Use on a wide range of metal surfaces. ⅛" and 3⁄16" holders have 15-character capacity; ¼" holder has 12-character capacity. Letters/numbers/blank spaces must always equal holder's full capacity. Each kit includes 48 individual pieces: letters A to Z (2 each of A, E, R, O, S, I, U, and T), numbers 0 to 9, a dash, and 3 blank spaces.

Steel Hand Stamps

18G327

18G269

Make permanent marks on durable materials, including wood and many metals. Excellent for labeling tools, keys, machine components, and more. Rockwell hardness is 50C.

Machine-Made—General purpose stamps provide deep, clear impressions. One thumb groove. Letter sets contain 27 pieces: A to Z and a period. Number sets contain 9 pieces: 0 to 8. Combo sets contain 36 pieces: A to Z and 0 to 8.

Specialty—Locksmith-specific stamps each contain standard messaging identifying keys as "Master," or instructing to "Do Not Copy" or "Do Not Duplicate".

Symbols—Heavy-duty set includes commonly used symbols. All contain 5 pieces: arrow, plus sign, star, asterisk, and pound sign.

Steel Letter and Numbers Hand Stamps

Use with a handheld hammer to permanently mark tools, components, locks, and various metals. Impressions are Gothic letters. Character and size are indicated on the thumb side. Each contains a complete set of letters and numbers, packed in a steel index box that can fit into tool boxes.

Standard are cost-effective stamps for general purpose use.

Premier stamps have large, tempered shanks to help provide extra safety under continuous hard hammering.

Reversed stamps provide raised markings on thin metal or forging dies, or in embossing and mold applications.

Low Stress designs produce minimum stress on marked metal. Meet U.S. DOE Nuclear Energy Standard RDT F 7-3T.

Label Printer Information

Label printers create messages and display information on labels and tags to convey safety information and identify equipment and supplies. Labels, ribbons, and ink fit into a compatible printer. Accessories keep printers in good working order.

PRODUCT TYPE:

Handheld label printers do not require a connection to a computer and can be carried to the jobsite.

Portable label printers are larger than handheld printers and are designed to be set on a work surface when printing. They do not require a connection to a computer and can be carried to the jobsite.

Desktop label and tag printers will produce a wider range of label and tag sizes than handheld and portable label printers and are often used for high-volume printing.

MODE OF OPERATION:

PC Connected—These printers require a connection to a computer. They often use software that utilizes templates to print labels with a consistent appearance.

Standalone—These label printers have a keyboard or keypad for entering information. They don't require a connection to a computer to print labels.

Safety Training and Reference Materials

Materials are used to maintain regulatory compliance, help improve productivity, and ensure safe working conditions. They provide quick reference through new pictograms and a safety data sheet (SDS) format for physical, health, and environmental hazards required by the HazCom GHS system.

Book/Booklets—Provide information to help your employees navigate HazCom 2012/GHS's classification and labeling standards.

Posters and Wallet Cards—Easily convey the pictograms and safety data sheet (SDS) format for physical, health, and environmental hazards required by the HazCom Globally Harmonized System (GHS). Poster 45H627 includes a training card.

Grainger EH&S Digital Solutions

Get fast, easy solutions to manage, track, and maintain workplace environmental, health and safety activity from your computer. Designed to help reduce injuries, accidents, and associated costs. Tools include:

Learning Management System (LMS) for administering and tracking safety training and documents.

Specialized Online Training courses that meet current safety standards and regulations.

Safety Data Sheet (SDS) Management for site-specific SDS and Globally Harmonized System (GHS) requirements.

Safety Assessment and Compliance Monitoring platform with reports and smart forms for actionable findings and corrective recommendations.

Incident and Inspection Management software that monitors the complete life cycle of all incidents and provides insight into potential incidents.

Occupational Health Tracking of audiometric and pulmonary test data, as well as respirator medical clearance.

Grainger Online Services are provided by Grainger Safety Services Inc., an affiliate of W.W. Grainger Inc.

BRADY

Visual Lockout Procedure Authoring Service

Maintain standards, compliance, and workplace safety with clear, machine-specific lockout/tagout instructions tailored to your facility. This service provides a complete set of the required written shut-down procedures for equipment in your facility.

How It Works

Brady field engineers gather machine-specific information and install color-coded energy tags on power sources at your site. The Type 1 procedures they produce have clear, step-by-step lockout instructions, equipment photos, and energy points, to help ensure employees can correctly and consistently lock out equipment to avoid unexpected electrical energization or startup.

What You Get

A binder of laminated point-of-use procedures, along with digital copies and a standardized template for ongoing updates to maintain compliance with Lockout Tagout Standard 1910.147.

Note: A separate Visual Lockout Procedure Installation Service is available; contact your Grainger Representative for more information.

BRADY Condor Master Lock

Circuit Breaker Lockouts

- Padlocks and lockout tags not included

Prevent accidental engagement of electrical circuits during maintenance.

Single-Pole Breaker Lockouts—Used to lock out circuit breakers with a standard toggle switch. Snap-on models work on breakers with holes in the side of the switch. Bar clamp or clamp-on models work on switches with or without holes. Use cleats with clamp-on lockout to assure positive restraint for breakers with long sliding switch throws.

Multipole Breaker Lockouts—For use on common trip circuit breakers that have two or more switches joined by a tie bar. 1D671 uses thumbwheel for secure fit on extra-wide range of breaker sizes. 3WNZ1 kit includes 1 Lockout Pouch, 1 Multipole Circuit Breaker, 1 No-Hole Circuit Breaker, 277V, 1 No-Hole Circuit Breaker, 480/600V, 1 Single-Pole Circuit Breaker, and 2 Lockout Tags.

Oversized Breaker Lockouts—Fit breaker switches up to 2¼" wide and ⅞" thick.

3-Phase Breaker Lockout—Works on single-, double-, and triple-pole circuit breakers. Fits over switch; no holes required. Tighten with screwdriver (not included) and secure with padlock.

DIN-Style Miniature Breaker Lockouts—Breakers are designed to mount to DIN rails. 3 styles; pin-in, pin-out, and tie bar. All pin-in and pin-out styles are used with single or multipole breakers. Pin-out style comes in standard and wide size. 2VU37 is used with multipole breakers that have a tie bar.

Circuit Breaker Lockouts—Properly lock all types of circuit breaker locations. Use 2XU96 for breakers that have a hole in the switch tongue. 2XU97 is for breakers that do not have a hole in the switch tongue. 2CJL3 Flexible Cable Shackle includes steel padlock with 5" steel cable. Numerous key changes minimize key duplication.

Blocking Bar Lockout—Installs to electrical panel in minutes. Use red arm to lock in Off position, or green bar to lock in On position. Includes two 4" L mounting rails, one 7⅗" L red blocking bar, one 7⅗" L green blocking bar, and 3 alcohol wipes.

Electrical Lockout Devices

Universal Plug Lockouts—Accommodate various cord diameters and high- and low-voltage plugs.

Small/Large Plug Lockouts—Devices accept lock or nylon tie to prevent a plug from being inserted in a wall outlet. 3VAF2 can be used to lockout pneumatic male fittings attached to compressed air hoses.

Plug Prong Lockouts—Use with existing lockout padlocks or lockout hasps with built-in lock.

Cinch Sack Plug Lockouts—Designed for oversized, awkward, and hard-to-reach connections. Accommodate up to 6 padlocks.

Wall Switch Lockouts—Hinges open for unobstructed operation of switch.

Emergency Stop Safety Covers—Install over push/pull or twist/release emergency stops.

Push-Button Safety Covers—Completely cover button to prevent access.

Cable and Pneumatic Lockouts

Tab- and Grip-Cinching Cable Lockouts—Cable cinches tight to provide better security than chains. 3MT22 allows you to squeeze device to tighten cable, then insert your padlock to secure the handle. 5TA71 has a built-in loop to keep cable coiled for easy transport and storage.

Retractable Cable Lockouts—Self-winding mechanism automatically cinches the cable with the push of a button.

Adjustable Cable Lockouts—Flexible for use on side-by-side gate valve lockouts or multiple circuit breaker panels at the same time.

Pneumatic Lockouts—Isolate pneumatic devices without installing in-line lockout valves. No. 2CJN1 works with lockout hasps for multiple worker lockout.

Condor BRADY Master Lock

Valve Lockouts

Gate Valve Lockouts—Fit most round-handle gate valves. Nonadherent plastic construction resists chemicals and hot/cold temperatures. Brady models' knockout feature accommodates OS&Y or "rising stem" gate valves.

Adjustable Ball Valve Lockouts—3TAP3, 2VU39, 3TAP1, and 3TAP2 can also be used to lock valves open on pipes from ½" to 1¼" dia. 4EMY9 lockout is suitable for tight locations near pipes.

Universal Ball Valve Lockout—Pouch-style with strapping and locking mechanism. Design removes handle and conceals valve stem, eliminating reactivation.

Standard Ball Valve Lockouts—Designed for locking out quarter-turn ball valves with flat "dog-leg" handles. 1-pc. devices fit all major brand ball valves.

Universal Valve Lockouts—Single device locks out most ball, butterfly, and gate valves. Industrial-grade steel and nylon construction is chemical- and corrosion-resistant.

Plug Valve Lockouts—Compact and easy to use, effective for difficult-to-secure plug valves. Fit most manually-actuated plug valves. Durable and tamper resistant.

Butterfly Valve Lockouts—Solvent- and chemical-resistant. Resist cracking and abrasion.

Gas Valve Lockouts—Protect against accidental valve opening. 2CJN2 fits all pressurized gas valves up to 3" dia. and works with valve guard in place.

Safety tags help prevent injuries by reducing the possibility of an unexpected startup when servicing a machine. They are commonly posted near machinery lockout points and they are also used to identify locked-out equipment and mark safety centers where equipment is stored. Tags feature a write on surface with a ⅜ in hole size. All tags have a black legend color. Equal number of nylon ties included with each package.

Padlock Lockout Labels

Labels help prevent injuries by reducing the possibility of an unexpected startup while someone is servicing a machine. They are typically posted on or near padlock lockout points, and also used to identify owners of lockout padlocks. All labels have an adhesive mounting style. Not retroreflective.

BRADY Condor Master Lock

Padlock Lock Boxes, Stations, and Cabinets

- Padlocks sold separately; see page 1954 and 1955

Plastic Lock Boxes—Clear acrylic window provides visual check of contents. Wall-mountable with predrilled holes. 5TB19 and 5TB20 include attached plastic hooks. 3PDE2 and 5TA68 feature built-in lock rail and snap-in key hooks.

Steel Lock Boxes—Brady models are tamper-resistant. Master Lock models are wall-mountable with a stainless steel handle. Lockout message on box is in English, Spanish, and French. All boxes feature a powder-coat finish.

Steel Stations—Plastic-coated 14-ga. steel construction.

Cabinets—Durable PVC cabinets are excellent for office environments. 3ZG26 includes pegs for 8 keys. 3ZG27 has 20 key hooks. 15Y607 is a lockable steel cabinet with 2 keys.

Padlock Caddy—Features ergonomic handle, belt slots, and lanyard for keys. Plastic construction.

STROBE LIGHTS

Streamline Low-Profile—Use on control panels, forklifts, and other flat or flush surfaces where space is limited. 7000-hr. lamps: 65 to 95 fpm; 4000-hr. lamps: 80 fpm. NEMA 4X, except 5WF84 and 5WF85 are NEMA 3R.

Electraflash—Use on maintenance vehicles or material handling equipment. 80 fpm. NEMA 3R.

Fireball—Vibration-resistant light provides a superior visual signal in high noise industrial environments. 90 fpm. NEMA 4X.

Starfire—Intense double-flash for use in a variety of emergency warning applications. 80 fpm. NEMA 3R.

REVOLVING LIGHTS

Electraray—Designed to be easily accessed for quick inspection and replacement. 90 fpm. NEMA 4X.

Commander LED—Heavy-duty lights employ a reflector-focused 12-LED array to produce a high-intensity beam that rotates 360°. NEMA 4X.

STEADY BURN LED LIGHTS

StreamLine Low Profile—For a variety of applications where space is limited. NEMA 4X.

WARNING LIGHT WALL-MOUNT KIT

Includes bracket, plate, and mounting screws. Suitable for NEMA 3R applications.

VEHICULAR WARNING LIGHTS

851 Series—For harsh environments. Feature open-style aluminum base with built-in high/low double flash.

Firebolt—Economical light with replaceable strobe tube. Features 14 selectable flash patterns. Magnetic-mount model 35ZX17 includes 10-ft. power cord with plug adapter.

SOUND SEAL CONTROLLING NOISE IN EVERY ENVIRONMENT · Auralex acoustics

Noise Absorbers

- Sound Seal products meet ASTM E84 Class I Fire Rating; Auralex Portable Screens meet the CAL 117 Standard

Eliminate noise and echo in industrial and community environments.

Wall Blanket—Abrasion-resistant fiberglass blanket has one quilted side and is impervious to dirt, grease, and solvents. Mounts on walls, ceilings, or anywhere with hard reflective surfaces. Edges are sewn and finished. Also has 4 grommets for easy installation.

Portable Screens—Use screens individually or in groups to form partial noise enclosures. 19MP54 and 19MP55 each include 2 panels and 2 round base stands. 19MP55 is sized to fit on a desk. 5T512 offers an absorber curtain quilted on one side with a reinforced vinyl barrier on the other and a powder-coated tubular steel frame stand.

Overhead Sound Baffle—Standard economy baffle has a smooth casing.

Acoustical Ceiling Tiles—Designed to replace existing grid ceiling tiles. Feature a black matte facing attached to a yellow, rigid fiberglass board.

Decorative Fabric Panels—Ready-to-mount panels feature fabric-covered 6- to 7-lb. density fiberglass core that provides maximum noise absorption. Mount easily to walls, partitions, or any flat surface.

Auralex acoustics · SOUND SEAL CONTROLLING NOISE IN EVERY ENVIRONMENT

Acoustic Foam Sheets and Quilted Absorber Rolls

Can be easily cut into custom sizes and applied to most surfaces.

Convoluted Foam Sheets—Open-cell cone-shape polyurethane foam. Provide greater absorption to surface areas than flat foam. Ideal for low- to mid-range frequency sound absorption. Resist oil, alkali, and mild acids. Not for use near open flame or sparks. Sound Seal sheets temp. range: -45° to 250°F.

Flat K-Foam Roll—2-lb. density, open-cell flat polyurethane foam provides excellent absorption over a broad frequency range. Not for use near open flame or sparks. Aluminized Mylar-faced roll is impervious to water, dust, and oils, and is cleanable. Resistant to moisture and lubricants. Temp. range: -20° to 120°F.

Quilted Fiberglass Absorber Rolls—Aluminized facing is abrasion-resistant and impervious to water, dust, oils, grease, and most solvents. Rolls easily attach to walls or other surfaces. Temp. range: -30° to 250°F. 1VDL9 is used for most broadband noise problems, and 1VDP5 is for noise levels higher in low-frequency bands.

Traffic Control Signs

Communicate traffic rules and warnings and make drivers aware of crosswalks, railroads, road conditions and road construction zones. These aluminum signs are commonly posted near public and private roadways, parking lots, and railroads. HIP sheeting provides higher reflectivity than D or EG sheeting.

BlinkerSign Flashing LED Traffic Signs

- Meet MUTCD requirements
- Programmed to flash 24/7

All signs are aluminum and 0.08-in thick. Offer high-visibility LED lights and 3M reflective sheeting. Have a 100,000 hr LED life expectancy.

Pedestrian Crossing signs have an MUTCD code of W11-2; School Crossing signs are S1-1, and Stop signs are coded R1-1.

Roll-Up Signs

Eastern Metal Signs & Safety EASTERNMETALSIGNSANDSAFETY.COM

- Meet MUTCD requirements
- Diamond shape

All roll-up signs have an orange background with black text and quickly alert drivers and pedestrians of hazards. Not retroreflective signs are designed for daytime use only; retroreflective signs provide a highly visible warning and are for day or evening use. Feature standard fiberglass battens with lock pockets. They fit federally approved sign stands. Include storage bag.

FLAREALERT LED LIGHTING

LED Safety Lights

Water-resistant, crush-resistant, reusable flares produce 360° beacons of light that can be seen for miles. The magnetic base lets you elevate the light for better visibility. Require 4 AA batteries, not included except in kits.

0.5W LED light battery life is 40-hr steady, 140-hr flash. 1W LED light battery life is 20-hr steady, 60-hr flash.

Kits H5599, H5595, and H5596 include cone adapters that hold 1 or 2 lights vertically and weighted bases to keep lights firmly in place when marking a traffic pattern or landing zone.

Rechargeable flares are a safer alternative to traditional incendiary flares. Crush-resistant body with impact-resistant rubber housing. Waterproof. Intrinsically-safe design with rubber-tight seals. Include a 120V wall charger and 12V vehicle charger.

LED Baton Traffic Flares and Kits—Have a ½"W LED flashlight and 14 signal LEDs visible up to ½ mi., to use as an emergency road flare or handheld safety wand. Feature five different flash patterns.

Super LED Road Flares and Kits—Have 24 LEDs and 2 rows of lights to boost visibility up to 2 mi. 7 flash patterns. 4-Pack Kits are great for first responders.

Flex-Fit Tripod—Use to elevate flares in a vertical position for greater visibility.

Flashback Three Light Batons

Flashback Five Illuminator Light Baton

LED Light Batons

Range of up to 1 mi. Batteries not included. Feature nonslip textured grip, magnetic tailcap, built-in belt clip, and wrist strap.

Flashback Three Light Batons—3-stage switch provides flashing light, steady light, and an endcap flashlight. Weather-resistant, high-impact ABS plastic body.

Flashback Five Illuminator Light Baton—5-stage switch provides red, blue, red/blue alternating, red/blue blend, plus 360° constant-on white light.

Flashback Traffic Controller Light Baton—3-stage switch provides green and red steady light and endcap flashlight. High-impact weather-resistant ABS plastic body has a nonslip textured grip, built-in belt clip, wrist strap, and magnetic tailcap.

Flags, Windsocks, and Pennants

Throwaway Warning Flags—Use to mark utility poles and rights of way, and to identify truck loads. Pkg. of 100.

Handheld Warning Flags—Fluorescent color provides high visibility. Reinforced to prevent ripping and tearing. Include 24" wooden dowel. 1EKR8 with plastic stay keeps the flag open.

Windsock Kits and Replacement Socks—Kits include a windsock and an aluminum mounting frame. Replacement windsocks are made of PVC and nylon for durability; color resists fading.

Banners—Message printed on one side with black letters. 52VP37 is constructed of vinyl coated 1000 denier polyester mesh fabric. Includes (6) grommets and (6) 40" ropes.

Colored Pennants—Sewn onto reinforced polypropylene cording.

Traffic Barricades and Accessories

- Meet MUTCD and NCHRP 350, except 3YVX4, 20PF67, 20PF54, 3LUU8, and 1EKT5
- 13P868 and 13P869 are ADA Compliant to MUTCD

High-Intensity tape provides higher reflectivity than Engineer Grade.

Barricades—Used on highways and municipal roads, or as warning devices around potentially dangerous areas. Feature recessed and replaceable panels. Polypropylene construction. Accommodate flashing barricade lights, sold separately, this page.

Type 1—Single-striped panel has a 12" x 24" reflective top panel and a 4" x 24" nonreflective bottom panel.

Type 2—Two striped reflective panels are 8" x 24" on top and bottom.

Narrow Vertical Barricades—Easy to fold and transport.

Barricade Systems—All-plastic construction. For use in road closure situations where complete coverage is needed.

Type 3—Complete barricade system with three striped reflective panels; 6FGL0 8" x 48", 3LWG1 8" x 96", and 7Y499 8¼" x 48".

Barricade Weight Ballast—1EKT5 provides 4-lb. weight to barricade leg. 2KCX2 includes 2 arrow panels and hardware to convert a traffic barricade into a directional barricade.

A-Frame and P-Cade Legs—Used to protect workers in work zones and around manholes, and to cordon off restricted areas and parade routes. P-Cade Legs provide a continuous, obstruction-free guidance system. Lower rail will not trap canes. I-Beam is sold separately. An additional I-Beam can be mounted in the lower section of A-Frames for increased visibility. Weighted models include two 5-lb. inserts per leg.

I-Beams—Exterior-grade PVC provides year-round, all-weather durability.

ADA Warning Pads

- TufTile pads comply with ADAAG/PROW/CA Title 24
- UltraTech pads comply with ADA 49 CFR 37.9

Raised, truncated-dome pads can be felt by the visually impaired with their feet and tapping cane.

TufTile pads are replaceable. Made of UV stabilized, high-impact polymer that is impact-, slip-, and wear-resistant and provides superior color stability and strength.

UltraTech pads are unbreakable, flexible urethane material that conforms to fit dips, slopes, and inclines in sidewalks and intersections.

Wet Set Pads—Pressed into freshly poured concrete. Each includes factory-installed anchors with tamper-resistant stainless steel fasteners.

Surface-Mount Pads—Install quickly and easily onto cured concrete.

TufTile pads feature low-profile design and beveled edges. Include anchors, tamper-resistant stainless steel fasteners, sealant, and a masonry bit.

UltraTech pads include adhesive and anchors.

Speed Bumps, Cable Ramps, and Mounting Kits

- Rubber products are made from 100% recycled content

Speed Bumps—Use to aggressively slow down traffic close to a stop. Also cover cabling, piping, and have channeled bottom for drainage. Bumps with hardware included allow easy installation and different length requirements. Include 1 center, 2 end modules, and mounting hardware.

Alley Bumps—Multipiece bumps address cut-through traffic in alleyways by drastically slowing vehicle speed. One center and two end modules are included to accommodate different length requirements.

Portable Speed Bump—Protect workers and pedestrians in 15 to 45 mph speed areas by helping to temporarily control traffic flow. Bump conforms to virtually any road surface and can be deployed and retrieved in seconds.

Note: This temporary solution is not meant to be left unattended or used on high-speed roads.

Speed Humps—Use on roadways to moderately slow traffic. Humps alert drivers of pedestrians and hazards ahead.

Cable Ramps—Drop-over ramps are placed over cable and hose lines that run along the ground and they are lightweight. 2GWL7 to 2GWL9 are wider to increase channel height while retaining incline. Aluminum ramps have a serrated surface to increase traction, and they're lightweight for portability. Polyurethane ramps have indents for traction and are weather- and chemical-resistant.

Speed Bump Glue Down Kits—For applications where drilling holes in the mounting surface is not recommended. For 72"L speed bumps order 2 Glue Down Kits 5XPR8.

Traffic Channelizer Cones and Bases

Channelizer Cones indicate hazards and direct foot and vehicle traffic. They're more narrow than standard traffic cones for use where space is limited. They are also used to temporarily block access to restricted areas where work is being done. High-Intensity tape provides higher reflectivity than Engineer Grade. Handle choices for easy movement and placement. Stackable for storage. Accept standard barricade lights, sold separately on page 1927. All cones are made of HDPE, except 45YJ67 to 45YJ70 are polyethylene.

45YJ67 to 45YJ70 offer slotted handles designed to string tape, chains, cone bars, and more. Include a black plastic, octagon-shape base that can be filled with sand.

Black recycled rubber **Bases** offer stability to keep cones upright.

Traffic Vertical Panel Channelizer Cones and Bases

Stackable cones warn of hazards and direct foot and vehicle traffic. Narrow design is ideal where space is limited. Often used to temporarily block access to restricted work areas.

Channelizer Cones have (3) 4"H white reflective stripes and an oversize handle with comfort grip. They are equipped with recessed panels to protect sheeting. Built with a mounting receptacle for flashing light, sold separately on page 1927. High-Intensity tape provides higher reflectivity than Engineer Grade. Meet NCHRP 350.

Recycled rubber black **Bases** attach to the bottom of panel channelizer posts and provide a flat surface so the posts can stand upright. 13P905 meets NCHRP 350.

Traffic Barrels and Bases

- Barrels and Bases meet NCHRP 350; 13P893 to 13P896 and 13P904 also meet MUTCD requirements

Orange plastic **Traffic Barrels** indicate hazards and restrict access to work zones. The wide body makes them more visible than standard traffic cones. The larger size and added weight also provide more stability than standard traffic cones when used for long periods of time. Barrels stack easily with stepped sides to prevent sticking and contain UV inhibitors to resist fading. High-Intensity tape provides higher reflectivity than Engineer Grade. Top handle has 2 bolt holes for 1 barricade light, sold separately on page 1927.

Use black recycled rubber **Bases** to add stability to barrels.

Safety and Security Mirror Selection Information

Choose a mirror with the lens and backing that suits your application.

MIRROR LENS

Acrylic: Lightweight, strong, and shatter-resistant. 20% brighter than glass.

Scratch-Resistant Acrylic: Special coating keeps surface smooth and resistant to scratching.

Polycarbonate: Strong, virtually unbreakable, and shatter-resistant.

MIRROR BACKING

Hardboard: Strong. For indoor or covered outdoor use.

Plastic: Lightweight. For indoor or covered outdoor use.

Steel: Impact- and corrosion-resistant for extreme conditions.

Convex Mirrors

- 160° viewing angle
- Every 1 in dia. of mirror provides 1 ft. viewing distance

Help increase aisle visibility, reduce blind spots, and prevent accidents at intersections. Mirrors enlarge the size of the reflected image and expand the field of view from a single location. Ideal for high-security areas. All mirrors include mounting hardware.

Dome Mirrors

- Every 1 in-dia. of mirror provides 1 ft. viewing distance

Help direct traffic and monitor hidden areas. High-Visibility mirrors have safety-stripe borders to make them stand out. All dome mirrors include mounting hardware. For indoor use.

Full-Dome—Provide a 360° view. Designed for use at 4-way intersections.

½-Dome—Provide a 180° view. Designed for "T" intersections.

¼-Dome—Provide a 90° view. Designed for internal corners.

Public Safety Vests

Highly visible vests are designed for EMS providers. Color-specific markings differentiate between various emergency responders.

24Y975 has polyester mesh upper and solid polyester body. E4207 offers 1"W high-intensity Reflexite stripes for added visibility. H6445 is heavy-duty, double-stitched nylon with high-glow ANSI reflective stripes. Vest includes one set of hook-and-loop placards imprinted with different positions, easily changed as the incident expands.

Search and Rescue Helmets

Bullard

- Thermoplastic shell material
- Fits hat size 6½ to 8
- Front brim helmets meet ANSI/ISEA Z89.1-2009; Modern style helmets meet NFPA 1971-2007

Front brim helmets have a low-profile design that provides protection without limiting freedom of movement in confined spaces. Feature an ABS inner shell and a foam impact liner and crown cushion.

Modern style helmets feature thermal and impact protection, a low center of gravity, and increased headroom for a more comfortable fit. The Sure-Lock ratchet headband adjusts easily with the turn of a knob. U-Fit System has 12 custom comfort settings, and the 4-pt. nylon crown straps and crown pad allow for a more balanced fit. Unique Quick-Attach blade system allows easy attachment and removal of blade-mounted faceshield or blade-mounted goggles. Additional adjustment points allow for a customized fit and interface with an SCBA. Ripstop Nomex ear/neck protector and 3-pt. chinstrap with quick-release buckle. Absorbent cotton brow pad is fire resistant and removable.

GEMTOR
. . . when your life is on the line

Class II and Class III Rescue Harnesses

Feature sturdy lightweight nylon webbing harnesses and triple locking pompier hook with 2 in side opening gate.

541NYC AND 544FR SERIES CLASS II

- Meet NFPA 1983

Designed for fire service personnel. A sliding D-ring attachment point allows for use with escape systems. 541NYC Series features adjustable, color-coded leg straps. Choose left or right side harness opening to accommodate all types of bunker pants. 544FR Series flame-resistant harnesses are made of 1¾ in W Kevlar webbing with Kevlar thread. Can be worn as an internal harness when paired with compatible bunker pants, or externally with loops on outside.

Note: Measure waist over bunker pants to determine proper size selection.

543CH SERIES CLASS III

- Meet NFPA 1983

For rescue-only operations. Excellent mobility and functionality for lowering yourself or others as a rescuer, for use with an escape system, for rescuing a wearer, and more. 5 load-bearing attachment points. Feature front and back forged steel D-rings and aluminum carabiner. Adjustable, color-coded friction leg straps provide easy donning and size adjustment. Shoulder strap buckles.

PETZL FALLTECH MSA The Safety Company

Connectors and Hardware

Carabiners—Carabiner with triact-lock automatic locking feature is for frequent manipulations. Use carabiner with screw lock for occasional manipulations or where foreign material could jam the automatic locking system. Both have a pear shape that is practical for easily connecting multiple items.

Rope Termination Plates—Plates provide a way to attach a rope lifeline to a fall-rated anchor point so the rope can be used as a lifeline. A fall-rated carabiner attaches one end of the plate to the anchor point and the rope threads through the other end. Rope termination points provide a temporary tie-off without using a knot that can reduce the strength of the rope.

Swivels—Prevent rope twisting when the load is turning. 35ZM16 has a large opening to attach to pulleys and lanyards. Meet NFPA 1983.

Pulleys

Gemini and Twin—Double pulleys have side plates designed for use with a Prusik friction hitch in lightweight progress capture systems. 3NGF1 accepts up to 3 carabiners.
- 3NGF1 meets NFPA 1983 G

Rescue—High-strength, high-efficiency pulley for maneuvering heavy loads and for intensive use. Accepts up to 3 carabiners.

Minder—Prusik minding pulley accepts up to 3 carabiners.
- Meets NFPA 1983 G

Pro—High-efficiency lossproof pulley keeps things simple when setting up a hauling or load deviation system. The side plate locks under load.
- Meets NFPA 1983 T

Kootenay—Large rope channel allows passage of joining knots. Locking pins on sheave allow pulley to be used as an anchor.

Jag Double and Jag Traxion—High-efficiency pulleys are designed to work together to make a 4:1 haul system. Jag Traxion double-progress capture pulley has a toothed cam with self-cleaning slot for optimal performance with frozen or muddy ropes.
- Meet NFPA 1983 T

Pro Traxion—Allows rope installation while pulley is connected to the anchor. Large diameter sheave and side plate locks are suitable for hauling heavy loads.
- Meets NFPA 1983 T

Ascenders and Descender

Ascenders—Designed for ascent with 8 to 13mm dia. rope.
- Meet NFPA 1983 T

Descender—Distributes friction and heat to help preserve the rope and doesn't twist it. The design and configuration of the RACK brake bars make it simple to set up and insert the rope. The lower bar is removable and easy to put in place.

- USCG Type III Approved
- 444M92: 17½-lb. buoyancy, vinyl-dipped outer shell, USCG Type V Approved

Life Vests—Feature poly-twill inner construction and 2 adjustable belts to hold jacket securely in place. 45MP78 features a leg strap for added safety, a convenient grab strap that allows for quick recovery, and a pop-up pillow for added head support. 45MP77 comes with a leg strap for additional safety. 45MP74, 45MP75, and 45MP79 feature a chest strap to help keep the vest from riding up. 45MP79 adds reflective material on the front and back for greater visibility in low light conditions. 444M92 has opening in back to accommodate most fall harnesses, plus adjustable shoulders and sides.

Life Vests with Dual Chest Pockets—Feature an outer shell with polyethylene foam and 2 adjustable encircling belts, a heavy-duty zipper, and large arm holes that allow for more freedom of movement. Belts are hidden to help reduce snags. Reflective material on front and back for greater visibility in low light conditions. Include 2 large cargo pockets, dual chest pockets, and 2 D-ring holders for small attachments.

Mesh Shoulder Life Vests—Include an outer shell with polyethylene foam. The mesh shoulder, back, and sides help to keep you cool in warm weather. Feature 2 adjustable encircling belts and a heavy-duty zipper. Belts are hidden to help reduce snags. The reflective material on front and back allows for greater visibility in low light conditions.

Inflatable Personal Flotation Devices (PFDs)

- Fit chest size: 30 in to 52 in

Hydrostatic inflator on these devices automatically inflates vest when submerged in 4" or more of water. They withstand use in the most severe marine environments. Feature status indicator window, strobe light holder, safety whistle, and SOLAS reflective tape.

HIT Hydrostatic Commercial Vest—HIT (Hydrostatic Inflator Technology) offers reliable inflation. Features a low profile for maximum mobility, 420-denier coated nylon shell, comfortable neoprene collar, back-up oral inflation tube, and D-ring for kill-switch attachment. Offer Type II performance for commercial use. Meets ANSI 107-2004 Class 2 Standard when worn over an ANSI garment.
- USCG Approved Type II/Type V

HIT Hydrostatic Work Vest—Offers enhanced mobility and reduced heat stress even in constant wear situations. Approved for use on inspected and uninspected vessels of any size. Features durable polyurethane-coated nylon shell for improved puncture and abrasion resistance. HIT (Hydrostatic Inflator Technology) offers reliable inflation—includes inflator cover to protect inflator cap, back-up oral inflation tube, and manual activation cord.
- USCG Approved Type V

Compact Tactical Vests—Designed specifically for body armor and tactical vests that use a Modular Lightweight Load-carrying Equipment (MOLLE) webbing system.

M.I.T. 100 Vests—Adjustable waist belt offers customized fit and large arm cut outs mean full mobility. Manual inflation handle is easily accessible when needed. M.I.T (Membrane Inflatable Technology) means a light, flexible fit, and easy re-packing when it comes time to recharge.
- USCG Approved Type III/Type V

Hydrostatic Manual Conversion Kit—Conversion cap for 12L912 and 12L913 (sold separately, this page) lets the operator convert a compatible Mustang Survival PFD to manual-only inflation.

Industrial Foam Personal Flotation Devices (PFDs)

Universal Fit Vest—3 belts adjust to fit adults 80 lb. and up. Large arm holes for mobility. SOLAS-grade tape on shoulders. Great for boat crews.
- USCG Approved Type III

ACCEL 100 Fishing Vest—Designed for fishing and speed, the ACCEL 100 Fishing Vest offers all-day-comfort. Three-buckle system keeps vest in place, with chest strap ensuring it doesn't pop up if you go in the water. Fleece lined collar and pockets keep your neck and hands warm all day long. Reinforced D-ring offers the perfect attachment point for the engine cut off switch on your boat.

4-Pocket Vest—Short-waisted vest has 4 D-rings for lanyard attachment. 50 mph dynamic strength-tested to stand up to tough conditions. Large arm holes for mobility.
- USCG Approved Type III

Mesh Vest—High waist reduces interference with tools. Features mesh shoulders for mobility and comfort, large front pockets with hook-and-loop closure, side adjustments for dual sizing, and SOLAS-grade reflective tape on front and back.
- USCG Approved Type III

Offshore Vests—The first to have earned 4 regulatory approvals in a single design, these vests ease the hassle and cost associated with complying to a variety of vessel regulations.
- USCG Approved Type I, MED, SOLAS, and TC Approved

Flotation Jackets/ Coats and Overalls

- Foam flotation material

Jackets/Coats—Help to provide warmth and waterproof protection from rain and spray, while also offering flotation and insulation during water immersion. USCG Type III jackets are suitable for general boating or specialized activity that is marked on the device (such as water skiing, canoeing, kayaking, hunting etc.). They are best for calm, inland waters and other applications where there is a good chance for fast rescue. All models (except E7913) feature reflective tape for enhanced visibility.

Overalls—Feature fully seam-sealed nylon construction to help protect you from rain and spray, but are also breathable to eliminate the clammy feeling of traditional flotation pants. Adjustable suspenders help to provide a custom fit, while zippered legs help to facilitate easy donning, even over boots. Wear with flotation jackets (sold separately above) to create a fully integrated flotation suit.

Immersion Survival and Rescue Suits

Keep people warm in cold water or extreme weather conditions. Suits also help maintain buoyancy when submerged in water.

Anti-Exposure Work Suits—Relaxed-fit garment provides hypothermia and flotation protection. Have inflatable head support pillow and neoprene wrist closures. Ergonomic insulated hood folds into collar. Offers chest and front cargo pockets plus SOLAS reflective tape for improved visibility. Tug-Tite at thighs and ankles cinch easily to improve fit and minimize water flushing to delay onset of hypothermia.

- USCG Approved Type V

Water Rescue Dry Suits—Have a removable suspender system with 2-point attachment to help improve mobility and fit, while Rapid Repair Technology lets you self-replace neck and wrist seals and repair small leaks in less than an hour. Suit material is waterproof and breathable GORE-TEX fabric with Kevlar patches. Integrated dry socks keep feet warm and dry for hours. Closed comfort system adjustable neck seal. Offer CORDURA wrist and ankle overcuffs with Velcro closures for adjustability. Have SOLAS reflective tape on the arms for increased visibility.

Water Rescue Equipment

Rescue Stick Baton—Provides rapid flotation assistance to a person at risk of drowning. Yellow baton inflates in seconds to a large horseshoe shape once contact is made with water. Includes storage bag.

Survival Ring Buoy—Ideal for ship-board rescue operations, this heavy-duty MUSTANG SURVIVAL ring buoy is molded from high-impact linear, low-density polyethylene for long life. Model has SOLAS reflective tape for greater visibility in low light conditions and polypropylene rope with a UV stabilizer. The buoy's encircling rope can be replaced if needed.

Ring Bouy Bag—High-visibility orange bag includes 90-ft. rope that can be used to extend reach of Ring Buoy 5UYA7.

Throw Bag—Attaches to the floating rope inside and has 1in W reflective tape for nighttime visibility. Features a mesh top and quick-release carrying strap. Includes a light stick holder and a 75-ft rope.

Water Rescue Kit—Packed in a heavy-duty, watertight storage case w/pressure relief valve. Kit includes 5UYA8 inflatable rescue baton, inflatable personal flotation device (PFD), and a throw bag with 50 ft of floating rope.

Zip Tech Zipper Lubricant—Lubricates and protects watertight and airtight zippers on dry suits, survival suits, and more. Contains no silicon or paraffin.

Inflatable PFD Belt Extender—Allows wearers with larger size requirements to use most Mustang inflatable PFDs and will add 12 in to the waist belt. This belt extender fits PFDs with 1.5 in buckles.

Note: In the United States, wearing the belt extender voids the U.S. Coast Guard approval unless the wearer has a chest size over 130cm or 52 in.

Tactical Jackets, Parkas, and Raincoat

5.11 ALWAYS BE READY

A. Response Jacket—Wind- and water-repellent, 100% polyester microfiber shell is ideal for spring weather. Features hidden ID panels on the chest.

B. Big Horn Jacket—Microfiber shell and fleece lining, with Back-Up Belt System: Hidden chest pockets that allow quick access to critical gear. Side zippers on left and right side give easy access to sidearm or provide added ventilation.

C. Tactical Fleece Jacket—Wind-resistant, 100% polyester fleece with 100% nylon panels. Abrasion-resistant collar, shoulders, biceps, and back of forearm. Side-seam zippers allow sidearm access. Zippered exterior hand warmer pockets and interior pockets. Can be used with 3-in-1 Parka D4702.

D. Chameleon Jacket—100% polyester bonded soft shell fabric, features a drop tail, water and wind repellency, and 3 zip-out ID panels.

E. Sabre Jacket 2.0—Designed for superior wet weather performance with waterproof, breathable 100% microfiber softshell fabric and fully seam-sealed construction. Features the Quixip quick-access side zipper. Numerous pockets provide ample storage. Additional features include 3 zip-out ID panels, large shoulder patches, and a removable hood.

F. 3-in-1 Parka—High-performance waterproof and breathable outer jacket is resistant to tears and abrasion. The fleece inner liner is extremely durable and wind-resistant. 100% nylon shell. Side zippers ease access to duty belt and provide ventilation. ID panels on the chest and back are removable.

G. 5-in-1 Jacket—100% nylon shell has a removable fleece liner with zip-off sleeves, enabling the jacket to be worn 5 different ways. Waterproof, breathable construction. Waist-length with side zippers for ventilation and access to duty belt. Removable ID panels on chest and back.

H. Responder Parka and Responder Hi-Vis Parka—Waterproof, breathable parkas are resistant to bloodborne pathogens. High-performance seam-sealed construction features 100% nylon shell with removable polyester fleece liner, hook-and-loop wrist closures and storm flaps, removable hood, and zippered armpit vents. 5.11 Traxion nonslip shoulder panels. ID panel at right chest. High-visibility model has 3M reflective trim.

- **D4723 meets ANSI Class II, Level II/ISEA 107-2010**

I. Reversible Hi-Vis Rain Coat—100% nylon oxford shell in a fully waterproof, seam-sealed design. Adjustable-length jacket serves as a full-coverage coat, or snap off the lower portion to parka length. Features a full snap front, pass-through pockets for easy access to duty belt, shoulder mic loops, integrated badge tab, and a snap-adjustable sleeve hem.

- **High-visibility yellow side meets ANSI/ISEA 107-2015 Class III, Type R**

Tactical Shirts

A. Utili-T Crew-Neck T-Shirt—Features a 1 high-density collar and is cut long to stay tucked in. Moisture-wicking 100% ringspun cotton.

B. Utility Polo—Cotton/polyester pique knit material is wrinkle- and fade-resistant, with a no-roll collar, drop tail with side splits, and dual-pen pockets on the sleeve.

C. Tactical Polo—100% cotton jersey is shrink-, wrinkle-, and fade-resistant for a lasting neat, clean, professional appearance and fit. Stay-flat, no-roll collar. Mic-clip attachments at shoulders and sternum. Short sleeves. Pen pockets on left sleeve.

D. Professional Polo—Made of comfortable, hard-wearing 100% cotton pique knit. Includes convenient left-sleeve pen pockets. Looks neat, clean, and professional. Wrinkle-, shrink-, and fade-resistant. Stay-flat, no-roll collar. Short sleeves.

E. Performance Polo—100% snag-resistant polyester jersey is wrinkle-, shrink-, and fade-resistant. Moisture-wicking, antimicrobial material helps reduce odor-causing bacteria. Stay-flat, no-roll collar. Short sleeves. Dual-pen pockets on left sleeve.

F. Bike Patrol Shirt—Performance-fit shirt has flexible reflective tape on the sleeves, chest, and back for visibility, plus a longer drop tail for neatness and underarm gussets for range of motion. Details include a mic loop at the placket and a chest pen pocket. 100% moisture-wicking polyester jersey with antimicrobial treatment.

G. Helios Polo Shirt—4.5 oz. snag-resistant jersey knit fabric offers moisture-wicking, quick-drying, and odor control characteristics. Integrated underarm gussets ensure a full range of movement, while a pen pocket, front mic loop, and shoulder mic pockets allow you to keep important accessories within easy reach.

H. Tactical Shirts—100% cotton canvas with proprietary hidden document pockets, cape back with mesh lining, and hidden button-down collar. Long Sleeve D6797 features adjustable cuffs and sleeve keepers.

I. Taclite Pro Shirts—Lightweight, breathable 65/35 polyester/cotton ripstop material is PTFE-treated to resist spills and stains. Feature proprietary hidden document pockets, cape back with mesh lining, and hidden button-down collar.

J. ¼-Zip Job Shirt—Shirt features a Break-Through chest pocket with hook-and-loop divider that can carry a full-size radio. Hand warmer pockets, mic-clip pockets, and pen pockets provide additional storage space. Cotton/poly fleece with fade-, shrink-, and wrinkle-resistant finish.

K. Rapid Assault Shirt—Designed for breathability while under full armor. Lightweight cotton/poly/spandex knit fabric wicks perspiration and dries quickly. Side mesh panels improve air flow to keep the wearer cool. Saddle-shoulder design allows maximum range of motion. Flat-lock seams reduce chafing. ½-zip front. Woven collar can be worn up or down. Large dual shoulder pockets offer additional storage.

Tactical Boots

Style E02272—Leather waterproof boots have ballistic nylon upper and waterproof and breathable GORE-TEX lining for comfortable durability. Slip-resistant rubber outsole, athletic cement construction, and cushioned removable insert provide boots with the stability, flexibility, and comfort needed for the most demanding situations. Boots include a YKK nylon zipper for an easy on/off and a nonmetallic composite safety toe to protect against compression and puncture injuries. Composite safety toe meets ASTM F2413-11.

Style E02276—Dirt-, oil-, and water-resistant leather has a Scotchgard protector incorporated into the tanning process to improve durability without changing the breathability or texture of the leather. Nonmetallic safety toe protects you from punctures and compression injuries. YKK nylon side zipper allows easy on/off. Slip-resistant rubber outsole, athletic cement construction, and cushioned removable insert provide boots with the stability, flexibility, and comfort needed for the most demanding situations.

Style RB8674—These security-friendly boots provide stealth and all-day comfort in demanding situations. Their removable polyurethane cushion inserts have a shock-eliminator heel cushion. Each boot is made from 100% nonmetallic construction, and their dual-density outsole features a cushion midsole.

Style RB8694—This field-proven footwear provides comfort and athletic responsiveness in critical situations. A shock-eliminating heel cushion adds extra comfort to the removable PU cushion insert. Its dual-density mountain trail rubber bottom has a specialized military tread design that resists slipping in adverse conditions. Each shoe is nonmetallic and security-friendly. The shoe's XTR material will not conduct electricity, cold, or heat. Its toe cap will resist impact and compression, and is extra-wide for comfort.

Style 804-6369—Puncture- and cut-resistant boots feature strengthened leather pull straps and high-visibility piping. Flame- and cut-resistant leather uppers have reinforced heels and toes. This waterproof boot helps to protect you from bloodborne pathogens. Steel triple ladder shanks provide support and stability. Insulated.

Style 834-7991—Lightweight and designed for comfort and safety, their high-performance construction features tumbled oiled full-grain leather upper and cushion-flex removable polyurethane footbed. The spacer mesh lining keeps feet dry and ventilated and is resistant to bloodborne pathogens. The midsole has a gel heel insert for comfort. YKK zipper with hook-and-loop closure. Waterproof.

Style E03140—DuraShocks construction features compression pads in the heel and forefoot to reduce shock to the feet and legs. Stitch-out welt construction on slip-resistant soles provides flexibility and allows boots to be resoled to extend overall boot life. Full-grain leather upper with 1680 denier nylon. Includes a YKK nylon side zipper to quickly get in and out of footwear in emergency situations and a breathable lining to keep feet cool.

Style 834-6219—Full-grain leather/400g air mesh upper with slip-resistant outsole for multi-surface traction. Shock-absorbing removable polyurethane insole with air flow vents. Cement construction.

GEN-flex2 waterproof, tactical trooper boots have a slip-resistant tread design for sure footing in urban, suburban, and rural settings. Insulated.

Style 12404—Light and comfortable, yet maintains its reputation for toughness and durability. A new air flow tongue and full-length dual durometer Ortholite footbed work to keep your feet cool, dry and comfortable all day, every day. The Achilles heel flex zone, gives a critical part of your foot more range of motion without compromising support. The full-grain leather toe, 840D nylon upper and Shock Mitigation System provide rugged protection.

Fire Helmets

- Fits head size 6⅜" to 8⅜"
- Meet NFPA 1971-2000
- Fire helmet accessories are available online, see Grainger.com

Composite helmets offer both thermal and impact protection, resisting both high heat and flames. Soft black Nomex chin strap features one-hand, quick-release buckle and postman slide for quick removal and adjustment. Shell-release (system) allows escape from snag hazards if helmet is knocked off or hung up. Defender visor offers eye protection, plus it's easy to use, maintain, and change out.

660C Metro—Withstands various applications including firefighting, technical rescue, and EMS and confined space. Proprietary tube-lock system helps absorb impact.

1010 Traditional—Ideal for structural and proximity firefighting. Flexes with impact to absorb energy.

Fire and Rescue Gloves

SKINS Rescue General Purpose Gloves—Material is double thick around the thumb, with keystone thumbs angled toward the palm for greater dexterity. Wash and wear.

Wildland/Rescue Gloves—The keystone double-thick thumbs are angled toward the palm to add dexterity. 4"W Nomex wristlet keeps hot debris from entering gloves.

- Meet NFPA

FDP Structural Firefighter Gloves—Sealed against liquids with a laminated Gore PTFE barrier/thermal liner and sealed seams. Abrasion-resistant; cowhide gloves are also fire-retardant and heat-resistant.

- Meet NFPA 1971-2013

Flex-Tuff Specialty Gloves—Curved shell has a tapered index/trigger finger and flexible thumb and other fingers for dexterity and articulation. Crosstech barrier/thermal liner with a secondary thermal layer for improved heat protection.

Men's Shoe-Fit Insulated Fire Boots

- Meet NFPA 1971, Current Edition

Fire-Dex FDXR100 Shoe-Fit Firefighting Boots are built to provide waterproof protection and thermal wool insulation for firefighters in the field. They feature rubber construction with reinforced rubber shin guards and heels. Steel toes, plates, and shanks offer rugged protection. Integrated pull-on loops help to enable easy donning/removal. Articulating louvers on side tread offer added traction, and the sole tread pattern is designed to help push water outward. Reflective trim provides added visibility.

Extended Wristlet K2351

3D Firefighter Gloves

- Meet NFPA 1971-2013

Firefighters Gloves are designed to deliver natural movement, better grip and tactility, and excellent dexterity. These wristlet gloves offer a Kangaroo leather palm and Cowhide leather back material. PIVOT-THUMB and formed knuckle guard provide natural, anatomically correct thumb-to-finger movement. These gloves have a Nomex/Kevlar thermal lining for heat and slash protection. CROSSTECH inserts provide long lasting protection against hot water, blood, body fluids and common chemicals by resisting damage due to flexing, abrasion and heat exposure. The style has rounded fingertips, curved thumbs and fingers, and exclusive TRU-3D: complete four-chettes on all sides of every finger and thumb. K2351 gloves are constructed with 2 layers of Nomex knit at the wrist for additional protection.

Fire Hose Racks and Reels

4LL10

Racks and reels are used to hold and dry fire hose. Both **wall-mount heavy-duty and standard-duty fire hose racks** have a hump in the rack's center that supports the weight of the hose and helps increase its service life by relieving strain on folded ends. Pivot mounting allows these steel fire hose racks to swing out to the proper angle to help prevent hoses from twisting. **Wall-mount standard–duty racks and reels** have an open-wire design allowing fire hoses to dry faster.

WALL-MOUNT HEAVY-DUTY FIRE HOSE RACKS

These racks provide sturdy storage for collapsible 1½ in or 2½ in fire hose in storage rooms. Vented sides allow fire hose to dry faster and prevent the growth of mold and mildew.

WALL-MOUNT HEAVY-DUTY FIRE HOSE REELS

Reels keep fire hoses organized and ready to deploy. These steel reels store 1½ in or 2½ in single-jacket hoses to keep hoses from kinking or twisting. The solid sides on fire hose reel keep fire hose protected during storage.

WALL-MOUNT STANDARD-DUTY FIRE HOSE RACKS

Racks provide compact storage for collapsible 1½ in or 2½ in fire hose in storage rooms.Wall-Mount Standard-Duty Fire Hose Reels

Standard-duty reels keep fire hose organized and ready to deploy. These steel reels store 1½ in or 2½ in single-jacket hoses to keep hoses from kinking or twisting.

FIRE HOSE PIN RACK

Pin rack holds up to 50-, 75-, or 100-ft. of 1½ in of rack hose. This one-piece steel fire hose rack is powder-coated red for corrosion resistance.

Fire and EMS Bags

Maltese cross instantly identifies firefighter bags and star of life identifies EMS bags.

Arsenal Firefighter Turnout Bags—Bags have a top-grab handle, front outside pocket, and 2 side pockets. 1000-denier nylon, double-coated polyurethane construction with webbing handle, pull strap, and removable shoulder strap. Offers a wide zippered opening to a large clamshell compartment. 3RTU9 has 2 heavy-duty rubberized wheels for easily transporting heavy gear.

First Responder Bag—Nylon bag has a main compartment with divider, side pockets for additional storage, webbed handles with padded hook-and-loop closure, and over-the-shoulder strap for easy carrying.

Arsenal First Responder Bags—600-denier nylon bags have lockable double-pull zippers to help keep narcotics and other controlled substances secure. Large main zippered pocket opening provides quick access to gear. Durable shoulder straps with reflective striping. Customizable interior compartments on large bags keep contents organized for easy access.

Arsenal First Responder Bags, Clamshell Opening—600-denier polyester bags have an easily accessible outside front pocket. Bags open completely for easy access to the main hold and 6-division multitiered mesh interior pocket. 1½" webbing side straps and shoulder strap.

Arsenal First Responder Medic Backpacks—Easy-to-carry packs have 3" padded shoulder straps with reflective striping, phone holder, heavy-duty carry handle, and reflective trim on main panel. Large zippered opening provides quick, easy access to the main hold; segmented to keep supplies organized. 600-denier polyester construction with PVC backing.

Evacuation Stair Rescue Chairs and Devices

Model 40 Chairs—Two 5" stationary rear wheels, rear lifting handles, and 2-position front handles ease movement through cramped quarters. Features two 5-ft. quick-release restraints and locking safety latch.

EZ-Glide Chairs—Track system carries patient down stairs and through tight spaces. Allows one person to evacuate patients up to 200 lb. and two people to evacuate patients up to 500 lb. Features include an ergonomic, 5-position extending lift bar; handles; 3 web straps; foot-rest; and folding design. Model with PowerTraxx allows lifting patients up stairways without risking back injury.

Head Immobilizer—Immobilize heads of patients with suspected spinal injury. Lightweight, easy-to-clean unit has 2 plastic-coated, closed-cell foam supports with 2 straps and large ear holes that allow medical monitoring. Universal attachment base secures to any backboard.

Extrication Device—Helps minimize the risk of further injury during extrication from confined spaces. Wraparound design provides horizontal flexibility and vertical rigidity. Includes a wraparound vest, neck roll, color-coded body straps, 2 head straps, and carrying case. Made of vinyl-coated nylon with built-in handles.

Evacuation Board and Sheet

Designed to help one or more people slide a mobility-impaired individual to safety in an emergency.

Evacuation Board—Hook-and-loop straps secure the person in place and a pillow reduces head movement for safe transport. To protect against hitting steps, door frames, and corners, the board has fold-up sides.

Evacuation Sheet—Adjustable wraparound straps cocoon the patient to the mattress. Long straps at head and foot help control transfer to the floor and out, even down stairs. Sheet installs between the mattress and bed, ready for immediate use.

Evacuation Stair Rescue Chairs

EVAC+CHAIRS—Allow one operator to bring a person down stairs. Self-regulating speed governor enables operator to speed up, slow down, or stop. Include storage cover, wall bracket, indicator sign, user guide, instruction DVD, seat belt, head restraint, and ergonomic handle. 4WLZ8 also includes 2 extra handles for 2-person operation or difficult locations.

IBEX Ascend/Descend Tran-Seat—Uses gravity and friction to transport individuals up and down stairs. Features single-action open/close for rapid use, telescoping handle for correct operator posture, and adjustable resistance control for safe, easy use. 2-person operation.

Stretchers

Basket Stretchers—Use for rescue from confined spaces and elevated locations with poor access.

2LBB8 has a flat carbon-steel patient support down its length. Replaceable netting adds support.

2LBB9 has a fully internal stainless steel frame, HDPE outer shell, and single-plane sliding surface on the bottom. Replaceable closed-cell foam pad.

2LBB7 and 46P351 feature an HDPE shell supported by a heavy-duty aluminum frame. Equipped with four 2-pc., quick-release restraints and a replaceable closed-cell foam mattress. 46P351 separates in half for easy storage and backpack transport to remote rescue locations.

46P352 nonmetallic stretcher can be safely used in areas with electrical hazards and combustible atmospheres. Plastic-coated aluminum frame, plastic rivets, and wooden runners.

Scoop Stretchers—Eliminate the need for log-roll maneuvers to significantly decrease movement of the cervical spine. Adjusts to patient height.

All-aluminum 46P344 with open-center design permits patient to be X-rayed. Narrow foot-end frame for use in confined areas. Folds for storage. 3CRF1 features X-ray translucent polymer construction and 2-pc. 5-ft. polypropylene webbing with quick-release buckles.

Pole Stretcher—Lightweight, heavy-duty aluminum frame folds lengthwise and crosswise for compact storage. Vinyl-coated nylon cover resists stains, blood, and bodily fluids. Nonslip handgrips.

Evacu-Aid Stretcher—Compact and lightweight stretcher features nonslip surface with reinforced stress points. Designed with 8 handgrips for safe patient transport by 2 to 4 people.

Traverse Rescue Stretcher—Use for horizontal or vertical casualty evacuations. Lightweight, compact design is ideal for high angle, confined space, and helicopter rescue operations. Webbing carry handles can be attachment points for a lifting bridle.

Emergency Stretcher—Flat stretcher for transferring patients who have no suspected spinal injury. Lightweight aluminum frame, bacteriostatic vinyl-coated nylon cover, folding 4 in wheels, and posts.

Combination Stretcher Chair—Wheeled chair, stair chair, and flat stretcher. Aluminum frame, vinyl-coated nylon cover, restraints, and folding head- and foot-end posts and wheels.

Tactical Litter and Backboards

Tactical Litter—Features heavy-duty aluminum frame and hinges; includes 2 restraints. Durable polypropylene mesh cover allows blood, bodily fluids, and hazardous chemicals to flow freely away from patients. Mil. Spec. MIL-L-49511B.

Disaster Litter—Lightweight litter is ideal for use by EMS services, fire departments, law enforcement, or hospitals for mass casualty response.

Backboard—Lightweight, buoyant, seamless HDPE construction features 2 handles at a tapered end to help stabilize transport. Smooth head area allows attachment of all head immobilizer devices.

Millennia Backboard—Lightweight, contoured shape with easy-slide offers smooth patient movement in any space. Easy-to-clean plastic shell with foam-filled construction provides X-ray translucency.

Iron Duck Spineboards—Durable HDPE shell over nontoxic foam for durability and easy cleaning. 52WU19 spineboard is X-ray and CT scan translucent and MRI scan compatible. Won't compromise CPR efforts or aggravate cervical spine injuries. 52WU23 folding spineboard is ideal for tight spaces. Stainless steel mechanical pivot and internal aluminum runners.

Disposable Backboards—Durable, virgin fiber corrugated backboards are coated to prevent absorption of rain or fluids. Require minimal storage space and are quickly and easily assembled.

Assembled Backboard Restraint Strap Kit—1-pc. restraints feature 2 in nylon/polyester webbing with quick-release chrome-plated, automotive-type metal buckle. Includes a storage pouch.

Quick Restraint System—10-point, 6-strap system has color-coded nylon straps with hook-and-loop closures. Fits sizes from child to adult. Use with Backboard 2LBB5 and Scoop Stretchers 46P344 and 3CRF1, sold separately, this page.

Cots and Tent

For protection against inclement weather, select items include a waterproof rain fly with access door and air vents.

Folding Cots—Compact cots are easily stored and transported. 3PAH3 and 29TM93 have a mildew-resistant, washable polyester cover. 19TU18 has scissor-action folding legs reinforced with hinges, supports, and 2 snap-on end braces; includes a carrying bag. 13V987 features a drop-down storage pocket on each side that double as handles. 36UV16 unfolds for quick 1-person setup; includes carrying bag. 4VNG5 has fully adjustable head- and footrests for comfort and patient restraint straps.

Tent Cots and Gear Storage Bag—Heavy-duty, powder-coat construction. Each includes a rain fly. 4VNG2 includes wheeled roller bag. Gear Storage Bag clips on the framework of Tent Cots to provide additional storage.

IPS Tent—Use as traditional tent or place directly on cot. "No-See-Um" insect mesh. Carry bag for storage and transport.

Lockout Padlocks

- For more lock colors, see Grainger.com

Plastic Covered Safety Locks with Steel Shackle—Designed for safety lockout applications, these locks are completely insulated against electric shocks, and are available in many colors with multilingual warning stickers. Encased aluminum body provides a high level of heat resistance. Steel shackle helps secure devices with smaller diameter holes.

Plastic Covered Safety Locks, Short and Long Body—Built especially for safety lockout applications. They are completely insulated against electric shocks, offer a high level of heat resistance with aluminum body, and are available in many colors with multilingual warning stickers.

Aluminum Safety Locks—Feature aluminum bodies that are suitable for a wide range of applications and are available in a number of different colors. Lightweight and helps keep the user safe, but does not weigh them down. Hardened steel shackle with enhanced anti-corrosion coating.

Lockout Padlocks

Ecolution 72 Series—Compact and lightweight recycled aluminum body, anodized inside and outside. NANO PROTECT plated steel shackle provides maximum corrosion resistance.

Locks come standard with a 6-pin cylinder for maximum key changes.

- Minimum 70% postconsumer recycled content

Ecolution 74 Series—High recycled content padlocks are spark-resistant and eco-friendly. Dielectric plastic-encased aluminum body and shackle provide extra safety and durability. Locks include trilingual labels for customization. Support LEED building certification.

Laminated Ecolution 41 Series—Our laminated steel safety padlocks are suitable for both safety and security purposes. They are made with high-quality recycled steel laminates that are individually coated with a non-hazardous cadmium-free plating, giving the lock an extremely good level of rust resistance. Colored vinyl bumpers are available for easy identification and compliance with OSHA regulations. The perfect safety lock for use in harsh conditions and for added security.

Anodized Aluminum Lockout Padlocks

AMERICAN LOCK

- Keyed alike or keyed different, 2 keys per lock
- For custom lock configurations, see Grainger.com

Anodized finish, corrosion-resistant ¾"-thick aluminum body with chrome plated hardened steel shackle makes padlocks ideal for food service facilities and washdown applications.

Lockout Padlocks

Master Lock BRADY ZING

- 6-pin key-retaining cylinder (except H1700 is 5-pin)
- Keyed alike or keyed different, 1 key per lock
- Danger labels included

Note: For keyed alike or master keying, or for key numbers not listed, call 1-800-GRAINGER (472-4643). Additional fees may apply.

Zenex Thermoplastic—Lightweight, nonconductive, and durable Zenex thermoplastic padlock body can be customized with permanent write-on labels. Key retaining feature will not release key when lock is open. Ensures padlock is not accidentally left unlocked.

Nonconductive Shackle—Nonmagnetic and nonsparking padlocks are ideal for electrical temperamental environments and confined-space applications. Nonconductive nylon shackle, brass key, and cylinder.

Fiberglass-Reinforced Nylon—Padlocks have nonconductive bodies (H1705 and H1707 are completely nonconductive). Key retaining system prevents key from being removed until shackle is completely closed. H1700 is compact for small spaces.

RecycLock Safety Padlocks—High recycled content padlocks are spark-resistant and eco-friendly. Dielectric plastic-encased aluminum body and shackle provide extra safety and durability.

6-pin key-retaining cylinder. Locks include trilingual labels for customization.

- **Minimum 70% post-consumer recycled content**

Note: Keyed differently locks include 1 key per lock. For keyed-alike products not listed or master keying, call your local branch. Additional fees may apply.

1XRU4

Long Shackle
2 Bumpers
3T976

- Include 2 keys
- Rectangular lock body
- Include black rubber bumper(s), see table

Padlocks have laminated bodies made up of plates of steel fastened with steel rivets. They are commonly used for indoor applications because they are less corrosion-resistant than other padlocks. Master Lock padlocks have an antidrill hardened bottom plate.

4YH33

Extended Long Shackle
3KJT4

Long Shackle
4YH36

- Include 2 keys
- Ball bearing locking mechanism, except where indicated
- Pin tumbler key locking mechanism, except where indicated
- Do not include bumper(s)

Padlocks with solid (no finish) steel bodies are more secure than those with laminated bodies; no exposed rivets to tamper with. Chrome-plated padlocks are weather resistant—can be used both indoors and outdoors. Partially-hidden padlocks provide superior resistance to cutting by minimizing shackle exposure. All padlocks have chrome-plated shackles, except 3HWD4 has a nickel finish.

American Lock and Master Lock padlocks feature rekeyable Pro Series cylinders with special spool pin tumblers that are virtually impossible to pick.

Brass Lock Body Padlocks

- Include 2 keys
- Weather-resistant
- Pin tumbler key locking mechanism
- Rectangular lock body

Brass body padlocks resist corrosion for use indoors and outdoors. Solid body locks with no finish are more secure than those with laminated bodies because they don't have exposed rivets that can be tampered with. Chrome-plated padlocks provide additional protection from harsh environments.

** Rekeyable. † Include a riveted blank brass tag, which can be field engraved for identification purposes.*

Aluminum Lock Body Padlocks

- Include 2 keys
- Weather-resistant
- Double-lever locking mechanism, except 38W786 is ball bearing
- Pin tumbler key locking mechanism
- Rectangular lock body, except 6WNW7 is square

Padlocks resist corrosion and can be used both indoors and outdoors. Chrome-plated padlocks further protect against harsh environments. All padlocks have chrome-plated shackles.

Standard Shackle Laminated Steel Lock Body with Cover 1JAJ8

Standard Shackle Solid (No Finish) Lock Body 430J31

Coreless Keyed Padlocks

- Rekeyable
- Weather-resistant
- Pin tumbler key locking mechanism
- Rectangular lock body

Padlocks contain interchangeable core cylinders (sold separately) that allow the padlocks to be rekeyed or keyed into an existing system without taking the locks apart. 425N95 has a breakaway shackle that can be broken with a hammer blow for applications where the lock may need to be removed rapidly.

Standard Boron Shackle Laminated Lock Body 6T403

Standard Hardened Steel Shackle Solid (No Finish) Lock Body 1XRU7

Covered Steel Lock Body Padlocks

- Include 2 keys
- Pin tumbler key locking mechanism
- Rectangular lock body

Covered padlocks withstand harsh weather and corrosive environments. Models with BumpStop technology prevent rotation of the cylinder so the padlock remains locked. Partially hidden shackle padlocks resist cutting. Locks with rekeyable cylinders provide tens of thousands of key changes.

Weather Tough Laminated Steel—Padlocks have chrome rust-proofing for strength and longer life.

Pro Series—Shrouded padlocks offer superior resistance to cutting by minimizing shackle exposure.

Breakaway Shackle Padlocks

1U176

- Include 2 keys
- General security level

Laminated steel padlocks feature a warded key locking tumbler and a special breakaway shackle for emergency access to sprinkler shutoff valves and fire hose. Shackle is broken with a hammer blow. Padlocks are keyed alike and feature a nickel-finish shackle.

Vertical Shackle Clearance	Horizontal Shackle Clearance	Shackle Dia.	Shackle Material	Nominal Lock Body Dim.	No. of Pins	Key Code	Item No.

Single-Post Shackle Padlocks

- Include 2 keys
- General security level
- Rectangular lock body

Padlocks have a single-post style shackle, so they fit where standard loop shackles won't. Removable hardened steel shackles are inaccessible to cutters once engaged. Padlocks feature dual-locking levers, a hardened steel bottom plate for extra drill resistance, rubber bumpers, and a 4-pin lock tumbler.

Master Lock

Biometric Padlock

- High security level
- Weather-resistant
- Rectangular lock body

Padlock uses fingerprints to unlock so users don't need to keep track of combinations or keys. Features a chrome-plated boron alloy shackle and zinc die-cast lock body that resists corrosion. Padlock holds 10 fingerprints and includes batteries.

American Lock

Government Padlocks

- Standard shackle
- Include 2 keys
- Weather-resistant
- Ball bearing locking mechanism

All key-retaining padlocks feature BumpStop advanced cylinder technology to ensure the padlock stays locked. Bodies are stamped "US". Meet stringent U.S. Government CID-A-A-59486 and CID-A-A59487 standards, including bump-resistance requirement.

Solid Steel—5-pin rekeyable cylinder and nonremovable keys. Included keys are brass.

Solid Brass—5-pin nonrekeyable cylinder. Additional NSNs available, call 1-800-GRAINGER (472-4643).

Partially Hidden Shackle Stainless Steel Disc Lock Body Padlocks and Hasps

ABUS Security Tech Germany · Master Lock

- Include 2 keys, except 4YH18 includes 1 key
- Weather-resistant
- Pin tumbler key locking mechanism
- Round lock body

These solid (no finish) padlocks have a disc shape that helps prevent it from being forced open. Partially hidden shackle protects against cutting and smashing.

Disc Padlock Hasps—Specially designed with a hardened steel loop to make the lock more resistant to cutting.

Hidden Shackle Steel Lock Body Padlocks and Hasps

Master Lock · American Lock

- Include 2 keys
- Weather-resistant
- Pin tumbler key locking mechanism
- Round lock body

Key-retaining padlocks feature a 6-pin rekeyable cylinder.

Hidden Shackle Padlocks—Hockey puck-style lock design completely surrounds the shackle for high-security pry and cut resistance.

Hasps for Hidden Shackle Padlocks—Shrouded steel hasps protect locks from physical attack. Installation hardware not included. 1JAE4 allows padlock to remain attached while open for easier use.

Dial Combination Padlocks

Standard Hardened Steel Shackle 6X694

Standard Steel Shackle 1XRW5

Long Hardened Steel Shackle 3HWJ1

- Stainless steel round lock body
- General security
- 3-digit, single preset combination

Padlocks restrict access to property and open by turning a dial to the correct combination. They don't require users to keep track of a key. They are commonly used in schools, gyms, and health clubs. Master Lock hardened steel shackle padlocks offer BlockGuard antishim technology, which blocks shim tools from opening the lock.

Key-Controlled Dial Combination Padlocks

Standard Boron Shackle 1D569

Standard Hardened Steel Shackle 1D573

Standard Steel Shackle Blue Dial G3498

Long Hardened Steel Shackle 3HWJ3

- Stainless steel round lock body
- General security
- 3-digit, single preset combination

Padlocks open by turning a dial to the correct combination but can also be opened with a key if a user forgets the combination. They are commonly used in schools. Control keys are sold separately and must match the control key code specified by the padlock.

Master Lock hardened steel shackle padlocks offer BlockGuard antishim technology—a unique flat latch technology that blocks shim tools from opening the lock. Locks have the same key as traditional combination lock. 3HWJ5 uses a combination that is easy to remember and dial; ideal for people with disabilities. 1D569 boron shackle features dual ball-bearing locking mechanism. Double-armored stainless steel body with fully recessed dial resists knock-off attempts.

Luggage Padlocks

- Standard shackle
- General security
- Resettable

Padlocks secure access to personal property in luggage, briefcases, and travel bags. They open by turning a scrolling mechanism to the correct combination, and they don't require a key. 2RUF9 Password Plus uses letters, numbers, and symbols for custom passwords. 38W808 and 38W810 are TSA-approved and have a side window for viewing the combination, so TSA screeners can inspect and relock baggage without damaging the lock.

Master Lock ABUS Security Tech Germany

Cable Locks, Security Cables, and Security Chains

Cable Lock 3NY54

Cable Locks—Flexible cables wrap around equipment and an anchor point and lock with a key, combination, or both. They are used with items that cannot be secured with a padlock. Vinyl coating helps prevent scratching. 6JD76 and 6JD75 have integrated locks.

Security Cables—Flexible cables wrap around large or bulky items like fences and are secured with a padlock. 3NY54 and 3UU68 Python patented locks hold cable at any position. Braided steel wire cable has looped ends for use with U-locks or padlocks. Vinyl coated.

Security Chains—Tough chains are secured with a padlock to restrict access to high-value items. They are enclosed in a nylon sleeve that protects the chain from damage.

Removable Steel Shackle Padlock—U-shaped lock has double-locking hardened steel removable shackle, heavy-duty cable and chain, and 7-pin tubular cylinder.

Cam Locks

- Include 2 keys
- All locks have straight, offset cams
- General security level
- Include mounting hardware

Keyed cam locks have an attached arm, or cam, that rotates to lock doors and drawers. They open with a key and secure access to file cabinets, desks, display cases, and vending machines to prevent theft or unauthorized use of the contents.

Keyed Alike—Locks can be accessed with the same key. Lock cores are the same key code.

Keyed Different—Locks can only be accessed by one unique key. Multiple key codes are provided.

Master Keyed—Locks can only be accessed by one unique key or a master key. Locks use master key code D8799 (Grainger part 4TYH5).

Cabinet and Drawer Dead Bolt Locks

These locks secure cabinets and drawers to prevent theft and unauthorized use of the contents. The key can be removed in both the unlocked and locked positions. **Counterclockwise** models have 2 mounting holes and include 2 keys.

Clockwise locks offer 3 mounting holes and include hardware.

Master Keyed dead bolt locks use master key code D8799 (Grainger part 4TYH5).

Snap-On Double Hook

Wrist Coil
20KR18

Large C-Clip Carabiner

Key Ring Clips and Chains

Threaded closure opens and closes with a connector nut. Twist Lock opens into a "figure-8" shape to open and close the ring; a crimper tool closes ring permanently. Socket Lock uses a ball-knob and socket closure to lock ring. Chain on spools can be cut to any length, and couplings connect the chain.

Key Duplicators and Code Cutting Machines

- Key Duplicators create new keys by copying existing keys
- Code Cutting Machines create new keys from coded cards when existing keys are not available for duplication
- Key blanks available; see page 1964.

52HN54 Flash 008 Manual Key Duplicator

- Tool steel cutter

Lightweight, space-saving, and economical. Use where occasional duplication is needed.

52HN53 Manual Key Duplicator

- Titanium-nitride-coated cutter

Designed for cutting popular automotive and commercial cylinder keys, including double-sided types. Wide spacing between vise jaws accommodates longer keys. Depth limit device guards against cutter contact with vise jaws. Ideal for counter or mobile use. Circuit breaker protected.

52HN52 Semi-Automatic Key Duplicator

- Titanium-coated milling cutter

For most residential, padlock, automotive, and double-sided key duplication. Particularly useful when multiple duplicates are needed. Semiautomatic design allows for speed and accuracy. Hardened carriage shaft and cutter spindle provide extended service life. ¼-HP motor allows mobile use. Circuit breaker protected.

1GBB2 Bravo III with EZ Jaw Key Duplicator

- Cobalt steel cutter

Accurately and easily duplicates keys in less than 9 sec., once loaded; ideal for rugged, high-volume environments. Semiautomatic operation provides the necessary pressure; operator simply provides guidance.

52HN51 Automatic/Manual Key Duplicator

- Tool steel cutter

A versatile automatic machine that can be used manually when needed, giving operator freedom to select the best key action. Accommodates large bow and long blade keys. Features titanium-coated cutter with permanently lubricated spindle shaft ball bearings. 4-position vise jaws provide secure clamping. Dial-type depth adjustment system simplifies calibration and improves accuracy.

2-Tag Key Cabinets

Cabinets are made of heavy-duty steel with baked-on powder-coated finish for durability. Each cabinet includes different numbered key tags and lock location charts. Hook-style key tags are numbered consecutively. Each hook holds 1 control key with a red permanent tag and 1 duplicate loaner key with a white reusable tag. In case loaner key is lost, the control key remains in cabinet. An "out key" tag is hung in the same position as the loaned key. Date, key number, and recipient can be recorded on receipt sheet.

500	25¼	5½	18	**33J861**

Key Cabinet

Wall-mount cabinet features touchscreen interface with PIN access; designates keys or keyset which are individually locked in place. Keys are securely attached using special security seals. User has access to key and rights administration. Provides screen based audit trail and reporting capabilities or export via USB port. Features audible alarms and has multilingual functionality. In case of emergency, system can be manual overridden and has door release functions.

Key Cabinets, Binder, and Hanging Files

CABINETS

Help keep track of loaned keys. Come with consecutively numbered, slotted-style, reusable key tags. 5KDJ7, 5KDJ8, and 5KDJ9 are hook style. Record loaner information (key number, date, and recipient) on the "out key" tags and hang them in the loaned keys area. Wall mount.

BINDER

Vinyl construction with metal-reinforced corners and a zipper to keep binder closed and contents secure. Binder comes with 3 base units, 42 snaps, 42 plastic key tags, and labels to organize up to 42 keys. Snap-in tabs allow keys to be removed and inserted easily.

HANGING FILES

Fit in a standard, letter-size filing cabinet.

Commercial Gate Operators

LiftMaster

- 115V, single-phase
- ½-HP motor
- Continuous time interval

Includes a built-in LiftMaster 312HM radio receiver for use with DIP Switch and Security+ remote controls. Rated for 100 cycles per hr. Commercial Gate Operators are compatible with Garage Door Openers 46X657 and 6UR95, available on Grainger.com.

Slide Operator—Unit has alarm reset button, surge/lightning protection, weatherproof polyethylene cover, high-speed precision limit switches, and a gold zinc-plated chassis to help reduce corrosion. For use with slide gates, not included.

Swing Operator—Has "nonscissor action" function to help reduce injury. Feature an alarm reset button, surge/lightning protection, weatherproof polyethylene cover, high-speed precision limit switches, and a gold zinc-plated chassis to help reduce corrosion. For use with swing gates, not included.

Barrier Operator—DC-powered unit is for right- or left-handed operation. Features built-in battery backup, control inputs, inherent obstruction sensing, LED indicators, and an aluminum alloy chassis that resists corrosion. Gate Arm sold separately, go to Grainger.com and search for Gate Arms.

Accessories—Photo Eyes Safety Device 5MKL9 stops and reverses the gate when an object is detected in its path.

ALARM LOCK

Trilogy Electronic Access Control Locks with Audit Trail, Grade 1

- Key override; standard core (included) or SFIC cylinder (not included)

Electronic door locks help eliminate the problem of lost keys and rekeying costs. Replace a standard knobset. Work in conjunction with panic bars from Von Duprin, Yale, Sargent, or Adams Rite on glass/narrow-stile doors. Use 5 AA batteries (included).

PIN/ID CARD CONTROL

Create multitiered security at 4 levels: master, manager, supervisor, or general user. Manage up to 500 automatic lock/unlock schedules (by day, date, weekend, or holiday). Operating temp.: -31° to 151°F. Field reversible.

24U104 is a programmable double-sided lock with both proximity card and keypad PIN access.

Programmable Keypad 1HUZ8 has remote-release/request-to-exit input that allows use with REX switches. Wall- or single-gang box mount.

ID CARD CONTROL ONLY

Proximity-only locks have no keypad; accept both prox cards and keyfobs for access. Tap-and-add feature makes it easy to batch-add multiple ID cards with or without PC. PC programming/reporting.

CODE ONLY

24Z459 provides multilevel security: master, manager, supervisor, and basic; can be programmed at the keypad with PC and/or data transfer module. Quick passage mode allows emergency access.

Double-Sided Proximity Lock 24U102 has direction-specific access that can be assigned, per user, for either side of the door.

1HWL3 and 1HWL4 have a privacy button on inside of door to disable all other codes for a programmable duration when temporary sessions of privacy are needed. Programmable Keypad 1HUZ6 has remote-release/request-to-exit input that allows use with REX switches. Wall- or single-gang box mount.

ACCESSORIES

Trilogy Windows Software 1HYC3 can manage users and schedules, receive audit trail from lock, program lock using PC, and program/configure Handheld Data Transfer Module 1HYB8. Can transfer program data from PC to lock and receive audit trail from lock. Wireless Infrared Printer 1HYC4 is a handheld unit that can print time- and date-stamped audit trail.

ALARM LOCK

Trilogy Networx Networking Locks, Grade 1

- Key for manual override
- Weather-resistant; Operating temp.: -31° to 151°F
- Brushed chrome finish

Networked door access control systems eliminate door-to-door programming and audit trail retrieval by communicating wirelessly via 802.11B/G or Ethernet. No wires to run and no access panel or power supplies to install. Feature automatic schedules, event logs, and support for 2000 doors and 5000 existing proximity ID cards/badges.

PIN/ID CARD CONTROL

Programmable Locks 24U106 to 24U113 have built in HID proximity card reader, full-metal digital key pad, integral bidirectional radio, batteries, and serial number ID card. Starter Kit 24U117 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad 24U119 supports 3 to 6 digit numeric PIN codes and prox ID card users (virtually all HID format proximity technology ID cards, fobs, and credentials).

CODE ONLY

Programmable Locks 24U108 to 24U111 have full-metal digital keypad for code only use. Starter Kit 24U116 includes NET-DKPAK and NET-PDKPAK controller and keypad. Keypad 24U118 supports 3 to 6 digit numeric PIN codes.

ACCESSORIES

Control Panel 24U120 includes circuit board with onboard flash memory and 12V power supply with transformer and rechargeable back-up battery. Supports 2 of any combination of NETDK or NETPDK keypads plus 2 Wiegand devices. Special 2-door mode allows 2 keypads and/or 2 Wiegand devices to separately control 2 doors. Ceiling or wall mount. 1 antenna and 6VAC transformer included.

ALARM LOCK

Trilogy Keyless Electronic Control Locks, Grade 1

- Key override; standard core (included) or SFIC cylinder (not included, sold on Grainger.com)
- Operating temp.: -31° to 151°F except 3ZM80, 3ZM83, and 3ZM81

Easily replace keyed locks with these electronic access control locks. Compatible with most doors that have a standard knob set. Fingertip-programmable keypad allows up to one hundred 3- to 5-digit codes. DL2700-series locks can create a 3-tiered hierarchy of custom codes: 1 master, 10 managers, 90 standard codes, and three 1-time-use codes. Low battery alert. Include 5 AA batteries (up to 150,000 cycles), except 3CCK6, which includes 2 lithium batteries (80,000 cycles). Double-sided models are for code control on both sides of the door.

NexTouch Electronic Touch Screen Locks

- Weather-resistant; operating temp.: -40° to 140°F
- Include 4 AA batteries

Install in minutes in nearly any standard cylindrical lock prep, with ¾"-dia. hole for wiring. Use 12-button touch screen to add, eliminate, or reprogram access codes in seconds; voice-guided instructions in 3 languages. Feature a vandal-resistant freewheeling lever handle. Ideal for access control management in offices, patient records, storerooms, hotels/motels, and other applications that may require frequent rekeying. 52WN32 accepts SFIC cylinders.

Electromagnetic and Keyless Access Control Locks

Use in a wide range of facilities, including large hospitals, small clinics, campus universities, single buildings, or entire office developments. Programmable keypads feature on-board controller access to simple electrified or battery-powered locking devices.

CO100 Series Offline Electronic Lock—Provide customized levels of security at each door, with a large selection of credentials and networking options. Allow addition/deletion of users, usage tracking, and data management without installing a facility-wide network. Upgrade to a network solution by replacing the network module, not the entire lock. Also provides an easy way to manage people, audits, locks, and other network panel interface devices for simple access control. Allows up to 5000 user codes and has a 6 pin full cylinder. Everest C123 Keyway with Sparta lever. Satin chrome finish. Includes (4) AA batteries.

Access Credential Reader—Provide flexible building security and security management solutions. Magnetic stripe card reader is full-swipe for maximum readability. Linked access available with keypad with card or iButton. Fully compatible with ABA Track 2 or Track 3 standards.

Keyless Access Control Locks—Illuminated keypad locks offer up to 19 individual user codes to provide secure access; program right at the keypad. Include 2 backup keys for emergency egress. Fit left- and right-handed doors from 1⅜"- to 1¾"-thick. All-metal chassis and escutcheons with wear-resistant silicone rubber buttons. Include 9V battery and low battery indicator light.

Electronic Access Control Locks with Audit Trail, Grade 1

2ZU97

5BB75

- Key override; key-in lever cylinder (included) or SFIC cylinder (not included)
- Weather-resistant; operating temp.: -31° to 151°F
- Up to 300 users, 9000 audit events
- For 1¾"- to 2¼"-thick doors; 2¾" backset
- Include 4 AA batteries

Event audit trail provides a printable time/date-stamped log of all door activity. Features include audible low battery alert, timed relock, codes for 1-time use, antitamper function (invalid entry), and total user lockout codes. Lock can be programmed and audits downloaded via software and laptop PC (not included). Locks have a vandal-resistant all-metal keypad. Class/storeroom function requires no code for egress. Unique Lectro Belt eliminates wiring to or through the door. Retrofit standard ASA 161 door preps.

Self-Powered 6NVN9

Battery-Powered 2ZU99

2000 Series, Grade 1 Electronic Push-Button Locks

E-PLEX BY KABA

- 100 individual user codes
- For 1⅜"- to 2½"-thick doors; 2¾" backset

No wiring to install. Nonhanded, field-reversible locks have a vandal-resistant, all-metal keypad and a solid cast exterior housing and lever. Classroom/storeroom function; no code required for egress. Come with a standard core or are prepped for a SFIC cylinder (not included). Include lock assembly, installation manual, template, reference guide, operations manual, and hardware. Retrofit standard ASA 161 door preps.

PowerPlex Self-Powered—Efficient and innovative electronic locks generate power with each turn of the lever; no batteries required and virtually no maintenance costs. 6NVN9 includes Schlage C keyway, 2 keys. 6NVP0 is for use with Best SFIC 6- or 7-pin length, not included.

Battery-Powered—Feature audible low battery alert, timed relock, codes for 1-time use, antitamper function (invalid entry), and total user lockout codes. Include 3 AA batteries.

With Deadlocking Latch

900 Mechanical Access Control

SIMPLEX BY KABA

- 1 user code
- 2½" backset

Classroom/storeroom function, no code required for exit. Nonhanded, field reversible. No batteries required. Can be used alone or with an existing lockset. Require a 1⅝"-dia. mounting hole. Measure 4"W x 5"H.

Note: All locks include a sheet metal strike for outswing doors and a cast box strike for inswing wood frame installation.

With Deadbolt—Deadbolt extends 1" from edge of door. Lock remains open and must be manually relocked. Egress by thumbturn.

With Deadlocking Latch and Holdback—Helps secure latch against prying. Automatically relocks after egress, except when latch hold-back is activated. No code is required for entry. Exit by thumbturn.

With Deadlocking Latch, No Hold-Back—Helps secure latch against prying. Automatically relocks after egress.

Metal Frame Adapter Kit—Includes surface-mounted strike with shims to adjust strike box. With ¼" x ⅜" reversible riser plate for aligning inside housing to strike.

Surface-Mount Magnalock Electromagnetic Locks

5KZU9

Fail-safe locks feature automatic dual voltage and instant release circuit. Brushed stainless steel finish. All ferrous metals plated to MIL specification. Mount using machine screws into blind finishing nuts; brackets and accessories available separately to configure any opening. Fully sealed electronics are tamperproof and weatherproof; safe for outdoor/marine use. All locks include 10 ft. of jacketed, stranded conductor.

M32 Series—M32-series locks provide 600-lb. holding force and are for use in medium-security applications. Require 2¼" flat mounting space. M32-series locks provide 600-lb. holding force and are for use in medium-security applications. Require 2¼" flat mounting space.

M62 Series—M62-series locks provide 1200-lb. holding force and are for use in high-security locations. Require 2½" flat mounting space.

ALARM CONTROLS ASSA ABLOY · hes ASSA ABLOY · VON DUPRIN®

Electric Strikes

Electric strikes control access by either holding or releasing a latch bolt. Hard-wire electric strikes connect to a power source and a controller (typically a push-button switch, keypad, or card reader).

A fail-safe electric strike needs power to remain locked.

A fail-secure electric strike remains locked even without power. Device prevents entry; a doorknob or lever on the lock allows for egress.

Rectifiers—Convert AC power to DC.

Adams Rite ASSA ABLOY

Narrow-Stile Electric Strikes, Grade 1

- 1500-lb. holding force
- ½" bolt throw
- Case size: 1" x 3⅜" x 1⅝"D
- Strike opening: ⅝" x 1 7/16" x ½"D

Fail-secure strikes fit in frames for aluminum or wood doors in storefronts and other commercial and retail applications. Strikes exceed 500,000 cycles and 70 ft.-lb. dynamic force. Series 7130 strikes are for use when converting from an Adams Rite MS pivoted-bolt deadlock to a deadlatch.

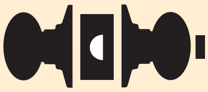
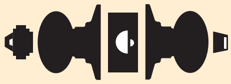
Lock Functions

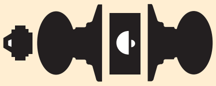
PASSAGE
Both outside and inside handles are always unlocked and free-turning. No keys are required.



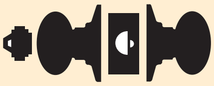
PRIVACY
Inside handle push button locks the outside handle. Emergency release is on the outside knob. Closing the door or turning the inside handle releases the button.



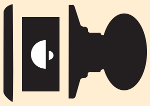
ENTRANCE
Inside handle push button locks the outside handle. Outside handle opens with a key or by turning the inside handle.



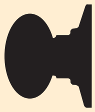
STOREROOM
Inside handle is always unlocked and free-turning. Outside handle is always locked and unlocks with a key.



CLASSROOM
Inside handle is always unlocked and free-turning. Outside handle is free-turning except when it is locked by a key.



EXIT
Deadlocking latchbolt is activated by the inside knob. Nonremovable blank plate is on the outside.



DUMMY
For applications where a latch bolt is not needed.

SCHLAGE

Lever Locksets, Grade 1 and 2

- Backset: 2¾"
- Strike: 1¼" x 4⅞", square corner, no box
- Door thickness: 1⅝" to 2⅛"
- Square corner faceplate: 1⅛" x 2¼"

Include 1" housing dia., ½" throw, and 6-pin solid brass cylinder. C123 keyway. 2 nickel silver keys per lock.

Grade 1, ND Series levers are heavy-duty cylindrical locks. Antimicrobial coating 626AM inhibits bacteria growth.

Grade 2, Elan Series are light-duty residential locks.

Grade 2, AL Series levers are standard-duty commercial locks.

Note: For freewheeling lever models that protect against abusive rotational force, go to grainger.com and search "freewheeling lever".

Newport CL3800 Series

Lever Locksets, Grade 1 and 2

Corbin Russwin ASSA ABLOY

- Backset: 2¾"
- Strike: 4⅞" x 1¼", ANSI, curved lip
- Door thickness: 1¾" to 2" for CL3300 series, 1⅜" to 1¾" for CL3500 and CL3800 series

For use with ANSI 115.2 (161) modified door prep. Passage and Privacy locksets do not have cylinders; all other locksets have a 6-pin cylinder with L4 keyway that is keyed different and include 2 keys. CL3300 Series locksets are heavy-duty. They feature EZ-install components, Lever Release lever design for reduced breakage, heavy-duty return springs, and stainless steel latch bolt for increased durability and security. CL3500 Series locksets are nonhanded and have independent lever return springs for reduced lever sag, solid cast levers for increased strength, and through-bolt cylindrical chassis to ensure proper alignment. CL3800 Series locksets Lever Release lever design, solid cast levers for increased service life, through-bolts for solid attachment, and independent lever return springs.

Pacific Beach

Augusta

5000 Series Lever Locksets, Grade 1 and 2

Yale

- Backset: 2¾"
- Strike: 4⅞" x 1¼" x 1¼" ANSI

Nonhanded, field reversible. Zinc dichromate plating resists corrosion. Keyed different. Heavy-Duty 5400LN series includes Free Wheeling design that helps minimize vandalism by allowing the lever to rotate freely when locked. For 1¾"- to 2"-thick doors. Standard-Duty 5300LN series is for 1⅜"- to 1¾"-thick doors. Models without cylinders accept both Yale and Schlage cylinders. MicroShield antimicrobial coating inhibits the growth of bacteria and lasts the lifetime of the finish.

Lever Locksets, Grade 1 and 2

- Square corner faceplate: 1⅛" x 2¼"

Include 1" housing dia., ½" throw, and 6-pin solid brass cylinder. Schlage Classic C keyway. Keyed different. 2 nickel silver keys per lock.

Grade 1, T Series levers are heavy-duty cylindrical locks designed for facilities that are subjected to high-traffic/high-abuse conditions. Thru-bolted through the door. Chassis is secured by interlocking antirotation plate. Free-wheeling levers.

Grade 2, W Series levers are for high-use commercial applications such as schools, offices, and high-end residential. Solid stops in the lock and heavy-duty construction of all operating parts are designed to prevent damage when subjected to excessive force. Feature small format interchangeable cores (SFICs) that are compatible with SFIC products from other manufacturers.

Curved Return Lever

Contour Angle Lever

BEST

Lever Locksets, Grade 1 and 2

- Backset: 2¾"

Cylindrical chassis fit common door preparation. These locksets feature through-bolt mounting studs for increased torque resistance and quick rekeying with BEST interchangeable cores. Hub torque springs provide extra resistance to lever sag. Preassembled hubs provide quick, simple installation.

9K Series—Low-maintenance design protects critical components from the damage that comes with everyday use. Vandal-resistant lever features a lost motion design that allows lever to move 45° to 60° without engaging retractor assembly. Attack-resistant design with slotted key release cam and locking lug assembly allow key access even if lock is damaged and ensure that lever is functional from inside of the door. Outside lever sleeve is a single piece of seamless, hardened steel alloy that delivers additional reinforcement in the locking lug slot.

7K Series—Keeper hole is not exposed on keyed levers providing increased security. Snap-on inside rose means no exposed mounting screws. Keyed lever is removable only after removal of core. Internal steel mechanisms are corrosion-treated for normal atmospheric conditions. The lockset is reversible for either hand of door without removing keyed lever.

Norton
ASSA ABLOY

Hydraulic Door Closers

Rack and pinion closers have a lightweight aluminum alloy body. Feature adjustments for closing, sweep and latch speed, and back-check. Closures with retrofit plates allow 7500 Series door closers to replace 4040 Series door closers without modifying the existing hole pattern in the door. The plates will work with regular and parallel arm applications.

EXTRA HEAVY-DUTY, 410 SERIES

Nonhanded feature self-closes the door each time the door is opened. Nonhanded Hold-Open closers are not permitted on fire doors.

HEAVY-DUTY, 7500 SERIES

Feature larger closer body and springs, plus advanced hydraulic flow for greater door control. Adjust for door sizes from 1 to 6.

Standard Arm Type—Suitable for doors with low exposure to wind and abuse. For regular, top jamb, and parallel arm installation.

Slide Track Arm Type—Single-lever arm allows components to be stacked to reduce projection and obtrusive arm angles. Pull or Push models depend on the side of the door where the closer is mounted.

CloserPlus Arm Type—Heavy-gauge arm material, arm pivot/elbow with larger bearings, and positive stop help prevent door from opening too far. For doors with moderate exposure to wind and abuse. Parallel arm mount only.

Unitrol Arm Type—Have same features as CloserPlus, but include a spring stop that absorbs 30 lb. of force. Highly controlled stop. Suitable for doors with high exposure to winds and abuse. Parallel arm mount only.

HEAVY-DUTY, 7570 SERIES

This series incorporates the 7500 Series closer with a security cover. Security arm joints are riveted to prevent disassembly. Torx drive screws and security pin are included. Closers are handed with Unitrol arms.

STANDARD-DUTY, 8500, 8300, 210, 1600 AND 160 SERIES

Closers have a medium-size body and springs for effective door control. 8300 Series has a slimline design that requires less mounting space than other closers. 45TY68 and 45TY69 size 4 door closers.

Hydraulic Door Closers, Grade 1 and 3

- Interior/exterior installation
- Non-handed
- Aluminum closer body with plastic cover
- Full-surface mounting style

3100 Series Commercial Grade—Traditional style door control for use on commercial door applications. Common 9¹⁄₁₆" mounting hole pattern permits simple installation on new or retrofit applications.

5500 Series Architectural Grade—Can be adjusted to comply with barrier-free opening force restrictions. Common 12" x ¾" mounting hole pattern for simple installation on new or retrofit applications.

7100 Series Heavy-Duty Closer—Constructed of high-strength cast-iron body and forged-steel arm assembly. Recommended for high-frequency, abusive installations.

Door Closers

Corbin Russwin
ASSA ABLOY

Aluminum

Bronze

Rugged design for high-traffic and high-abuse areas. Captured valves help make closers vandal- and tamper-resistant. Universal and Universal Hold-Open models include brackets and arms to install closer in top jamb, standard, and parallel applications.

Standard Arm—Allows inside mounting of closer on out-swinging doors. Arm does not project from the opening.

Hold-Open Arm—Combines regular hold-open arm with the parallel arm mounting bracket.

Powerglide Door Closers

SARGENT
ASSA ABLOY

Standard Arm Aluminum

Hold-Open Arm Dark Bronze

1431 Series is suitable for interior or exterior doors in commercial settings.

Universal and Universal Hold-Open models include brackets and arms to install closer in top jamb, standard, and parallel applications.

281 Series is rugged cast-iron construction suitable for interior or exterior doors in high-use applications.

351 Series has aluminum body and is for use with doors exposed to strong drafts and winds.

Standard Arm—Mounts on the pull side of door with the arm mounted on the face of the frame.

Hold-Open Arm—Friction-type holder is easy to adjust and can hold door open from 80° to 180°.

Heavy-Duty Parallel Arm—Closer is suitable for narrower door frames, mounts on the push side of the door, and does not project into the room. For use in abusive and high-traffic areas.

Powered Door Operators

Norton ASSA ABLOY

- Nonhanded
- Acceptable for fire and smoke barrier doors

Low-energy operators function as standard spring-force closers during close cycles, when door is opened manually, or if power is lost or turned off. Hold-open time is adjustable from 0 to 30 sec. If door is obstructed, motor stops and the door closes with standard closer. Include 2 radio-frequency wall switches powered by 9V batteries, 6" x 6" face plates with Americans with Disabilities (ADA) logo, and built-in 1.1A power supply. Connect to wall outlet. Rated 120VAC, 60 Hz.

Ideal for doctors' offices, retirement facilities, schools, churches, and other applications where noise may be a concern.

Door Closers

Yale

Rack and pinion closers have a lightweight aluminum alloy body. Feature adjustments for closing, sweep, latch, speed, and backcheck. Closers have a standard arm, which is suitable for doors with low exposure to wind and abuse. For regular, top jamb, and parallel arm installation.

Heavy-Duty, 2700 Series—Features larger closer body and spring. Adjust for door sizes 1 to 6 (Grade 1).

Standard-Duty, 1100 Series—Medium-size body and spring for effective door control. Adjust to door sizes 1 to 4 (Grade 1) or fixed at door size.

Standard, Standard Delayed-Action, and Extra Heavy-Duty 5800 Series—Extra Heavy-Duty feature cast iron construction that increases body life and reduces leakage. Adjustable backcheck, closing speed and latching speed. Tri-style packed regular and parallel arm and top jamb mounting.

Door Closers

LCN®

- Max. door opening up to 180°
- Includes self drilling screws and hardware

Closers have cast iron cylinders, forged steel arms, all-weather fluids, and double heat-treated pinions that help provide long life cycle. Powder-coated finish. Self-tapping/self-reaming screws, and peel-and-stick templates help ensure accurate installation.

1261 Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Does not include cover.

1461 Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 5 ft. and exterior doors to 4 ft.

4011 Series Closers are handed and mounted hinge side; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

4040XP Series Closers are nonhanded and can be mounted hinge side, top jamb, or parallel arm on either right or left swinging doors. Nonsized cylinder is adjustable for interior doors to 5 ft. and exterior doors to 4 ft. Tested for 10,000,000 cycles without failure.

4111 Series Closers are handed and mounted parallel arm; specify left or right handed. Nonsized cylinder is adjustable for interior doors to 4 ft. 6" and exterior doors to 3 ft. 6". Tested for 10,000,000 cycles without failure.

VON DUPRIN®

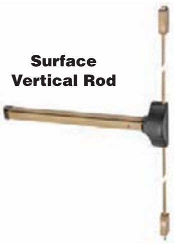
Exit Devices, Grade 1

- Fit doors 1¾" to 2¼" thick up to 7-ft. high

For heavy traffic applications. Use on flush and wide-stile doors.

Rim Pullman Bolt

Rim SquareBolt



Surface Vertical Rod

Exit Devices

- Nonhanded

Nonfire-rated devices have a dogging feature that keeps the door unlatched, allowing traffic to enter and exit freely. "A" labeled fire doors. Fit 1¾"- and 2¼"-thick doors up to 7-ft. high. Include strike and mounting hardware. Heavy-duty devices have a hydraulic noise-dampening feature and a high-quality finish.

Rim Pullman Bolt— Devices resist vandalism and have a ¾" throw stainless steel latchbolt for single-point latching. A guardbolt deadlocks the latchbolt when door is closed and latched.

Rim SquareBolt— Deadbolt-style, 1" throw latchbolt engages the roller strike with a flat surface for increased security. Stainless steel bolt design locks into place; resists shimming and door rattling/shaking.

Surface Vertical Rod— 2-point locking exit devices have an automatic deadlocking upper latchbolt with ¾" throw and lower deadbolt with ⅝" throw. For doors taller than 7 ft., order vertical rod extensions.

Exit Devices and Trim

- Thru-bolt trim design for increased security and durability
- For doors 32" to 36"W

Use in school, healthcare, industrial, office, and multifamily housing facilities. Hex dogging and cylinder dogging lock down the device bar so the latch remains retracted and the door can swing freely. Hex dogging locks down the bar with the use of a hex key. Cylinder dogging uses a keyed cylinder for increased access control.

Standard-duty devices tested to over 500,000 cycles and exceed requirements for Grade 1 certification.

Magnetic Exit Door Alarms

Help deter unauthorized use of emergency doors by sounding an alarm when door is opened. Alarm surface mounts on the interior side of the door, and magnetic contacts mount on the door frame. Alarms are reversible for right- and left-hand doors. For indoor use only; mounting hardware included. Key-controlled alarms require a mortise cylinder lock (sold separately).

Standard—Have a low battery warning. 1U112 includes a battery pack; 1ABN3 includes a 9V battery.

Slimline—Narrow design takes up less space. 6JD82 mounts on inside of door and has a programmable 6-digit keypad to arm and disarm the alarm; 6JD81 mounts on the outside. All include 9V battery.

1U124

1U122

Alarmed Exit Devices

- 95dB alarm
- Include mounting hardware and battery.

Applying pressure to the push bar retracts the latch from the strike plate and sounds alarm until reset with included key. Aluminum housings. Paddle- and bar-activated deadlatches, a low-battery indicator, and a deadlocking latch that resists tampering. Deadbolt extends 1" into strike plate.

Deadlatch

Handle

Paddle

Aluminum Door Hardware

Deadlatches—A reverse key turn while the bolt is held retracts the latchbolt, allowing 2-way traffic. When latchbolt is extended, exit-only traffic is allowed. Compatible with any standard 1 5/32" mortise cylinder where an MS cam is installed. An auxiliary bolt helps prevent shimming.

Deadlatch Handles and Paddles—Include an activator camdisc that mounts on the handle escutcheon and fits into the cylinder hole of the latch.

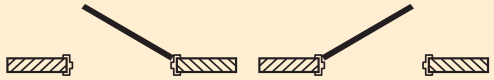
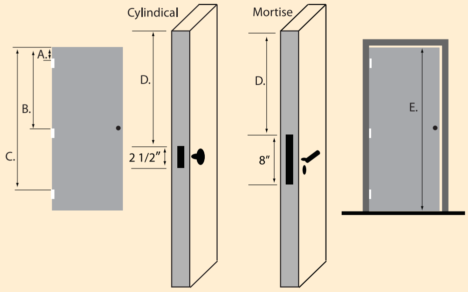
Door Selection Guide

Frame Handing - Select the proper handing.
Right Hand (RH) - Hinges are on the right, door is pushed in.
Left Hand (LH) - Hinges are on the left, door is pushed in.
Right Hand Reverse (RHR) - Hinges are on the right, door is pulled away.
Left Hand Reverse (LHR) - Hinges are on the left, door is pulled away.





A. Measure from top of door to top of upper hinge.
B. Measure from top of door to top of middle hinge.
C. Measure from top of door to top of bottom hinge.
D. Measure from top of door to top of door edge cutout.
E. Measure from inside edge of header to the floor to determine door height.

Door Frames

- 5-3/4" overall jamb depth with a 4⅞" throat opening
- Shipped unassembled

16-ga. cold-rolled steel frame has a 2" face and die-cut mitered corners. Prepped for 3 each of 4½" x 4½" x 0.134" or 0.180" hinges and a 4⅞" ASA universal strike and closer reinforcement. Identify door swing by standing with door swinging forward; if the hinges are on the left, the model is a left-hand door.

Steel Doors

CecoDoor ASSA ABLOY

Steel face sheets are supported by kraft honeycomb core for exceptionally flat surfaces with high structural resistance to impact damage. Core has thermal insulation U-factor of 0.41. 1¾"-thick door is nonhanded and comes with a UL fire label. Prime painted and closer reinforced with 3 each of 4½" x 4½" x 0.134" or 0.180" hinge preparations.

Door available with either a Government 161 cylindrical lock prep with 2¾" backset, or an 86 edge only mortise lock prep. Doors with glass have a ¼"-thick clear wire glass with safety film.

Note: Hinges, lockset, and closer are not included.

Weatherstripping and Seals

- Sold by the roll

Apply to inside of door frame and around windows to seal gaps quickly.

FIRE/SMOKE SEALS

For use with wood fire doors rated for 90 min.

Fire and Smoke Seals—Use to help seal off both fire and smoke.

Fire Seals—Graphite material expands at high temperatures to seal gaps and help prevent the spread of fire.

Smoke Seals—Help prevent smoke passage at temperatures up to 800°F.

FOAM SEALS

Nitrile Sponge Rubber—Highly compressible; can be used outdoors.

Closed Cell—Use to fill larger gaps; can be used outdoors.

Open Cell—Easy to compress; suitable for tight-fitting applications.

Pile—Polypropylene material helps reduce rattling.

EPDM RUBBER

Durable rubber stays flexible in extremely hot and cold temperatures. Blocks out drafts and dust around doors and windows.

F.

Fill the gap below the door and help keep out drafts, light, dust, and weather. Mounting holes included. For inside or outside applications on residential and commercial doors.

A. Single-Fin—Seal door and threshold gaps up to ¾". Neoprene and EPDM material resist weather and remain flexible in cold temperatures.

B. Triple-Fin—Multiple layers provide a positive seal for uneven floors. Seal gaps up to ¾".

C. Nylon Brush Insert—Fibers fill gaps and sweep dirt, insects, and snow away from door. Oak flange can be painted or stained.

D. Reinforced Neoprene Insert, Looped—Create dead air space to insulate against drafts and hold sweep tightly against floor.

E. Drip Cap—Divert rain and debris away from door.

F. Spring-Loaded Door Bottom—Spring lowers door sweep automatically when door is closed. For use on swing-in doors.

Double Door Weatherstripping

Seals the space between wood and metal double doors.

Nylon Brush Insert—Mesh the insert together to seal a gap.

EPDM Insert—Overlaps to seal the gap. Sold in sets of 2 strips.

Pile Insert—Spring-loaded polypropylene insert adjusts in 1/8" increments for proper fit.

Solid Metal Flat Astragal—Mounts to stationary door. Covers gap between double doors.

Magnetic Insert—Seals gap between 80" to 96" doors with a magnet and detaches when door opens.

Adjustable Door Frame Weatherstripping

Adjustable door frame weatherstrip creates an interior sound seal on doors that do not sit plumb and square. Use with wood fire doors rated for 90 min. and metal fire doors rated for 3 hr.

Door Frame Weatherstripping

Mounts on top and sides of door frame to seal gaps.

Hollow Bulb Inserts—Compress easily, stay flexible in extremely low temperatures.

Sponge Insert—Material provides a dense, abrasion-resistant seal.

Flexible Nylon Brush—Dense fibers fill gaps and help keep out insects.

Magnetic—Flexible, vinyl-covered magnet seals against metal doors.

Corrosion-Resistant—Stainless steel flange holds up to harsh weather.

Kerf—Conforms to irregular surfaces to create a tight seal. Installs in kerf-in door stop. For use with steel doors.

Adjustable—Creates an interior sound seal on doors that do not sit plumb and square. Use with wood fire doors rated for 90 min. and metal fire doors rated for 3 hr.

1UEX1

TOUGH GUY

Access Doors

Conceal wall openings with a secure cover that can be finished to match wall color.

ACOUSTICAL, FOR DRYWALL

16-ga. steel door with continuous piano hinge. Allen hex head operated cam latch.

ADJUSTABLE

20-ga. steel door. Adjustable by 1½" in height and width. Magnetic latching mechanism.

DRYWALL

16-ga. door and frame with drywall corner bead flange. Flush mounted with concealed pin hinge. Screwdriver operated cam latch.

FIRE-RATED, INSULATED, STANDARD

16-ga. steel frame and 20-ga. steel door with automatic panel closer and inside release. Self latching tool or ring operated slam latch. 2" mineral wool insulation for a 2-hr. fire barrier and 1½-hr., B label. Fire rating of 1½ hr. in walls, 3 hr. in noncombustible ceilings and 1 hr. in combustible ceilings.

Upward-Swinging— For ceilings only. Same as fire rated insulated model but the panel swings up and shuts down by way of gravity instead of springs.

FIRE-RATED, UNINSULATED, STANDARD

16-ga. steel door for vertical fire-rated surface only where temperature rise protection is not required. Fire rating of 1½ hr. B-Label for 2-hr. rated walls.

HIDDEN FLANGE

16-ga. exclusive steel door. Flush mount with european-type hinge. Screwdriver-operated cam latch.

INSULATED, ALUMINUM

16-ga., corrosion-resistant aluminum door and frame. Feature 1"-thick insulation and gasket around perimeter.

MEDIUM SECURITY

14-ga. steel with baked-on paintable prime coat. Continuous piano hinge and key-operated cylinder lock.

PLASTIC

High-impact, noncorrosive ABS plastic doors are UV stabilized for exterior use. 5YM02 has punch-outs for electric and plumbing.

STANDARD

Steel—16-ga. steel door with flush-mount doors with pin hinge (continuous piano hinge for 2VE87 and 2VE88). Screwdriver-operated cam latch.

Stainless Steel— Corrosion-resistant door and frame.

STANLEY

Template Mortise-Mount Hinges

Steel hinges have standard preplated countersunk holes arranged in a half-moon shape. Square hinges mount into recessed cutouts, attaching doors to frames. Use ball-bearing hinges with door closers to reduce friction in high-traffic areas. Removable pins make frequent door removal easier, while nonremovable pins provide increased security. Safety hinges have concealed bearings to prevent tampering and tapered tips. All hinges are mounted with #12 screws except for 3" hinges, which use #9 screws. Hardware included.

Note: Additional sizes and finishes available. Call 1-800-GRAINGER (472-4643) or search for "hinges" on Grainger.com.

STANLEY

High-Security Weld-On Hinge without Holes

- 180° range of motion

Made of triple weight steel, with welded and machined rolled knuckles, this concealed bearing prison hinge is capable of carrying doors weighing up to 2000 lb. Use it in high-security applications, such as cell-front doors, and grated steel doors to reformatories, as well as with other extremely heavy doors, such as lead-lined x-ray room doors. The solid, one-piece steel pin is welded at both ends, making removal impossible, and the 2 concealed bearing assemblies have hardened raceways and ground balls.

Nontemplate Mortise-Mount Hinges

- 270° range of motion.

Reversible nontemplate hinges have nonstandard hole patterns, providing flexibility as older/stripped holes can be ignored when mounting new hinges. Hinges mount into recessed cutouts, attaching hollow metal or wood doors to frames. Holes are predrilled and countersunk for easy installation and better corrosion resistance.

High-Traffic Hinges

- Nonremovable pins
- Hardware included
- Square corners

FULL-SURFACE MOUNTING
Hinges have antifriction ball bearings for high-traffic doors and openings. Thicker leaves provide greater support for heavier doors. For use when traditional mortise-mount hinges are impractical.

HALF-SURFACE AND HALF-MORTISE MOUNTING
For use when door or frame damage makes a full-mortise hinge impractical. Nonhanded hinges have 180° range of motion and antifriction ball bearings for high-traffic doors and openings. Mount nonmortise leaf to frame. Thicker leaves support greater weight.

Load-Rated Continuous Hinges with Holes

Markar
ASSA ABLOY

- Hardware included

All hinges are heavy-duty, 14-ga. steel and are rated for doors weighing up to 600 lb., up to 1¾" thick, and with a max. door width of 4 ft. Min. door clearance of ⅛", except for 2YEY3 and 2YEY4 which are ⅜". Hinges have 1⅞" knuckles, ¾"-dia. 304 stainless steel hinge pins, and long-life split nylon bearings.

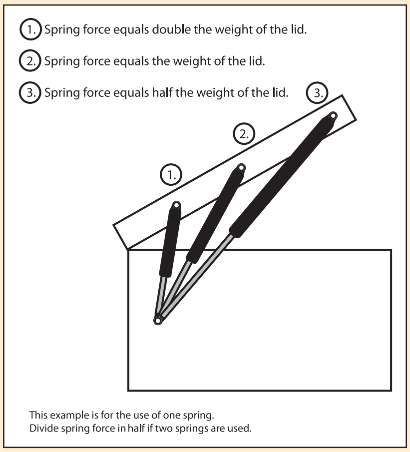
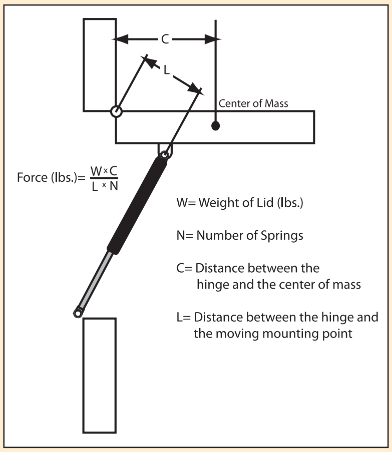
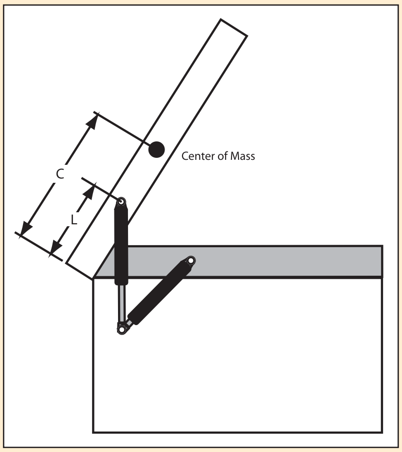
Choosing the Right Gas Spring







Gas springs are the perfect solution for almost any hinged application requiring lift assist. They can also be designed to hold a lid in the open position. Gas springs are filled with nitrogen, a nonflammable gas, as well as oil, to lubricate the internal components of the gas spring.

APPROXIMATING THE REQUIRED FORCE

The diagram above can be used to approximate the force required in the gas spring. A mounting point directly on the center of mass will result in a gas spring requiring about the same force as the weight of the lid. Directly between the center of mass and the hinge will require about double the force. Twice the distance from the hinge to the center of mass will require a force about half the weight of the lid.

CALCULATING THE REQUIRED FORCE

The gas spring force can be more closely approximated using the above diagrams and equation. The force calculated will be enough to hold the lid open in the fully extended position. Because of friction and other application variables, you may want to choose a spring with a force about 10% higher than calculated.

CHOOSING THE RIGHT LENGTH

To choose the right length gas spring, first determine the distance between the mounting points when the application is in the open or extended position. You will want to choose a gas spring with an extended length equal, or nearly equal, to this length.

Next, measure the distance between the mounting points when the application is closed or fully compressed. You will want to choose a gas spring with a compressed length that is less than this length. Choosing a gas spring with a longer compressed length will result in an application that will not work properly. The stroke length of the gas spring can be calculated as the difference between the extended length and compressed length.

Steel and 316L Stainless Steel Gas Springs

Bansbach easylift

- Temp. range: -22° to 176°F

Steel springs feature CeramPro®-treated rod technology to provide a smooth, durable surface. Powder-coated cylinders provide maximum resistance to corrosion. Springs are filled with nitrogen (N_2). Stainless steel springs are constructed of 316L stainless steel. Please be sure to note the thread sizes on either end of the gas spring and that of the fitting when matching the 2. More traction, locking and high temperature gas springs with elbow fittings are available on Grainger.com.

Steel Drawer Slides, Side Mount

Precision ball bearings and raceways ensure smooth drawer operation. Slides have a positive stop so drawer will not disengage from the slide, and a hold-in detent firmly holds the drawer in a closed position. Load rating based on 50,000 cycles. Mounting screws included.

A. FULL EXTENSION WITH LEVER DISCONNECT

Drawer pulls out the entire length of the slide, except the 10" drawer travels only 9½". Slides have a lever release; just push the lever to release the drawer from the slide. Not for use on drawers that are wider than their length.

B. FULL EXTENSION, HOLD-OPEN WITH LEVER DISCONNECT

Same features as **A.**, but with an additional hold-open feature to hold the drawer in place when opened. Drawer requires greater pressure to close.

C. FULL EXTENSION WITHOUT DISCONNECT

Drawer can be pulled out the full closed length of the slide. Once installed, drawer cannot be removed without disassembling the slides.

D. FULL EXTENSION WITH HANDED RAIL LIFT-OFF

Lift-out release feature allows the drawer to be easily lifted up and out of the slide. Slides are full extension, allowing the drawer to be pulled out the full closed length of the slide.

Healthcare HD TVs

High-definition (HD) televisions for healthcare settings can withstand frequent, heavy use in hospital rooms, assisted-care facilities, and similar environments. They typically come with digital rights-management (DRM) technology and may be able to integrate with pillow speakers, education content systems, and other compatible technology used in patient-care facilities.

Note: Pro:Idiom is a digital content protection system tailored for the hospitality industry. It allows a central decoder in a hotel or facility to decrypt video from a headend or satellite feed and re-encode it for secure delivery to TV sets in each room.

Correctional and Behavioral Health Facility HD TVs

High-definition (HD) televisions for correctional and behavioral-health facilities are typically tamperproof and have a clear body so that guards and staff can check that the TVs aren't being used to hide contraband. These TVs are used in prisons, behavioral-health institutions, and similar facilities where inmates or patients are at risk of harming themselves or others.

Prosumer and Entry Level Commercial HD TVs

These commercial high-definition televisions provide longer life in frequent, high-use settings than standard consumer TVs. They are suitable for use in a range of commercial settings, such as break rooms.

Note: Pro:Idiom is a digital content protection system tailored for the hospitality industry. It allows a central decoder in a hotel or facility to decrypt video from a headend or satellite feed and re-encode it for secure delivery to TV sets in each room.

Two Way Business Radios

MOTOROLA SOLUTIONS

All radios include battery, belt clip, single-unit drop-in charging tray, and transformer. For additional accessories, see page 2031.

BUSINESS, RDX SERIES
- FCC License required
- Narrowband compliant
- Durable analog radios provide clear audio quality and expanded frequency capability
- Operate on 89 UHF and 27 VHF business frequencies; up to 213 codes to ensure clear signal
- Allow for programmable frequencies to be added later; high-power models can be programmed to function with repeaters
- Programming Cable 29WJ59 required to program radio on licensed frequencies and to access programmable features, sold separately on page 2024, 2031

BUSINESS, RM SERIES
- FCC License required
- 12.5 kHz narrowband
- Designate 16 prerecorded channels
- Up to 20 floors communication coverage

BUSINESS, RMM SERIES
- Operate on license-free VHF MURS frequencies
- Programming Cable 29WJ59 required to access programmable features, sold separately on page 2031

LIGHT-DUTY, CLS SERIES
- FCC License required
- Narrowband compliant
- Operate on 56 UHF business frequencies; up to 121 codes to ensure clear signal
- Lightweight and compact

Digital Two Way Business Radios

- Narrowband compliant
- 900 MHz ISM FHSS
- Li-ion battery provides up to 14 hr. of service
- 4.2 oz. with battery

1W radios feature programming software that provides easy configuration of features, frequencies, and codes.

Designed with a cloning feature that easily transfers information to additional radios. Polycarbonate housing contains built-in antimicrobial properties that inhibit the growth of bacteria and mold on radio surfaces. 45EC20 has 2 channels, and 45EC21 has 6 channels.

MOTOROLA SOLUTIONS

MOTOTRBO Mobile Two Way Radios

Radios can operate in digital and analog modes concurrently so they fit seamlessly into your existing communication system, allowing you to migrate to digital at your own pace. Rated IP54 (splashproof, virtually dustproof), so they can be used even in harsh environments. Radios include microphone, mounting bracket, and power cable.

Digital radios offer a clear, high-contrast alphanumeric display. View information such as caller ID, channel number and contacts. They are programmed with the basic privacy function to keep conversations more secure and have transmit interrupt capability (decode only) to enable a user to deliver critical communication exactly when and where it's needed. Offer 121 digital codes.

Analog models have a simpler numeric display and fewer channels. All radios are programmable with external channel select, waterproof, and have 38 analog codes.

MOTOROLA SOLUTIONS

Commercial Portable Two Way Radios

- Li-Ion battery type

All include an antenna, battery, belt clip and charger.

EVX-S24—Programmable 12.5/20/25 kHz channel spacing. High contrast display. Have multiple soft keys for features such as encryption mode, which scrambles the audio signal to prevent eavesdropping. Priority Scan mode allows listening to multiple channels at once with precedence on the main channel. Units come with 2-tone encode and decode, which allows sending/receiving of 2-tone pages. Include programming, battery, belt clip, whip antenna, and side cover.

CP100D—Offer analog/digital voice communications and dual-capacity direct mode. Have transmit interrupt capability (decode only) to enable a user to deliver critical communication. Convenient pre-programmed text messaging is available. Also include a battery indicator, brightness (display only), channel scan, high/low power, keypad lock (display only), monitor/permanent monitor function, nuisance channel delete, one touch access, repeater/talkaround feature, tones & alerts on/off, voice announcement, voice activated (VOX) on/off.

MAG ONE BPR 40—Small and lightweight design is only 4.21 in high. Weighs just 9.5 oz with Li-ion battery and 11.08 oz with NiMH battery. Squelch levels help minimize interference from undesired weak signals and boost weak signals. Two programmable buttons give easy access to favorite features, program up to four settings. Include a radio status and battery indicator, Tricolor LED, large textured Push-to-Talk button, single priority scan, and large rotary selector. Rugged, die-cast chassis and polycarbonate housing provides added protection.

CP185—Enhance your privacy with built-in simple voice scrambling and utilize the Remote Inhibit feature, using MDC1200 Signaling, for deactivation of lost or stolen radios. Compact and lightweight to fit in the palm of your hand. Voice activated (VOX) ready for hands-free communication lets users focus on the job at hand improving safety and efficiency. Increase your coverage with repeater capability or use the Talkaround feature, which enables communication even when a repeater is not being used. The programmable buttons enable easy, one-touch access for up to 10 user-selected features.

CP200D and SL300—Powerful, versatile radios combine reliable 2-way radio functionality. Push-to-talk button delivers crisp, clear audio, penetrating even in extremely noisy environments. Essential feature includes the ability to interrupt a transmission to prioritize emergency communications and selectable frequencies. Deliver increased coverage while maintaining a 40% longer battery life. 54HC92 to 54HC95 feature radio check, remote monitor, scan/dual priority, timer, and voice announcement.

Two Way Business Radio Accessories

Audio Accessories—Talk and listen to 2-way radio without removing it from case or belt. Temple Transducer 2EUH1 is ideal for high noise environments. Can receive audio via bone conduction while wearing hearing protection. Unit comes with microphone and In-line Push-to-Talk button.

Remote Speaker Microphone 45EC28 allows communication without removing radio from belt.

Batteries and Chargers—Genuine Motorola batteries and chargers provide optimum performance and help ensure clear, reliable communication.

Carry Accessories—Designed to fit radios with a battery and permit audio to be heard clearly. Carrying cases are premium-grade leather and help protect radios from daily abuse.

Programming Accessories—Allow an interface with customer programming software to easily set up and maintain a radio fleet.

Comfort Ear Tips

Ambidextrous ear tip cone that fits both left or right ear. Designed to fit into the opening of either ear canal without penetrating the inside of your ear, reducing ear fatigue. Ear tip is made of soft silicone gel, providing all day comfort. Open skeleton design allows more ambient sound to pass through your ear for improved situational awareness. Universal acoustic tube fit.

Weather Alert Radios

- 162.40 to 162.55 MHz

Specific Area Message Encoding (S.A.M.E.) feature provides localized weather and hazard alerts down to 1 county. Batteries not included.

TABLETOP HAZARD ALERT RADIO, AC- AND BATTERY-POWERED

Includes a 90dB alert siren.

TABLETOP HAZARD ALERT RADIO, AC-POWERED, BATTERY POWERED

Features full date display and 10 memory channels. Can add or remove up to 8 weather alerts (i.e. flood warning, storm watch). Radio receives both analog and digital signals.

HANDHELD HAZARD ALERT RADIO, BATTERY-POWERED

A weather Test button ensures weather alert feature is functioning and auto scan locates available weather channels.

Weather scan feature allows scanning and locking onto the strongest weather channel signal. Receive alerts by tone, voice, or visual. Large backlit LCD display features tri-color LED with 3 alerts including Weather, Watch, and Advisory.

EMERGENCY SEVERE WEATHER SURVIVAL RADIOS

22A871 includes digital tuner display, headphone jack, and beacon. NOAA alert notifications: Child Abduction Emergency (Amber Alert), Nuclear Power Plant Warning, Biological Hazard Warning, Civil Emergency Message, Fire Warning, and Landslide Warning. Also runs on solar, battery, or AC power. Crank handle to recharge included NiMH battery. 31EX14 is an emergency crank radio and ideal for emergency preparedness, camping, beach, park, and everyday use.

Audio Video Entry System

JO series features a 7" screen, light touch buttons, clear picture quality, sleek design, and 2-conductor wiring. Touch buttons allow you to select volume, discreet monitor, LCD adjustment, secondary device, door release, and hands-free communication. **LEF series** are audio only systems that allows you to intermix up to 11 components. Systems have LEDs and call tones that indicate which door/sub station is calling. A selective door release allows you to unlock a door. Suitable for use in residential, office, and industrial applications. **36TR48** is a 3-call station while **36TR42** is a 5-call station.

The **audio master station** is an audio only communication and entry security system. Features door release (N/O contact), calling and 2-way communication, and call tone and voice volume control. **Door station** is designed for use with many AIPHONE Intercom Systems.

JOBCOM® RITRON®

Two Way Radio Callboxes and Callbox Systems

- Compatible with virtually any existing VHF or UHF business radio system operating on the same frequency

Wireless technology installs quickly and easily without trenching and construction. Large speaker is audible even in noisy environments. Powered by 6 D batteries or 12VDC external power.

Quick Assist Shopper Call Buttons—Press of a button instantly alerts radio-equipped staff to the area where assistance is needed. Stand-alone, battery-operated buttons do not require wiring. indoor/outdoor use. Use with existing business band 2-way radios operating on the same VHF or UHF frequencies.

TELEPHONES

Note: Use of Caller ID requires subscription to a Caller ID service.

CSC600 Series—Have UltraClear sound clarifying technology. Feature missed call indicator and Caller ID/Call Waiting with 99-name/number Caller ID history.

Hearing-Impaired Guest Room Phone Sets—Make sure your facility is ADA compliant to ensure your deaf or hearing-impaired guests are notified in an emergency.

If your property does not include audible and visual detectors, use Kit 5KZF8. Includes display TTY, telephone ring signaler, ClearSounds clock with telephone signaler, bed shaker, telephone in-line amplifier, door knock alert, and a visual strobe smoke detector.

If your property has smoke detectors that are both audible and visual, use Kit 41D240. Includes portable in-line telephone amplifier, Y-jack for phone attachment, digital TTY, door knocker, vibrating alarm clock with telephone signaler, (2) AC adapters, 9V battery, (6) AA rechargeable batteries, vibrating pad, and standard hotel soft case.

For main building fire alarms, if your current system does not signal visually in your hearing-impaired rooms, you must use a signaling device. Kit 29WJ96 is triggered by a continuous T3-T4 fire alarm sound and transfers the signal to the main flashing base. Includes base alerting device, bed shaker, door knock alert, telephone line cord, and fire alarm transmitter.

ACCESSORIES

Amplified Telephone Ring Signaler—Plastic signaler features bright LED light and is for use with any analog telephone line. Includes AC power adapter, telephone line cord, and instruction manual.

In-Ceiling and In-Wall Speakers

- 8 ohm impedance

For music or paging. Mounting brackets are required and are sold separately.

5KZG3—Includes fire-retardant metal back can, quick-snap terminal connections, 70V transformer dial, mounting brackets, metal safety loop, and ported bass.

2KJX9—Plastic and flame-retardant back-box enclosure offers extra protection. Features up to 9 full-range wattage tap settings.

45MK48 and **45MK50** include a volume control knob.

30 and 10 W Speakers—Feature 5 built-in wattage tap settings, except 36H467 to 36H470 have 6 built-in wattage tap settings.

Horn Speakers

Designed for telephone and microphone paging in loud environments, both indoors and out. Mounting brackets and hardware included.

Explosionproof Audible Signal Multitone Horn—Has a 55-tone capability and internal volume control.

Hazardous Location Multitone Horn—Includes a 55-tone capability. For use in dusty and hazardous areas where a distinctive alert is required. For Division 2 locations.

36H458—An amplified weatherproof PA speaker; designed for applications that can benefit by not having a dedicated amplifier.

Additional Transformer—Works with most brands of horn speakers. Flange mount.

TENSABARRIER®

Portable Post Crowd Control Barriers

- 38 in H posts

These post barriers help guide customers and pedestrians, informing of entrances and exits to use. Barriers feature SlowRetract technology that ensures slow, safe belt retraction and locking belt ends to prevent accidental release. Extend belt when a barrier is needed; retract when not in use. Belt material is heavy-duty woven polyester. Belts are 2"W x 7½"L.

▶**Please choose:** Select belt options and post color/finish from the tables below.

Retracta-Belt Crowd Control Barriers

- 40 in H posts

Guide traffic, mark off hazards and restrict access.

Retracta-Belt are designed to withstand heavy traffic areas. Universal belt-end works with most stanchions and locks to help prevent accidental release. Feature a strong and slow EZ Back brake for added safety and have a built-in rubber floor protectors, ensuring scuff protection.

Retracta-Belt PRIME are economically priced and accommodate medium traffic or less abusive environments. Posts feature EVERstraight Technology: a self-straightening base connection that helps keep the post upright and in place.

Mr. Chain

Crowd Control Barriers

Plastic Chain

Medium-Duty Stanchion

Use to create an effective crowd control/warning barrier. For indoor or outdoor use.

Plastic Chain—Use with stanchions and ground posts for crowd and traffic control. Lightweight chain is strong and durable; UV protectant added to help resist fading.

Medium- and Heavy-Duty Stanchions—Highly visible stanchions provide guidance and safety when controlling crowds and directing traffic.

Ground Posts—Maintenance-free posts are used to outline paths and driveways.

Sign Adapters—Use to attach a sign to a stanchion. Replace ball top with sign adapter. Accommodate signs up to 1⁄16" thick.

S-Hooks—Use to attach a plastic chain in a variety of applications. Each size S-hook corresponds to the matching chain.

Magnet Ring/Carabiner—Easy Lockout Tagout (LOTO) option for use in manufacturing facilities, distribution centers, and retail stores.

Handheld

10A457, 1ZRZ7, and 1ZRZ8 provide the ultimate sensitive response to metal objects. They are self-calibrating, easy and convenient to use, and offer increased durability. 20KZ01 provides precision locating for all types of metal to safeguard security areas. No tuning required. Features an optimum sensitivity level and allows you to choose between an audio alarm or silent vibrating. Can be used alone or in conjunction with 20KZ03. 20KZ02 is a high-performance detector for all types of metal. Choose between 3 frequencies for less chance of interference. Designed with "momentary low" switch to eliminate interference from steel rebar built into many concrete floors.

Walk-Through

5ENY7, 53DU72, and 53DU73 detect 33 pinpoint zones to precisely identify multiple target locations across the entire body. Feature dual detection transmitters and receivers in each panel, over 20 standard program settings for optimal performance, and superior versatility with selectable settings designed for airports, courthouses, prisons, schools, facilities, special events, mass transit, loss prevention and many other applications. 20KZ03 transports to virtually any location and can be up and running within 5 min. Multizone detector features 100 sensitivity settings and requires only 1 operator. 40-hr. battery life. AC (110V or 220V) or DC power.

Ground Search

1ZTA2 features graphic target ID cursor, Accept/Reject notch for specific target detection and to ignore unwanted items. Designed with electronic pinpoint for easy target recovery. Also features continuous target depth indicator. 8 level sensitivity adjustment. 5ENY6 features increased durability and sensitivity, 360° side scan detection area, a wide range of operating temperatures, and includes woven belt holster. Also features proportional audible alarms and pinpoints targets faster.

Intensifier Video Cameras

Cameras use an Intensifier chip to amplify extremely low light to produce usable images. Technology creates color images in daylight or at night with true WDR (Wide Dynamic Range) operation. Ceiling, surface or wall mount. Offer progressive scanning. Signal to noise ratio is more than 50 dB. Cameras require a power supply, sold separately. 53DH62 accepts C & CS auto iris & manual type lenses, not included. 56AT27 has presets for different scenarios.

Cobra®

Dash Cam Recorder

- 64 GB external memory

This vehicle interior surveillance system is designed to continuously record the view through a vehicle's windshield, can be attached to the inside of the windshield or on the dashboard. Connects to the Cobra iRadar app to warn of upcoming issues. Offers up to 120 second pre-event recording time. Operates in covert or stand-by mode. Includes adhesive mount, 16 GB micro SD card, micro USB data cable, micro USB power cable, power adapter, rear camera extender cable, and Y-cable.

Network IP Video Cameras

Use for installations where a wide area or multiple areas need monitoring, or a large number of cameras are required. Cameras don't require multiple cables for hook up, can use existing network infrastructure, and allow centralization of security for data storage. Ideal where video needs to be viewable by multiple users in multiple locations. Allow mobile access via iPhone and Android devices. Megapixel IP cameras provide more detail than traditional analog models. Feature higher resolution to improve camera zoom on live view and playback. Can transmit large data files and allow bandwidth throttling where the camera uses the bandwidth needed to transmit data, then throttles back to a lower preset bandwidth when there is no event to record. RJ45 connector.

Network IP Video Recorders (NVRs)

NVR is a software program that records video in a digital format to a USB flash drive, SD memory card, or other mass storage device. NVRs are similar to DVRs, but NVRs take video input over a network, as opposed to directly connecting to the NVR via a capture card or tuner. The video is streamed to the NVR for storage or remote viewing. An NVR contains no dedicated video capture hardware. Before installing an NVR, determine if the NVR software will run on a workstation or if a server is required.

Digital Video Recorders (DVRs)

- 100 to 240VAC
- USB export function

Recorders are for use with IP video cameras. They can help law enforcement and security agencies identify suspected lawbreakers on the highway, in a convenience store, in your business and anywhere else CCTV cameras are installed. They can also help deter crime. RAID-5 protected (standard configuration), all-in-one recording solution for up to 128 channels. Rack mount units have 6 USB ports.

Edwards Signaling NAPCO

Fire Alarm Power Boosters and Accessories

Power booster panels have a self-contained 24VDC power supply to augment fire alarm panel power requirements, and 4 independent Notificiation Appliance Circuits.

ACCESSORIES

Digital Communicator—Acts as a modem to allow communication via a phone line from the control panel to a third-party monitoring service. LCD.

Remote Relay Module—Equipped with 5 form C relays rated at 1A, 30VDC each. May be programmed as zone relays or common system relays for alarm, trouble, supervisory, power, and monitor.

Remote System and Zone Indicators—Mount separately in a single-gang outlet box and display system or zone status in a location remote from the main panel. Remote System and Remote Zone Indicators can be mounted together using the multigang faceplates (sold separately).

Reverse Polarity Module—Interfaces with a reverse polarity receiver to provide communication to an off-site monitoring system.

City Tie Module—Allows the fire alarm control panel to communicate with the fire station.

Fire Alarm Initiating Devices

When activated, devices send signals on a hard-wired connection to initiate an alarm.

PULL STATIONS

Dual-action pull stations prevent accidental alarm activation. Replaceable glass indicates when a station has been activated.

Weatherproof—NEMA 4X rated.

HEAT DETECTORS

- Contact rating: 3A at 125VAC, 1A at 28VDC, 0.3A at 125VDC, 0.1A at 250VDC
- 2500 sq. ft. coverage

Rate of rise: Temperature increase at the sensor of 15°F (9°C) or more per minute activates the rate-of-rise feature; self-restoring.

Fixed temperature: If temperature of the center disk rises to the sensor's rated temperature, the fixed temperature element activates. Nonrestorable and nonreusable. Once activated, the detector must be replaced.

Weatherproof—For indoor or outdoor use.

Explosionproof—For installation in hazardous locations; indoor use only. Rated for Div. 1 and 2.

SMOKE DETECTORS

- Operating voltage: 8.5VDC to 33VDC

LEDs on units give visual indication of alarm activation. Include test switch.

Photoelectric—Units detect dark or thick smoke. Respond quickly to slow smoldering, high-smoke fires.

Smoke Detectors, Air Sampling—Central detection units draw air from a protected area and monitor the stream for the presence of smoke and other products of combustion. Ideal for mission critical settings and hostile environments.

AIR DUCT SMOKE DETECTORS

- Operating voltage: 24VAC/VDC or 120/240VAC

Activate when combustion particles exceed 2.3% per ft. in air moving at 100 fpm to 4000 fpm. Match the air duct size to the appropriate air sampling tube. Remote Test/Reset Station 1EYC1 (sold separately) easily monitors difficult-to-access duct smoke detectors.

Edwards Signaling SYSTEM SENSOR

Fire Alarm Output Devices

Signals are hardwired from a control panel (sold separately).

Bell and Chime Strobe—Use Fire Bell and Horn for audible signaling of a fire. Use Chimes in private areas where attendant will take necessary action. For loud areas and where occupants use hearing protection or are hearing impaired. For indoor applications.

Outdoor Horn Strobe—Use strobe with an installed fire alarm panel and detection devices. For outdoor applications. Must be installed with Weatherproof Back Box No. 5KDF8, available on Grainger.com®.

Covers for Fire Alarm Devices

Safety Technology International

Surface-mount models include a conduit spacer and are designed to cover devices mounted to an electrical gang box.

Indoor/Outdoor Pull Station Covers—Deter malicious and accidental fire alarms without restricting legitimate alarms. Covers with alarms have a 95/105dB selectable horn that activates when cover is opened.

Horn/Strobe Covers—Help protect strobes and horn/strobes from damage and vandalism. Horn/Strobe Covers have sound openings.

Exit Stopper®

REX PLUS® Electronic Watchdog

Audible Entry and Exit Alarms

ALARMS

Exit Stopper®—In Exit Alarm mode, alarm can be set to sound for 30 sec., 3 min., or indefinitely. In Annunciator mode, detector announces door entry. Select 15-sec. entry delay or immediate alarm. Warning horn can be set to 95 or 105dB.

Wireless Alarm Kit—REX PLUS® Electronic Watchdog detects movement in a selected indoor location. Features 4 selectable sounds: continuous rain forest, barking sound of an attack dog, rain forest sound to announce visitors, barking dog for 15 to 20 sec. then a continuous siren. Detects movement through walls, doors, and glass. Variable sensitivity (up to 30 ft.) plus a volume control. 110VAC.

Safety Technology International

ACCESSORIES

8-Channel Receiver No. 16D856 helps monitor up to 4 devices. Features a distinct beep and tone for each of the 4 devices. Latching memory LED (flashes until reset). Use with No.16D849 Add-on Wireless Exit Stopper®. No. 16D849 emits an ear piercing alarm when exit door is opened. Alarm announces door entry with a set of 10 beeps. Detects both unauthorized exits and entries.

Wireless Entrance and Exit Announcers

Reduce surprise visits and missed deliveries with exit and entrance announcers.

Photoelectric Door Announcer—Activated when an individual passes between a photo beam and a reflector. Can be programmed to sound an alert or chime.

Combination PIR and Magnetic Contact Door and Entrance Alerts—Magnetic contacts activate chime/alarm when door or window is opened. Wireless chimes are compatible, sold separately.

2EXU5

2EXV4

Magnetic Contacts

- Vertical or horizontal mount; hardware included

Low-current magnetic contacts send a signal to an alarm or a supervised monitoring system when the door magnet moves away from the frame magnet. A gap between the contacts compensates for ill-fitting doors and windows opened for ventilation. Aluminum switches are sealed airtight to resist corrosion. 2EXV4 mounts directly to the track or channel of an overhead door.

Fastener Assortments with 72-Bin Cabinet

Convenient pigeonhole bin cabinet keeps frequently used fasteners organized and easy to access. Choose the preselected assortment of fasteners that suits your needs. Extra bins give you space for specialty items. Cabinet and base are made of durable steel with red powder-coated finish. Cabinet is 34"W x 42"H x 12" D; and compartments are 4"W x 3⅜"H. Order refill packs below, or go to Grainger.com® for a comprehensive selection of hard-to-find sizes.

Hex Head Cap Screw Materials, Grades, and Finishes

STEEL

An iron alloy with typically a few tenths of a percent of carbon to improve its strength and fracture resistance compared to other forms of iron.

Grade 2 - Used for light-duty fastening

Grade A307A - Heat-treated, medium-strength carbon steel

Grade 5 - Suitable for fastening most machinery and equipment. Head is marked with 3 radial lines

Grade 8 - Used in demanding, high stress applications. Head is marked with 6 radial lines

Grade 9 - Strongest steel for heavy-duty applications. Head is marked with 9 radial lines

Class 8.8 - Medium strength with high ductility and workability. Used on most types of equipment

Class 10.9 - Used for high stress applications or materials

STAINLESS STEEL

A group of ferrous alloys that contain a minimum of 11% chromium; a composition that prevents the iron from rusting and provides heat-resistant properties.

18-8 - Magnetic with natural chemical resistance

316 - Highly corrosion resistant as well as chemical and saltwater resistant

A2 - Metric; magnetic with chemical resistance

A4 - Metric; highly corrosion resistant as well as chemical and saltwater resistant

FINISHES AND COATINGS

Armor Coat - Proprietary coating that provides corrosion and chemical resistance in harsh or saltwater environments

Black Oxide - A black coating that covers the top layer of a ferrous material with a chemical treatment. Corrosion resistant in dry environments

Blue Phosphate - Blue-dyed zinc plating to easily identify metric fasteners

Chrome Plated - Highly corrosion-resistant finish that extends wear and resilience. Provides protection in environments where fasteners are exposed to high friction and wet conditions

Hot Dipped Galvanized - Molten zinc finishing process provides superior corrosion resistance. Thicker than other finishes

NL-19 - Proprietary treatment that makes stainless steel fasteners brighter, stronger and more corrosion resistant

Plain - No coating or treatment applied

Zinc Plated - Corrosion resistant in wet environments

Zinc Yellow - Yellow-plated zinc finish that protects against corrosion in wet environments.

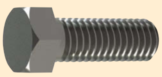
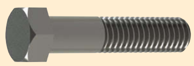
Hex Head Cap Screw Thread Styles and Types

THREAD STYLE



Fully Threaded - Threads run the entire length of the screw body. Use when grip strength is most important.



Partially Threaded - Has an unthreaded area beneath the head, then is threaded for the remaining length of the screw body. The unthreaded area is called the grip length. Use when shear resistance and alignment are most important.

THREAD TYPE

Coarse - Less threads per inch; require fewer turns to fully tighten.

Fine - Threads are more closely spaced for reduced tapping torque. Less likely to loosen or break when threaded into moving or vibrating materials.

Extra Fine - Threads are more closely spaced than fine threads. Used in areas where precise, small adjustments must be made as the fastener is tightened.

Grade 9 Steel Hex Head Cap Screws - Made in USA

Grainger's product suppliers have certified that products below comply with "Made in USA" requirements in accordance with FTC rules and guidance.

- Meet ASME B18.2.1 standards
- Fully threaded

Left-Hand Hex Head Cap Screws

- Meet ASME B18.2.1 standards

Left-hand threaded fasteners are tightened by turning counterclockwise instead of clockwise.

18-8 Stainless Steel screws are magnetic and chemical resistant to secure heavy-duty objects in harsh environments.

Grade 8 Steel screws are commonly used in motors, generators, plumbing applications, automotive suspensions, and construction in high-stress areas.

Nylon Hex Head Cap Screws - Made in USA

Grainger's product suppliers have certified that products below comply with "Made in USA" requirements in accordance with FTC rules and guidance.

- Inch sizes meet ASME B1.1 1982 standards
- Metric sizes meet ANSI B1.13M 1979 standards

Lightweight, light-duty fasteners are chemical and oil resistant. Used in areas where weight is a concern and insulation is needed.

Bronze Hex Head Cap Screws - Made in USA

Grainger's product suppliers have certified that products below comply with "Made in USA" requirements in accordance with FTC rules and guidance.

- Meet ASME B18.2.1 standards

Stronger than brass, and provide more corrosion resistance to saltwater, gases, and sewage. Used in marine environments, areas of high corrosion and high heat, and in electrical installations. Nonmagnetic and electrically conductive.

Structural Bolt Material Grades and Finishes

MATERIAL GRADES

A307B - Medium strength, heat treated carbon steel

A325 Type 1 - Strong, heavy-duty material containing two types of quenched and tempered steel for structural steel-to-steel connections

A490 Type 1 - Made from alloy steel creating a higher strength fastener

Class 10.9 - Strong steel, used for high-stress applications or materials

A394 Type 0 - Used for steel tower bolts; corrosion resistant and chemical resistant, made to withstand environmental pressures

A394 Type 1 - Used for steel transmission tower bolts; corrosion resistant and chemical resistant, made to withstand environmental pressures

FINISHES AND COATINGS

Black Oxide - A black coating that covers the top layer of a ferrous material with a chemical treatment. Corrosion resistant in dry environments.

Hot Dipped Galvanized - Molten zinc finishing process that creates a tightly bonded alloy for superior corrosion resistance. Thicker than other finishes and should be used with hot dipped galvanized nuts.

Zinc Yellow - Yellow-plated zinc finish that protects against corrosion in wet environments.

Grade A307B Heavy Hex Bolts

- Tensile strength: 60,000 psi
- Meet ASME B18.2.1, ASTM A307 standards

Tension Control Bolts

- Tensile strength: 120,000 psi
- Meet ASME B18.2.6 standards

Heat-treated heavy-duty bolt-nut-washer assemblies are used in steel-to-steel and steel-frame construction or high-strength applications. Bolt heads are domed and not designed to be driven.The end of the shank has a spline that holds the bolt steady while a power wrench fastens the nut. When the nut is tightened, the spline breaks off, showing that the bolt has been properly installed.

Grade A325 Type 1 is strong, heavy-duty steel containing two types of quenched and tempered steel for structural steel-to-steel connections.

Grade A490 Type 1 is made from alloy steel creating a higher strength fastener.

Flange Bolts

- Inch sizes meet ASME B18.2.1 standards
- Grade E9 bolts meet IFI 115 standards
- Metric sizes meet DIN 6291 standards

Bolts have a circular flange under the head that acts like a washer to distribute pressure where the screw meets the surface.

Serrated flange bolts have teeth that grip surfaces to resist vibration and ensure a tight hold.

Grade E9 bolts have a 12-pt. head design to handle higher torques.

Steel Carriage Bolts

- Meet ASME B18.5 and SAE J429 standards

Use to fasten metal to metal or metal to wood. Square neck prevents bolt from turning while the nut is tightened.

Note: Additional sizes and bulk packs are available on Grainger.com®; search for "carriage bolts."

GRADE 2
- Tensile strength: 74,000 psi

GRADE 5
- Tensile strength: 120,000 psi

GRADE 8
- Tensile strength: 150,00 psi

18-8 Stainless Steel Carriage Bolts

- Tensile strength: 100,000 psi
- Plain finish
- Meet ASME B18.5 and ASTM F593 standards

Compatible with ACQ treated wood.

S-Hooks

Closed Eye—Secure attachment at one end to strap, wire rope assembly, or rope. To be used for pulling, hoisting, winching, or other rigging applications.

- 316 stainless steel

Open Eye—For use with light ceiling fixtures and canvas tie-downs. Do not use for lifting.

- Zinc-plated carbon steel

Elevator Bolts

- Made of Grade A307A steel
- Tensile strength: 60,000 psi
- Meet ASME B18.5 standards

Flat, smooth, countersunk head allows minimal extrusion from the wall; square neck provides a locking feature. For use where there is little space between elevator and wall.

Steel Chain

- Length: 100 ft.

Single-loop jack chain is kink-resistant and is for lightweight applications. Double-loop chain is intended for higher-strength applications.

Grade 8 Camrail Bolts and Nuts

- Tensile strength: 150,000 psi
- Bolts are alloy steel
- Flange nuts are steel

Designed specifically for maintenance and repair use in locomotive applications.

19T348

Grade 5 Steel Una Drive Bolts

- Tensile strength: 120,000 psi
- Bolts have phosphate and oil finish
- Nuts have zinc/wax finish

Internal hex socket drive in the threaded end holds the bolt steady while tightening and securing nuts. Button head design helps prevent tampering, and distributes the load over a large area for added joint strength. Phosphate and oil finish prevents rust in wet environments. Designed specifically for maintenance and repair use in locomotive applications.

Includes 2 nuts

Standard Round Bend U-Bolts

Use to attach pipes or round steel bars to wood or steel posts. Also used to hang pipe from walls or ceilings or may be embedded in concrete as anchor bolts.

Note: Additional sizes and finishes are available on Grainger.com®; search for "u-bolts" and use the filters on the left side of the page.

Nut Information

NUT TYPES

Acorn
Blind tapped hex nuts with an acorn-shaped, peaked cap keep the end of the bolt or other threaded fastener from protruding to protect the threads. See page 2084.

Cap
Snap into place by hand and lock into the stud securely. See page 2085.

Captive
Also known as insert nuts, captive nuts help provide load-bearing threads in soft or thin materials. See grainger.com/fasteners.

Coupling
Elongated nuts are tapped from each side so threads meet in the middle, rather than entirely through in the same direction. See page 2084

Deformed
Feature irregular internal threads that lock onto the matting threads of a bolt or rod and prevent rotation or loosening. See page 2083.

Hex
General purpose hexagonal nuts for use with non locking applications on male threaded parts. See page 2079.

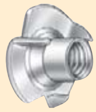
Jam
Used as a second nut; force against the main nut to bind threads and prevent loosening. Prevent 1 nut from moving in the direction of the other without turning both nuts. See page 2080.

Locknuts
Lock onto threaded bolts or rods to prevent rotation or loosening. Minimal reusability. See page 2083.

Push
Hold fasteners in-place before final assembly process occurs. Styles available for studs and bolts. See page 2085.

Spring
Reusable nuts provide the correct amount of spring tension without damaging surfaces, eliminating the need for lockwashers and spanners. See page 2085.

Thumb
Knurled tops allow easy hand tightening, even when wet or greasy or in tight locations. See grainger.com/fasteners.



T-Nuts
Nuts with prongs on 1 side that lock into wood. Often used for fastening metal to wood. See page 2085.

U-Nuts
Multithreaded, tapped barrel nuts for high-torque tightening. Clip over the edge of the panel and snap into place to replace weld or stake nuts. See page 2085.

Weld
Tab base nuts are used when working in confined spaces or when welding to thinner metals. See page 2086.

Wing
1-pc., round, threaded nuts have wing lugs for easy manual assembly. Especially suited to applications where frequent removal, replacement, or adjustment is required. See page 2084.

ARMOR COAT™ FASTENERS

Armor Coat Hex Nuts—Grade 8

Armor coating provides exceptional rust and corrosion-resistance, with the strength of Grade 8 steel. Excellent for harsh environments. Meet ASME/ANSI B18.2.2 1987 (R1999) and SAE J995 standards. 1000-hr. salt spray tested.

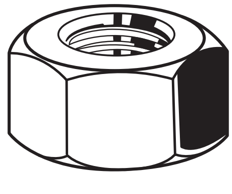
Heavy Hex Nuts



Extra-wide, extra-thick nuts have increased bearing surface and thread engagement for improved hold.

Brass—Meet ASME/ANSI B18.2.2 standards.

Grade 2 Steel—Meet or exceed ASME/ANSI B18.2.2, ASTM A563, and SAE J995 standards.

Grade 2H Steel—For use with structural bolts. Meet ASTM A194 standard.

Grade C Plain Steel & Galvanized Steel—Additional thickness increases bearing surface and engagement of right-hand threads. Meet ASTM A563 standard.

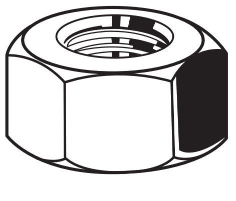
Metric Hex Nuts



Meet DIN 934 standard, except 29DH15 to 29DH17 and 22UK83 to 22UK87 meet ISO 4032.

Note: Brass nuts are also available; on Grainger.com®, search for "brass metric hex nuts."

DISC-LOCK INTERNATIONAL

Hex Locknuts and Safety Wheel Nuts

- Carbon steel

Interlocking cams form a vibration- and shock-proof, free-spinning 1-pc. locking nut assembly that holds tight under forces that cause other locknuts to come loose. Can be used with Grade 5 (Class 8.8), Grade 8 (Class 10.9), and stronger bolts.

J-Style

U-Style

Rectangular

Cage Style

Spring Nuts

Steel construction with Black Phosphate finish, except where noted.

J-Style and U-Style— Reduce assembly time by eliminating welding and riveting.

Rectangular—For use with threaded screws and studs.

Cage Style—Nuts are well suited to blind-sided applications. Zinc finish.

Cap Nuts

External Style—Push nuts act as a decorative and protective stop and cover for the end of studs, rods, or tubes. Cover dia. from 0.188" to 0.750" (metric sizes #4 to #16).

Plastic—Use over shaft, stud, or rod ends to help make a vibration-resistant assembly. Cover dia. from 0.125" to 0.750".

Nut Retainers

U-Type—Commonly used in sheet metal applications. Particularly good for blind assembly applications.

G-Type—Cage fully encloses the nut and shields against protruding screw ends.

U-Nuts—For high-torque tightening in heavy-duty applications.

Locking Hole Plug

Locking Knockout Plug

Nylon Locking Hole and Knockout Plugs

- Temp. range: -40° to 250°F

Plugs close excess chassis holes, wiring outlets, and production access holes. Multiple locks snap into panels from 1/64" to 1/8" thick. Heat-stabilized nylon (UL94V2) construction is suitable for critical or elevated temperature applications.

With Offset Hole

With Projections

Tab Base Weld Nuts

Nuts with offset hole have a single projection and can be used to reinforce or brace an area, while nuts with projections have a center hole and provide the greatest weld strength.

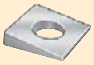
Washer Information

WASHER TYPES



Beveled
Top-bearing surface is cut at an oblique angle to compensate for nonparallel surfaces in structural leveling and shimming applications. Can be round or square. See page 2093.

Conical or Spring
Slight dish shape and edges sheared parallel to the center line increase elasticity of joint for absorbing shock and maintaining tension under dynamic loads.

Countersunk
Allows flat or oval head countersunk screws to be flush with surface for finished appearance. See page 2096.

Disc-Lock™
2-pc. washer has interlocking cams and nonslip ridges that work together under vibration to prevent loosening and lock the assembly, maintaining joint integrity.

Fender
Large outside diameter provides extra-wide bearing surface for distributing force/stress; covers oversize holes. See page 2092.

Flat
The most common washer, with 2 flat surfaces for distributing force/stress of a nut or bolt and reducing friction and heat during installation of a threaded fastener. Can be round or square. See pages 2088, 2089.

SAE Flat—Very similar to the USS, except it has a smaller outside diameter and has a tighter fit to the bolt. Used in the automotive industry. See grainger.com/fasteners.

USS Flat—Most commonly used washer has a large outside diameter that helps distribute forces applied when tightening. See grainger.com/fasteners.

Friction
Rougher washer surfaces have embedded material to provide additional friction and help prevent loosening, even in high-vibration applications. See grainger.com/fasteners.

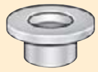
Nord-Lock®
2-pc. system serration and cams creates wedge locking action that prevents bolts from unintentional loosening. Bolt rotation is blocked due to tension between the pair of washers, regardless of high vibration or dynamic loads. See page 2093.

Ogee
Oversize, curved bearing surface keeps bolt heads and nuts from pulling into wood. The load-distributing ogee curve can serve as a force spreader in structural use. See grainger.com/fasteners.

Raised
Has a large bearing surface and raised reinforcements for structural use with wood fasteners. See page 2096.

Retaining
Feature a specially configured inner diameter that slides on the screw easily, but then grips the outside of the screw shank for retention. Ideal for preassembly and kitting. See grainger.com/fasteners.

Self-Sealing
Bonded silicone rubber to a stainless-steel compressible washer. High-pressure sealing, internally and externally.



Shoulder
Barrel protrudes from center hole of flat-bottomed washer to isolate or insulate a screw, shaft, or rivet. See grainger.com/fasteners.

Slotted
A slot the same width as the hole diameter is cut from the center to the perimeter. Slips on and off shaft without removing fastener. See grainger.com/fasteners.

Spherical
2-piece equalizing assembly with 1 flat washer and 1 dish-shaped washer. Eliminates unequal thread loads and stress from nonparallel surfaces. See grainger.com/fasteners.

Split Lock
Split with 1 end bent slightly outward to bite in and prevent loosening. Acts like a spring under compression to provide extra holding force and decrease frictional resistance during assembly and disassembly. See page 2094.

Tooth Lock
Also referred to as star washers. Directional teeth or serrated edges bite into fastener head/workpiece to prevent loosening. See page 2094.

Wave
Wavy shape provides compensating spring force, increases load-bearing capacity, absorbs shock and vibrations, and resists loosening and fatigue. See grainger.com/fasteners.

No. of Pieces	Material	Finish	No. of Sizes	Includes	Brand	Item No.
Flat Washer Assortment						
Standard						
587	Steel	Zinc	11	(160) Each: #6, (140) Each: #8, (100) Each: 3⁄16 in, (60) Each: ¼ in, 5⁄16 in, (30) Each: ⅜ in, (12) Each: ½ in, (8) Each: ⅝ in, (6) Each: ¾ in, ⅞ in, (5) Each: 1 in, and Plastic Case	—	**53WR09**
Nut and Washer Assortment						
600	Low Carbon Steel	Chrome	12	Split Lock Washers (50) Each: ¼ in, 5⁄16 in, ⅜ in, Flat Washers (50) Each: ¼ in, 5⁄16 in, ⅜ in, Hex Nuts (50) Each: ¼"-20, ¼"-28, 5⁄16"-18, 5⁄16"-24, ⅜"-16, ⅜"-24, and Plastic Container	—	**2FUD5**
170	18-8 Stainless Steel	Plain	7	Hex Nuts (30) Each: 6-32, (25) Each: 8-32, (20) Each: 10-24, (15) Each: ¼"-20, Flat Washers (30) Each: #8, #10, (20) Each: ¼ in, Plastic Hanging Pak	—	**53WR27**
177	Steel	Zinc	6	Hex Nuts (30) Each: 8-32, (25) Each: 10-24, (12) Each: ¼"-20, Flat Washers (50) Each: #8, (40) Each: #10, (20) Each: ¼ in, and Plastic Hanging Pak	—	**53WR20**
Washer Assortment						
Fender						
143	Steel	Zinc	12	(20) Each: ⅛ in x ¾ in, 5⁄32 in x ⅞ in, (15) Each: 3⁄16 in x 1 in, (12) Each: ¼ in x 1 in, (10) Each: 3⁄16 in x 1 ¼ in, ¼ in x 1 ¼ in, 5⁄16 in x 1 ¼ in, x1 ½ in, ⅜ in x 1 ¼ in, x1 ½ in, (8) Each: ¼ in x 1 ½ in, 5⁄16 in x 1 ⅝ in, Plastic Hanging Pak	—	**53WR16**
1,400	Steel	Zinc	14	(100) Each: #6 x ¾ in, 5⁄32 in x ⅞ in, 3⁄16 in x ¾ in, x1 in, x1 ¼ in, ¼ in x 1 in, x1 ¼ in, x1 ½ in, 5⁄16 in x 1 ¼ in, x1 ½ in, x1 ⅝ in, ⅜ in x 1 ¼ in, x1 ½ in, ½ in x 2 in, Plastic Container	—	**53WR01**
Flat						
240	PTFE	Plain	8	Color: White, (40) Each: 0, ¼, 1/4L, ⅜, (20) Each: 000, 00, 3/8L, ½, Plastic Box With Lid Chart	—	**3CWA2**
Flat and Split Lock						
232	Steel (SAE)	Zinc	12	(15) ½ in Flat Washers, (15) ½ in Split Lock Washers, (30) ¼ in Flat Washers, (30) ¼ in Split Lock Washers, (30) ⅜ in Flat Washers, (30) ⅜ in Split Lock Washers, (30) 5⁄16 in Flat Washers, (30) 5⁄16 in Split Lock Washers, (5) ¾ in Flat Washers, (5) ¾ in Split Lock Washers, (6) ⅝ in Flat Washers, (6) ⅝ in Split Lock Washers, Plastic Hanging Pak	Itw Bee Leitzke	**2NRZ9**
310	Steel	Zinc	12	Flat Washers (50) Each: #10, (30) Each: ¼ in, (25) Each: 5⁄16 in, ⅜ in, (20) Each: 7⁄16 in, (15) Each: ½ in, Split Lock Washers (50) Each: #10, (25) Each: ¼ in, (20) Each: 5⁄16 in, ⅜ in, (16) Each: 7⁄16 in, (14) Each: ½ in, Plastic Hanging Pak	—	**53WR28**
Thin Fender						
318	Steel	Zinc	11	(48) Each: 10x1 in, (40) Each: 1/4x1 in, (30) Each: 6x5/8 in, 8x3/4 in, 10x1 ¼ in, (24) Each: 1/4x1 ¼ in, 5/16x1 ½ in, x2 in, 3/8x1 ¼ in, x1 ½ in, (20) Each: 5/16x1 ¼ in, Plastic Container	—	**4AMG6**
318	316 Stainless Steel	Plain	11		—	**4AMG8**
318	18-8 Stainless Steel	Plain	11		—	**4AMG7**

Flat Washers

Metric sizes meet applicable DIN standards.

Note: Bulk quantities of some sizes are available on Grainger.com®.

Nonmetallic Flat Washers

Nylon—Strong, abrasion-resistant material offers low friction coefficient, electrical insulation, and noise dampening. Natural finish.

- Bulk nylon washers are available on Grainger.com®

Phenolic—Tough, lightweight material resists distortion under pressure. Ideal insulation for electronic assembly requiring moisture resistance.

Fits Bolt Sizes	Outside Dia.	Item No.	Pkg. Qty.

NORD-LOCK
Bolt securing systems

Nord-Lock® Bolt Securing Systems

Provides safe locking for bolted joints, even when exposed to severe vibration and dynamic loads. Features wedge-locking action; bolt is locked with the tension created between the 2 washers. Rotation of bolt/nut is blocked by wedge effect of cams. Meets DIN 25201 standards.

Split Lock Washers

Light-Duty—Thin helical spring lock washers have a slight reduction in outside dimension.

Heavy-Duty—Load-bearing washers increase elastic properties of the joint to compensate for material expansion and contraction maintain tension under dynamic loads.

Extra-Duty—Washers have increased outside dia., thickness, and bearing area to absorb exceptionally high torques and retain tension under heavy loads.

Square Beveled

Structural Washers

Flat—Primarily used for structural bolting. Commonly used with higher strength fasteners. Meet ASTM F436 standard.

Square Beveled—Washers are primarily used for structural leveling and shimming applications. Hardened steel is commonly used in A325 and A490 structural bolting applications.

- Metric meet DIN 435 standard
- Malleable iron meets ASTM A47 standard

Raised—Large bearing surface provides added strength. Meet ASTM A47 standard.

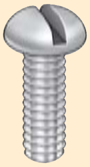
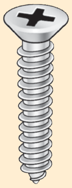
Screw Information



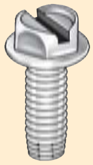
Machine

General purpose screws are typically used in noncritical applications. Machine screws are most commonly used to fasten metal to metal, and are designed to be inserted into a prethreaded hole or mated with a nut (in which case they may be called stove bolts). See page 2098.



Sheet Metal

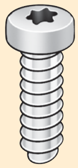
Designed for quick entry into sheet metal, plastics, wood, fiberglass, aluminum, plywood, and hard rubber. They tap their own internal mating thread when inserted into a predrilled or prepunched pilot hole; the resulting fit has close to zero clearance for a strong hold. See page 2105.



Thread-Cutting

Screws cut away and remove the surrounding material instead of displacing it. Create a zero-clearance fit that resists vibration and prevents loosening. See page 2102.

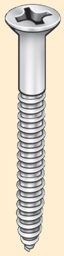
- **Used in harder, less pliable materials**
- **Not recommended for applications requiring frequent assembly and disassembly**



Self-Tapping

Screws displace the surrounding material instead of removing it. They typically have higher drive and strip torque values than thread-cutting screws. Not recommended for materials that crack under sustained loads. See page 2105.

- **Used in softer materials that can deform**
- **For applications requiring frequent assembly and disassembly**



Wood

Form their own internal mating thread in wood or other resilient materials. They create a tight joint, but the screws can be removed easily without damage. See page 2108.

Note: Predrilling is recommended, especially when used in hardwoods.

Machine Screw, Nut and Washer Assortment						
84	7	Screws (10) Each: 10-24 x ¾ in, x1 in, x1 ¼ in, (8) Each: 10-24 x 1 ½, (6) Each: 10-24 x 2 in, Finish Washers (20) Each: #10, Hex Nuts (20) Each: 10-24, Plastic Hanging Pak	Oval	Steel Plain	—	**53WR24**
1,180	29	Machine Screws (30) Each: 6-32 x ½ in, (25) Each: 6-32 x ¾ in, 8-32 x ½ in, 10-24 x ½ in, (20) Each: 8-32 x ¾ in, 10-24 x ¾ in, (15) Each: 6-32 x 1 in, 8-32 x 1 in, 10-24 x ½ in, x3/4 in, x1 in, 10-32 x 1 in, (12) Each: ¼"-20 x ¾ in, (10) Each: ¼"-20 x 1 in, (6) Each: ¼"-20 x 1 ½ in, (4) Each: 10-24 x 1 ½ in, Hex Nuts (82) Each: 6-32, (75) Each: 8-32, 10-24, (60) Each: 10-32, (35) Each: ¼"-20, Flat Washers (88) Each: #6, (85) Each: #8, #10, (35) Each: ¼ in, Lock Washers (88) Each: #6, (85) Each: #8, #10, (35) Each: ¼ in, and Plastic Hanging Pak	Round	Steel Zinc Plated	—	**53WR36**
Machine Screw and Nut Assortment						
1,711	24	Screws (100) Each: 6-32 x ⅜ in, x1/2 in, x3/4 in, 8-32 x ½ in, ¼"-20 x ½ in, x3/4 in, x1 in, x1 ½ in, (48) Each: 6-32 x 1 in, (39) Each: 10-24 x ½ in, x3/4 in, x1 in, 10-32 x ½ in, x3/4 in, x1 in, (36) Each: 8-32 x ¾ in, x1 in, (33) Each: 8-32 x 1 ½ in, (24) Each: 10-24 x 1 ½ in, Nuts (100) Each: 6-32, 8-32, 10-24, 10-32, ¼"-20, and Metal Container, Fits Cabinet 4UJ35	Round	Steel Zinc Plated	—	**53WR06**
Machine Screw Assortment						
71	6	Screws (12) Each: 10-24 x ¾ in, (10) Each: 10-24 x 1 in, (5) Each: ¼"-20 x 1 in, x1 ½ in, Hex Nuts (24) Each: 10-24, (15) Each: ¼"-20, Plastic Hanging Pak	Round	Steel Zinc Plated	—	**53WR19**
88	7	(20) Each: 6-32 x ½ in, (15) Each: 8-32 x ½ in, x3/4 in, (12) Each: 10-24 x ½ in, x3/4 in, (8) Each: ¼"-20 x ¾ in, (6) Each: ¼"-20 x 1 in, Plastic Case	Pan	Steel Plain	—	**53WR31**
214	18	(25) Each: M3-0.50 x 6mm, (20) Each: M3-0.50 x 10mm, M4-0.70 x 6mm, x12mm, (18) Each: M4-0.70 x 20mm, (13) Each: M4-0.70 x 25mm, (12) Each: M5-0.80 x 10mm, (10) Each: M4-0.70 x 30mm, x40mm, M5-0.80 x 16mm, (9) Each: M5-0.80 x 20mm, (8) Each: M5-0.80 x 25mm, M6-1.00 x 12mm, (7) Each: M5-0.80 x 30mm, M6-1.00 x 16mm, x20mm, (5) Each: M6-1.00 x 25mm, x30mm, Plastic Hanging Pak	Pan	Steel Zinc Plated	—	**53WR25**
445	16	(40) Each: 6-32 x ½ in, x3/4 in, x1 in, 8-32 x ½ in, x3/4 in, (35) Each: 8-32 x 1 in, 10-24 x ½ in, (30) Each: 8-32 x 1 ½ in, 10-24 x ¾ in, x1 in, (20) Each: 10-24 x 1 ½ in, (15) Each: ¼"-20 x ½ in, x3/4 in, x1 in, (10) Each: ¼"-20 x 1 ½ in, x2 in, and Plastic Case	Flat	Steel Zinc Plated	—	**53WR15**
445	16		Round	Steel Zinc Plated	—	**53WR23**
455	24	(40) Each: M4-0.70 x 6mm, x10mm, x12mm, x16mm, (15) Each: M4-0.70 x 20mm, x25mm, x30mm, x35mm, x40mm, x45mm, x50mm, (30) Each: M5-0.80 x 10mm, x16mm, x20mm, (10) Each: M5-0.80 x 25mm, x30mm, M6-1.00 x 12mm, x16mm, x20mm, x25mm, x30mm, x35mm, x40mm, x50mm, and Metal Container, Fits Cabinet 4UJ35	Pan	Steel Zinc Plated	—	**53WR02**
Multi-Machine, Tapping Screw, and Washer Assortment						
252	32	Oval Sheet Metal Screws (10) Each: #6 x ¾ in, x1 in, #8 x ¾ in, (8) Each: #8 x 1 in, x1 ¼ in, #10 x 1 in, (6) Each: #10 x 1 ½ in, (5) Each: #12 x 1 ½ in, Pan Sheet Metal Screws (10) Each: #6 x ¾ in, #8 x ¾ in, (8) Each: #8 x 1 ¼ in, #10 x 1 in, (5) Each: #10 x 1 ½ in, Oval Machine Screws (4) Each: 10-24 x ¾ in, 10-24 x 1 in, ¼"-20 x ¾ in, x1 in, x1 ½ in, (3) Each: 10-24 x 1 ½ in, Round Machine Screws (4) Each: 10-24 x ¾ in, x1 in, (3) Each: ¼"-20 x ¾ in, ¼"-20 x 1 in, (2) Each: ¼"-20 x 1 ½ in, Hex Nuts (20) Each: 10-24, (15) Each: ¼"-20, Flat Washers (15) Each: #10, (8) Each: ¼ in, Lock Washers (15) Each: #10, (12) Each: ¼ in, Finish Washers (12) Each: ¼ in, (10) Each: #10, and Plastic Hanging Pak	Oval, Pan, Round	Steel Plain	—	**53WR34**
Self-Drilling Screw and Washer Assortment						
295	12	Self-Drilling Screws (40) Each: 10-16 x ¾ in, (30) Each: 8-18 x ½ in, x3/4 in, x1 in, 10-16 x ½ in, (20) Each: 10-16 x 1 in, 12-14 x ¾ in, x1 in, ¼"-14 x ¾ in, x1 in, Self-Drilling Screws with Neoprene Washer (20) Each: 12-14 x ¾ in, (15) Each: ¼"-14 x 1 in, and Plastic Case	Hex Washer	Steel Zinc Plated	—	**53WR12**
Self-Drilling Screw Assortment						
199	15	Self-Drilling Screws (24) Each: #6 x ½ in, #8 x ½ in, (20) Each: #8 x ¾ in, (15) Each: #6 x ¾ in, #10 x ¾ in, x5/8 in, x1/2 in, (12) Each: #10 x 1 in, (10) Each: #8 x 1 in, #12 x ¾ in, x1 in, (8) Each: #12 x 1 ¼ in, #14 x ¾ in, (6) Each: #14 x 1 in, (4) Each: #14 x 1 ½ in, Magnetic Drivers (1) Each: ⅜ in, 5⁄16 in, ¼ in, Plastic Hanging Pak	Hex Washer	Steel Zinc Plated	—	**53WR37**
340	13	Flat Head (10) Each: 10-24 x 1 ¼ in, x1 7⁄16 in, 12-24 x 2 in, Pan Head (40) Each: 8-18 x ½ in, (30) Each: 6-20 x ⅜ in, x1/2 in, 8-18 x ¾ in, x1 in, x1 ½ in, 10-16 x ½ in, x5/8 in, x3/4 in, x1 in, Plastic Container	Flat, Pan	Steel Zinc Plated	—	**53WR22**
1,825	20	(100) Each: #6 x ½ in, #8 x ½ in, x3/4 in, x1 in, x1 ¼ in, x1 ½ in, #10 x ½ in, x3/4 in, x1 in, x1 ¼ in, x1 ½ in, #12 x ¾ in, x1 in, x1 ½ in, ¼ inx ¾ in, x1 in, x1 ½ in, (50) Each: #6 x ¾ in, x1 in, (25) #12 x 1 ¼ in, Metal Container, Fits Cabinet 4UJ35	Hex Washer	Steel Zinc Plated	—	**53WR14**
Sheet Metal Screws and Plastic Anchors Assortment						
365	11	Hex Head Screws (70) Each: #8x3/4 in, Pan Head Screws (50) Each: #4x3/8 in, #6x1/2 in, #10x3/4 in, (40) Each: #8x5/8 in, (20) Each: #10x1 in, #12x1 in, #14x1 in, Plastic Anchors (20) Each: ¾ in, (15) Each: ⅞ in, (10) Each: 1 in, and Plastic Hanging Pak	Pan	Steel Zinc Plated	Itw Bee Leitzke	**2NRZ8**
Tapping Screw and Washer Assortment						
76	6	Screws (8) Each: #8 x 1 ¼ in, #10 x 1 ¼ in, (10) Each: #8 x ¾ in, x1 in, #10 x 1 in, Washers (15) Each: #8, #10, Plastic Hanging Pak	Oval	Steel Plain	—	**53WR17**
Tapping Screw Assortment						
82	7	(15) Each: #6 x ¾ in, #8 x ½ in, (12) Each: #8 x 1 in, #10 x ¾ in, (10) Each: #8 x ¾ in, #10 x 1 in, (8) Each: #10 x 1 ½ in, Plastic Hanging Pak	Pan	Steel Plain	—	**53WR21**
94	6	(25) Each: #8 x ½ in, (20) Each: #8 x ¾ in, (15) Each: #8 x 1 in, (12) Each: #8 x 1 ½ in, #10 x 1 in, (10) Each: #10 x 1 ¼ in, Plastic Hanging Pak	Pan	Steel Zinc Plated	—	**53WR10**
535	19	(55) Each: #8 x ½ in, (50) Each: #10 x ½ in, (45) Each: #8 x ¾ in, (40) Each: #6 x ½ in, (35) Each: #6 x 1 in, #8 x 1 in, #10 x ¾ in, (30) Each: #6 x ¾ in, #8 x 1 ¼ in, #10 x 1 in, (25) Each: #8 x 1 ½ in, #12 x ¾ in, (20) Each: #10 x 1 ¼ in, (15) Each: #10 x 1 ½ in, (15) Each: #14 x ¾ in, (14) Each: #12 x 1 in, x1 ½ in, (12) Each: #14 x 1 in, (10) Each: #14 x 1 ½ in, Plastic Hanging Pak	Pan	Steel Zinc Plated	—	**53WR30**
667	24	Oval Head (35) Each: #6 x ½ in, (30) Each: #6 x ¾ in, #8 x ½ in, (25) Each: #8 x ¾ in, (20) Each: #6 x 1 in, #8 x 1 in, #10 x ¾ in, (15) Each: #8 x 1 ¼ in, x1 ½ in, #10 x 1 in, (12) Each: #10 x 1 ¼ in, (10) Each: #10 x 1 ½ in, Pan Head (100) Each: #8 x 1 ¼ in, #10 x 1 ¼ in, (35) Each: #6 x ½, (30) Each: #6 x ¾ in, #8 x ½ in, (25) Each: #8 x ¾ in, (20) Each: #6 x 1 in, #8 x 1 in, #10 x ¾ in, (15) Each: #8 x 1 ½ in, #10 x 1 in, (10) Each: #10 x 1 ½ in, Metal Container, Fits Cabinet 4UJ35	Oval, Pan	Steel Plain	—	**53WR18**
2,000	20	(100) Each: #6 x ⅜ in, x1/2 in, x5/8 in, x3/4 in, x1 in, #8 x ½ in, x5/8 in, x3/4 in, x1 in, x1 ¼ in, x1 ½ in, #10 x ½ in, x3/4 in, x1 in, x1 ¼ in, x1 ½ in, x2 in, #12 x ¾ in, x1 in, x1 ½ in, and Metal Container, Fits Cabinet 4UJ35	Pan	Steel Zinc Plated	—	**53WP98**
Wood Screw Assortment						
122	6	(30) Each: #6 x ¾ in, (25) Each: #6 x 1 in, (20) Each: #6 x 1 ½ in, #8 x 1, (15) Each: #8 x 1 ¼ in, (12) Each: #8 x 1 ½ in, Plastic Hanging Pak	Flat	Steel Zinc Plated	—	**53WR29**

Round Head Machine Screws

High-profile domed head gives a decorative appearance. Meet ASME B18.6.3 standard.

Note: Additional sizes, materials, and slotted drive are available on Grainger.com®.
